All merchandise on this list is sold subject to the seed and nursery non-warranty. See page 5 and 47 of our 1937 Catalog. All orders received subject to being unsold on receipt of order and subject to change in price without notice.
Folks:

This is "D.B." at W.N.A.X.

In talking to you about 300 times a year, I use over 500,000 words. But, with all the improvements at WNAX, I still am unable to send you pictures over the air. That's why we send out over 800,000 catalogs. You will find a lot of good information in this book and plenty of pictures to help out your imagination. But I am sending a picture on this page that I am proud of. It not only shows you the progress made by your station, WNAX, but is symbolic of Progress in every division of The House of Gurney.

POWER: From a small Radio Station located in my home, in 1927, WNAX grew rapidly. It was allowed 1,000 Watts and rated a home of its own. We built a three-story addition to our Seed House and made it comfortable. Two 150 foot towers sent the programs on their way to you.

MORE POWER: Last year Uncle Sam gave us the right to use 5,000 Watts. We were ready for it and WNAX again rated and received New Quarters. Its New Home

IS SHOWN IN THE PICTURE BELOW

In May, these grounds were just open fields. A plan for their improvement was made and the Nursery Department went to work. The Mixture planted. The ground was plowed and harrowed; Capitol Lawn was sown; trees were dug in the Nursery and Shrubbery and flowers, roses and flowering plants sent their way to the new home of WNAX. The result: ready-made Park, such as you see in the picture of hot, dry weather, practically all grew. You can do as well.

A Symbol of Progress

Our power has been multiplied by five. Our towers have risen from 150 feet to 449 feet. Our regular audience has doubled, but our Desire to Serve looks like the figures in the World War Debt. To do this every department is "on its toes" all of the time, to give you better service, better programs, and BETTER MERCHANDISE
Every Employee must give you of his best, and the best is not too good. Look through this book, place your order and if you don't get what you want, when you want it, drop me a line.

Sincerely yours,

Have you ordered Nitragin Inoculator for your Alfalfa and Clover Seed?
Garden seeds from The House of Gurney are the best quality money can buy. They are either grown by us or are grown for us under contract from our own stock seed.

In our trial grounds each year we test over 5000 different kinds of flowers and vegetables, discarding the poor ones and listing only those which we would be satisfied with for our own planting.

We Pay Transportation Charges on All Vegetable and Flower Seeds in Pkts., Ounces, 1/2 Pints, One-Pound and 5-Pound Lots. Something Special Will Be Packed FREE with Each Order.

**ANOTHER SERVICE BY GURNEY'S**

All Garden Seed Treated To Destroy Seed Borne Diseases

Certain diseases of vegetables are carried on the seed and may cause the loss of your entire crop. Gurney's have insured you against losses caused in this manner.

All garden seed sold by us is treated here at Yankton before it is sent to you. This treatment absolutely kills all seed borne diseases and, also, increases the germination and vigor of the seed. This is rather costly both in labor and capital, but is a service you have a right to expect from your seed merchant.

We are pleased that we are the first seedsmen in the Northwest to give this service.

**GARDEN SEED PRICES**

**ASPARAGUS**

Sow in early spring in drills two inches deep. Manure plentifully through the seed bed. Sow in drills two inches deep. Asparagus is absolutely rust resistant. Pkt., 5c; 1 oz., 10c; ½ lb., 25c; 1 lb., 75c.

**SUMMER ASPARAGUS SQUASH**

Known as “Cut and Come Again.” This most delicious vegetable is worth a place in all gardens. The plant makes a strong growth, like summer crook-neck squash. The fruit should be cut at four to six inches long and should not be allowed to mature, as it stops the formation of new fruit. Cook it just as the same as asparagus. Yields wonderfully. Pkt., 5c; 1 oz., 15c; ½ lb., 40c.

**GROUND ALMOND**

Is a very interesting novelty as one hill will produce as many as 125 to 150 nuts. They should be grown in good mellow ground, they have a very fine almond flavor. The nuts are about three-quarters an inch in length, having a thin brown skin and snow white meat. Harvest one week after the nuts have been harvested and dried for a time. The nuts will mature in the fall after the first frosts. Pkt., 5c; ½ lb., 20c; 1 lb., 45c.

**BRUSSELS SPROUTS**

Cultivated for the small heads that grow in great number on the main stem. It is a delicacy much esteemed by everyone. Sow in seed bed of spring and transplant and manage as Winter Cabbage. Pkt., 6c; oz., 20c; ¼ lb., 55c; lb., $1.60.

**BUY FRESH NEW CROP GARDEN SEED FROM GURNEYS—THEY GROW AND SATISFY**

*Transportation—Parcel post rates are usually lower than express or freight on orders weighing less than 50 lbs. If you wish your order to come by parcel post, be sure and inclose money for postage on any articles not postpaid by us.*

*Transit—The House of Gurney, Inc., does not give any warranty, express or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs or plants which it sends out, and will not be in any way held responsible for the crop.*

*Non-Warranty—The House of Gurney, Inc., does not give any warranty, express or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs or plants which it sends out, and will not be in any way held responsible for the crop.*

*Buy Fresh New Crop Garden Seed From Gurneys—They Grow and Satisfy*
**GURNEY’S BEANS—STRINGLESS, BRITTLE AND TENDER**

### WAX POD BEANS

**GURNEY’S EVERBEARING WAX RUST-PROOF BUSH BEAN**

(50 days to maturity.) The great campaign carried on by the government for the canning of vegetables applied especially to fresh beans, the wax and green podded beans in the pod. This campaign created a very heavy demand for beans suitable for canning purposes, and you will find this not only the very best for canning, but the best for using fresh as string or snap beans. Seed is red when fresh, with buff stripes. ½ pt., 15c; 1 lb., 30c; 5 lbs., $1.25; Postpaid. Not Prepaid. 10 lbs., $2.00; 30 lbs., $5.40; 60 lbs., $9.85.

**PENCIL POD BLACK WAX**

(50 days to maturity.) A most delicious rich dark yellow snap bean, being so tender and brittle that by taking it at either end and bending it, it will fly into several pieces. Abundant bearer. Practically rust-proof and even in the dry season past, made a good crop of delicious beans. Seed black when ripe. ½ pt., 12c; 1 lb., 25c; 5 lbs., $1.20; Postpaid. Not Prepaid. 10 lbs., $1.60; 30 lbs., $4.50; 60 lbs., $8.40.

**GURNEY’S EARLIEST BRITTLE WAX**

(40 days to maturity.) This remarkable early black eyed white bean, delicious in quality, stringless in all stages of its growth, combining with a good degree of rust proofness, makes it one of the most desirable for the garden, and it is of that degree of brittleness, that makes it easily desirable for cooking purposes, and it matures in its golden wax stage. ½ pt., 12c; 1 lb., 25c; 5 lbs., $1.20; Postpaid. Not Prepaid. 10 lbs., $1.60; 30 lbs., $4.50; 60 lbs., $8.40.

**GOLDEN WAX**

(40 days to maturity.) The Golden Wax is probably the earliest, and we believe the most generally planted and satisfactory of any of the old varieties. Pods are a bright wax yellow, of good length, entirely stringless, and of a fine buttery flavor. An excellent sort for canning or for the table. A very heavy bearer. The seed is white, mottled, red and purple. ½ pt., 12c; 1 lb., 25c; 5 lbs., $1.20; Postpaid. Not Prepaid. 10 lbs., $1.60; 30 lbs., $4.50; 60 lbs., $8.40.

### LIMA BEANS

**FORDHOO K BUSH LIMA**

(75 days to maturity.) The very best large seeded variety. The pods, which are produced in large clusters, are about 5 inches long, each containing four to five large beans of exceptionally fine quality, ½ pt., 15c; 1 lb., 30c; 5 lbs., $1.45; Postpaid. Not Prepaid. 10 lbs., $2.20; 30 lbs., $5.75; 60 lbs., $10.90.

**IMPROVED HENDERSON BUSH LIMA**

(70 days to maturity.) This is the very early Newa or Better Bean of the South. The pods are ready for use a week earlier than those of other Bush Limas and the plants are immensely productive. ½ pt., 12c; 1 lb., 25c; 5 lbs., $1.20; Postpaid. Not Prepaid. 10 lbs., $1.60; 30 lbs., $4.50; 60 lbs., $8.40.

### POLE OR CLIMBING BEANS

**KENTUCKY WONDER OR OLD HOMESTEAD**

(65 days to maturity.) This climbing variety is very vigorous and productive and bears its pods in large clusters. The pods are green, very long, often being nine or ten inches, nearly round, stringless and very crisp when young, and so fleshy that they are greater in width than breadth. ½ pt., 12c; 1 lb., 25c; 5 lbs., $1.20; Postpaid. Not Prepaid. 10 lbs., $1.70; 30 lbs., $4.80; 60 lbs., $8.90.

**CHINESE YARD LONG ASPARAGUS**

Pods are nearly up to name, reaching a length of 30 to 36 inches, usually 18 to 24 inches. Your friends will wonder and admire your plants and they are of excellent table quality, with a rich asparagus flavor. Do not be without this valuable curiosity. It is a pole bean of quick growth, with neat foliage, not attacked by insects. 1 oz., 10c; ½ pt., 15c; 1 lb., 50c.

**GREEN POD BEANS**

**BURPEE’S STRINGLESS GREEN POD**

(45 days)—A very desirable dwarf green podded bush bean long, round, dark green pods; always solid, stringless and exceedingly productive. The pods are 5 inches long, firm and tender, remaining fit for use many days after maturing. It is a handsome stiffly erect growth, very prolific and practically blight proof. ¼ pt., 10c; 1 lb., 25c; 5 lbs., $1.15; Postpaid. Not Prepaid. 10 lbs., $1.50; 30 lbs., $4.30; 60 lbs., $7.95.

**NEW TENDERGREEN**

An entirely new green podded bush bean, enormously prolific, entirely stringless, and bearing a profusion of finely flavored beans that are more tender than those of any other varieties. The pods of Tendergreen are long and round, a lovely dark green in color, absolutely free from strings and fibre, and are of the finest eating qualities. Plants are of strong upright dwarf growth. Tendergreen is a bean of real merit, combining productivity and hardiness with the highest quality, and we urge a generous planting. Splendid for canning. Matures in 50 days. ½ pt., 12c; 1 lb., 25c; 5 lbs., $1.20; Postpaid. Not Prepaid. 10 lbs., $1.60; 30 lbs., $4.50; 60 lbs., $8.40.

**SHELL BEANS**

**BURPEE’S STRINGLESS GREEN POD**

(50 days to maturity.) The great campaign carried on by the government for the canning of vegetables applied especially to fresh beans, the wax and green podded beans in the pod. This campaign created a very heavy demand for beans suitable for canning purposes, and you will find this not only the very best for canning, but the best for using fresh as string or snap beans. Seed is red when fresh, with buff stripes. ½ pt., 15c; 1 lb., 30c; 5 lbs., $1.25; Postpaid. Not Prepaid. 10 lbs., $2.00; 30 lbs., $5.40; 60 lbs., $9.85.

**FULL MEASURE**

Attractive, long, straight pods — (50 days.) This magnificent round podded bush bean bears long, round, dark green pods; always solid, stringless and exceedingly prolific. The pods are 5 inches long, firm and tender, remaining fit for use many days after maturing. It is a handsome stiffly erect growth, very prolific and practically blight proof. ¼ pt., 10c; 1 lb., 25c; 5 lbs., $1.15; Postpaid. Not Prepaid. 10 lbs., $1.50; 30 lbs., $4.30; 60 lbs., $7.95.

**NEW TENDERGREEN**

An entirely new green podded bush bean, enormously prolific, entirely stringless, and bearing a profusion of finely flavored beans that are more tender than those of any other variety. The pods of Tendergreen are long and round, a lovely dark green in color, absolutely free from strings and fibre, and are of the finest eating qualities. Plants are of strong upright dwarf growth. Tendergreen is a bean of real merit, combining productivity and hardiness with the highest quality, and we urge a generous planting. Splendid for canning. Matures in 50 days. ½ pt., 12c; 1 lb., 25c; 5 lbs., $1.20; Postpaid. Not Prepaid. 10 lbs., $1.60; 30 lbs., $4.50; 60 lbs., $8.40.

**SHELL BEANS**

**BURPEE’S STRINGLESS GREEN POD**

(50 days to maturity.) The great campaign carried on by the government for the canning of vegetables applied especially to fresh beans, the wax and green podded beans in the pod. This campaign created a very heavy demand for beans suitable for canning purposes, and you will find this not only the very best for canning, but the best for using fresh as string or snap beans. Seed is red when fresh, with buff stripes. ½ pt., 15c; 1 lb., 30c; 5 lbs., $1.25; Postpaid. Not Prepaid. 10 lbs., $2.00; 30 lbs., $5.50; 60 lbs., $10.25.

**GOLDEN CLUSTER WAX POLE**

(70 days). The flat pods are 7 to 8 inches long. Of a rich golden yellow, stringless and excellent in flavor. White-seeded. ½ pt., 15c; 1 lb., 25c; 5 lbs., $1.20; Postpaid. Not Prepaid. 10 lbs., $1.50; 30 lbs., $4.40; 60 lbs., $9.25.

**NAVY BEANS**

A great many people grow what they suppose to be the Navy Bean, but it is generally a mixed, uneven bean known as shell beans. Our Navy Beans are absolutely pure and hard picked 1 lb., 20c; 5 lbs., 95c; Postpaid. Not Prepaid. 10 lbs., $1.90; 30 lbs., $3.50; 60 lbs., $6.30; 100 lbs., $9.75.

To The House of Gurney, Inc.,

Gentlemen:

I wish to order my entire garden of garden seed soon. We have three seed catalogs, and you sell much the cheapest. Sometimes there is a difference of 20c to 30c, and a ¼ pound of garden seed.

Sincerely,

Mrs. Ed Nelson, Frazer, Montana

---

If in doubt, write us; we are glad to hear from you.
CULTURE: The best soil for beets is a deep sandy loam, although they are easily grown and will do well in most any soil. For early beets plant as early in the spring as the ground can be worked, sowing a little later for the main crop. Winter beets should be planted about the 15th of June. Plant the seed about 1 inch deep and in rows 18 inches apart. Thin the plants to 3 inches in the row. One ounce of seed will plant 50 feet; 6 pounds to the acre.

GURNEY'S AMERICAN GROWN BEETS AND MANGELS

BEETS AND MANGELS FOR WINTER FEED WILL MAKE BIG EGG AND CREAM CHECKS

GURNEY'S EARLY MODEL GLOBE

The Model Globe Beet is medium early, always even in size, color and shape. A number of newer varieties have been offered since we offered the Model Globe, but they have never equalled this beet in the trial grounds or in the field. One of the most satisfactory uses of the Model Globe Beet is for pickling purposes, using them when they are about 1 1/2 inches through. They retain their color and are of excellent quality. Pkt., 6¢; oz., 15¢; 1/2 lb., 25¢; 1 lb., 40¢; 1 lb., 70¢; 5 lbs., $3.25 Postpaid.

IMPROVED EGYPTIAN

We consider this the best first early beet of all the standard varieties. Best for forcing, best for first out door planting, roots very dark red, rounded on top, flat underneath. Small tops, which allow close planting. Pkt., 5¢; oz., 10¢; 1/4 lb., 20¢; 1/2 lb., 35¢; 1 lb., 60¢.

CROSBY'S EGYPTIAN

The tops are small. The roots are globe shaped and very smooth. The flesh of our strain is very early and very good both for bunching and stor¬ing. The roots of this plant are not edible. The cultivation is the same as that of beets. Pkt., 5¢; oz., 10¢; 1/4 lb., 20¢; 1/2 lb., 35¢; 1 lb., 65¢; 5 lbs., $1.95 Postpaid.

SUGAR BEETS AND MANGELS

For Winter Feed

The food value in root crops is high and everyone should plant a sufficient acreage so that the hogs and chickens could have a supply every day. It is not unusual to produce 25 tons of mangels to the acre. Plant a sufficient quantity so that the milk cows can get their share and you will increase the flow 25%.

SUGAR BEETS

WHITE KLEIN WANZLEBEN

This variety has proved to be a very valuable sort, in Colorado and other sections of this country, where it has been thoroughly tested. It has a bulbous, smooth, globe-shaped root, very rich in sugar, and grows deeply sunk in the ground and will yield under average conditions about sixteen tons to the acre, containing 12 to 13 percent of sugar. 1 oz., 7¢; 1/2 lb., 25¢; 1 lb., 45¢; 5 lbs., $1.95 Postpaid.

COTTON

Do you know you can raise cotton in the North? I don’t mean you should go into it on a commercial scale and compete with the Southern cotton grower. He has trouble enough without that—but why not raise a few plants for a novelty and to show your friends and neighbors? This plant is not only interesting but ornamental. Early maturing Cotton. Pkt., 7¢; 1 oz. 15¢.

CRESS

Cured or Pepper Grass—The leaves of this small salad plant are much frilled or curled, and are used for garnishing. It is also desirable with lettuce, to the flavor of which its warm, pungent taste makes a most agreeable addition. The plant is of rapid growth, about one foot high. Pkt., 5¢; oz., 10¢; 1/4 lb., 25¢; 1 lb., 65¢.

True Water Cress—This is a distinct variety of cress with small, oval leaves. It thrives best when its roots and stems are submerged in water. A fair growth may be obtained in soil which is kept wet but does best when grown along moist banks or in tubs in water-covered soil. It is one of the most delicious of small salads and should be planted wherever a suitable place can be found. Pkt., 7¢; 1/4 oz., 20¢; 1 oz., 35¢; 1 lb., $1.00.

GURNEY'S DAKOTA WONDER

A beautiful smooth, globe-shaped beet with small neck and tap root. A pedigreed stock—the result of many years of pure line breeding. The flesh is an intense dark red. You may pull a dozen or a hundred beets and there will be no variation in shape. Cut them and every one will be the same glowing dark red color. They are very early and very good both for bunching and winter use. Pkt., 5¢; oz., 15¢; 1/4 lb., 30¢; 1/2 lb., 50¢; 1 lb., 90¢; 5 lbs., $3.00 Postpaid.

DETOX DARK RED

A grand beet for bunching for market; tops are exceedingly small and uniformly upright; roots are perfect turnip shape, with small tap roots. The principal fault with most Turnip Beets is the occasional appearance of white rings, and this will be found has been overcome by careful selection of the deepest red beets. Quality is the very best; sweet and tender. Gardeners can safely plant it largely. Pkt., 5¢; oz., 10¢; 1/4 lb., 20¢; 1/2 lb., 35¢; 1 lb., 60¢; 5 lbs., $3.00 Postpaid.

SWISS CHARD FOR GREENS

For the leaves alone this variety is grown. This gathered young should be cooked as spinach, or later the midribs may be cooked and served the same as asparagus. The roots of this plant are not edible. The cultivation is the same as that of beets. Pkt., 5¢; oz., 10¢; 1/4 lb., 20¢; 1/2 lb., 35¢; 1 lb., 60¢; 5 lbs., $1.95 Postpaid.

MAMMOTH LONG RED

The roots are very large, uniformly straight and well formed. The flesh is white tinged with rose. This strain under careful culture is enormously productive. Our stock will produce the largest and finest roots which can be grown for feeding stock and is vastly superior to many strains offered. 1 oz., 7¢; 1/4 lb., 25¢; 1 lb., 45¢; 5 lbs., $1.95 Postpaid.

DANISH SLUDSTRUP

This most wonderful Mangel has been awarded a first class certificate several times by the Danish Government, which is the highest honor attained in Agricultural circles in Denmark. Sludstrup is a long reddish yellow root, but not so long as the Mammoth long red. It grows more above the ground and is very easily harvested. Under favorable conditions they frequently attain a weight of fifteen lbs. each. 1 oz., 7¢; 1/4 lb., 25¢; 1 lb., 45¢; 5 lbs., $1.95 Postpaid.

GIANT HALF SUGAR ROSE

As its name implies, this is a half sugar beet. Roots of much greater nutritive value than mangels. Yield nearly as large as the best of the mangels. Roots grow about one-half out of the ground, and are conveniently harvested. 1 oz., 7¢; 1/4 lb., 25¢; 1 lb., 45¢; 5 lbs., $1.95 Postpaid.

CHIVES (SCHNITTLAUCH)

Every vegetable grower should become acquainted with this plant. It is extremely hardy, being a perennial; will grow for years. The green leaves are highly prized for seasoning soups, salads and stews. The provident housewife always has a few clumps in the garden. The flavor resembles very much that of an onion. Pkt., 7¢; 1/4 oz., 20¢; oz., 35¢.

CITRON GREEN SEEDED

A productive melon with medium-sized, round fruits having very solid, white flesh. Used exclusively for preserving or pickling. The rind is dark green, distinctly striped with light green. Will keep in good condition for some time after picking. Pkt., 5¢; oz., 10¢; 1/4 lb., 25¢; 1 lb., 65¢.

GURNEY’S SWEET AND TENDER CARROTS

GURNEY’S PIE CARROT

We do not suppose you have ever made or eaten a carrot pie; very few people know that carrots are good for pie purposes and probably none of you have known that any particular variety or kind of carrot would make a better pie than another. Carrots for pie purposes are at least equal to pumpkins, and the pie resembles in flavor the pumpkin pie. It is much more delicious and on account of your being able to use them long before the pumpkins are ripe you have almost a continuous season of carrot pie, commencing with the carrots when they are about one inch in diameter, and using them until the old carrots are gone in the spring. Make the carrot pie just as you would pumpkin pie, and you will be surprised at the deliciousness of it. This particular carrot is better than any other variety for that purpose. Pkt., 6c; oz., 12c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

OXHEART

Guerande, or Oxheart. Tops small for the size of the roots which are comparatively short, but often reach a diameter of five inches, terminating abruptly in a small tap root. Flesh bright orange, fine grained and sweet. This variety is especially desirable for soil so hard and stiff that longer rooted sorts would not thrive in it. When young, excellent for table use, and when mature equally good for stock. Pkt., 3c; oz., 10c; ¼ lb., 25c; 1 lb., 75c; 5 lbs., $3.25 Postpaid.

CARROTS—A Health Food Good for the Kiddies

Your tractor will last longer with WNAX 100% Pure Pennsylvania Oil

GURNEY’S CORELESS CARROT

Just how true the slogan “eat carrots for your complexion” is I don’t know; however, I do know that Gurney’s New Coreless Carrot is a favorite with all those who have grown this wonderful new carrot.

This is bound to become one of the most popular of the table carrots. In quality it is unsurpassed. Color is a pure orange, flesh fine grained, and the core undefined. Most varieties of carrots have a well defined and tough core. The size is about 6½ to 7 inches long and 1½ inches thick; small size from top to bottom. The top is very small and has a slightly yellow crown. You will find this, I believe, the most desirable of the table carrots. Pkt., 8c; oz., 15c; ¼ lb., 30c; 1 lb., 90c; 5 lbs., $3.60 Postpaid.

DANVERS HALF LONG

There is no variety grown which will produce as much to the acre, with a minimum length of root, as this one. Under proper conditions of soil and cultivation it may reasonably be expected to produce (which it has done), 25 to 30 tons per acre. It is of medium length and heavy at the neck; color a rich orange. Pkt., 3c; oz., 10c; ¼ lb., 25c; 1 lb., 75c; 5 lbs., $3.25 Postpaid.

CULTURE: Sow the seed in drills anytime from early Spring to July. Cover seeds ½ to 1 inch deep, and press soil about seeds. Thin plants so they will be 2 to 6 inches apart. Make the rows 12 to 30 inches apart. Use 1 oz. to 200 ft.; 3 lbs. to the acre. Ready for use in 45 to 75 days.

An Acre of Carrots Fed to Poultry Means a Winter Income

WOOD LAKE, NEBR. May 7, 1936

Dear Sirs:

I am sending you my seed order. I have ordered seed from your house for many years, and like the seed better than any other. Last year, from one twenty-fifth of an acre we raised over fifty bushels of table carrots.

It is very uniform in size and color, consequently, a money-saver, as there are no culls to throw out. Pkt., 7c; oz., 15c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

Ouchtern Carrots Please Every One

Just how true the slogan “eat carrots for your complexion” is I don’t know; however, I do know that Gurney’s New Coreless Carrot is a favorite with all those who have grown this wonderful new carrot.

This is bound to become one of the most popular of the table carrots. In quality it is unsurpassed. Color is a pure orange, flesh fine grained, and the core undefined. Most varieties of carrots have a well defined and tough core. The size is about 6½ to 7 inches long and 1½ inches thick; small size from top to bottom. The top is very small and has a slightly yellow crown. You will find this, I believe, the most desirable of the table carrots. Pkt., 8c; oz., 15c; ¼ lb., 30c; 1 lb., 90c; 5 lbs., $3.60 Postpaid.

GURNEY’S GOLD LUMP

These extra early carrots should be pulled when they are about two inches through. They are nearly round and a bunch of carrots, each about the size and shape of a small apple, are very attractive.

This new carrot is of French origin, is the brightest golden color, and matures earlier than any other carrot grown. Market gardeners can safely discard all other early earlies and plant largely of this. It is very uniform in size and color, consequently, a money-saver, as there are no culls to throw out. Pkt., 7c; oz., 15c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

RED CORED EARLY CHANTENAY

We have discarded the ordinary early Chantenay and list only the red cored. This is a better carrot in every way, much smaller cored, and the bright orange flesh is fine grained, tender, and sweet.

It is medium early, maturing in about 60 days. This sort is very productive and easy to harvest. The root is smooth, deep orange-red, uniformly stumped but slightly tapered, and about 5½ inches long. This carrot is considered by the market gardeners as one of the very best for early use. Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 75c; 5 lbs., $3.25 Postpaid.

STOCK CARROTS

Mastodon—Giant white, best and largest stock carrot grown, nearly one-half its length will be above ground when mature, which makes it easy to harvest. Will produce as many tons of feed per acre as mangels or turnips. Your live-stock and poultry will leave any other feed for a meal of carrots. Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 65c; 5 lbs., $2.95 Postpaid.
A few years ago the best cabbage seed came from Denmark and Holland, where it had been raised for many years, but in the last few years the American cabbage seed growers in the Pacific Northwest, by improved methods, careful selection, breeding and extensive trials have made American cabbage seed famous the world over, supplying many of the markets formerly served by Denmark and Holland.

GURNEY'S EARLIEST CABBAGE

- EARLIEST OF ALL

This is a strictly new variety of Danish production, maturing medium sized, extra solid round heads and a larger percentage per hundred plants than any other variety, which makes it the most valuable for market gardeners and home consumption. Pkt., 5c; oz., 20c; 1/4 lb., 60c; 1 lb., $1.75.

- COPENHAGEN MARKET

The best Early round-headed sort on the market. The heads are very solid averaging about 8 pounds. It is short stemmed, the heads growing very close to the ground. Matures with Charleston Wakefield and gives a heavier crop per acre. Our stock of this is very fine. Pkt., 5c; oz., 20c; 1/4 lb., 60c; 1 lb., $1.65; 5 lbs., $6.90 Postpaid.

- GURNEY'S GOLDEN ACRE

This is a new, early, round-headed cabbage which closely resembles Copenhagen Market in type. As its name implies it is a money-maker. It is 8 to 10 days earlier than Copenhagen Market, but is smaller and can be planted closer. Because of earliness and fine quality it commands a higher price than any round-headed cabbage. Pkt., 7c; oz., 25c; 1/4 lb., 65c; 1 lb., $1.85.

- GURNEY'S EARLY BALLHEAD CABBAGE

In offering this new early summer Ballhead cabbage we know that we are presenting the cabbage-growing public with a winner and a money-maker. The heads are perfectly round, good size and mature especially as Wakefield. We recommend this sort especially to market gardeners and for the home garden, for both early and late. We feel sure it will take the place of nearly all of the summer varieties, producing a greater per cent of solid heads than any of them, and on account of the small amount of foliage and the compact form in which it grows, can be planted much closer than other varieties. Pkt., 7c; oz., 25c; 1/4 lb., 65c; 1 lb., $1.85; 5 lbs., $7.90 Postpaid.

DISEASE RESISTANT CABBAGE SEED

In many sections of the United States entire fields of Cabbage fail to mature or produce heads on account of Cabbage Yellows and other diseases. If, by any chance, your field or fields in your vicinity are affected with Cabbage disease you should plant Disease Resistant Cabbage Seed. The University of Wisconsin, by selection and breeding, has made it possible for us to offer you this Disease Resistant Seed.

- DANISH BALLHEAD

This strain of Danish Ballhead is larger than the regular strain, about one week later and with larger heads and a larger percentage per hundred plants than any other variety. It is the best winter keeper. Pkt., 7c; 1/4 oz., 15c; oz., 25c; 1/4 lb., 80c; 1 lb., $2.60; 5 lbs., $11.85 Postpaid.

- ALL SEASONS

We are offering the All Seasons Disease Resistant Cabbage was bred from the Copenhagen Market but differs from the latter in several respects. It is about 10 days later, considerably larger, and will outyield the Copenhagen Market at least one third. The heads are round and very solid; will stand shipment well. It is very highly resistant to Cabbage Yellows, and if you are in the Yellows infested area, you should plant this cabbage early. We have records of over 25 tons per acre, and every head solid and salable. Pkt., 8c; 1/4 oz., 15c; oz., 25c; 1/4 lb., 85c; 1 lb., $2.75; 5 lbs., $11.90 Postpaid.

- MARION MARKET

The Marion Market Yellows Resistant Cabbage was bred from the Copenhagen Market but differs from the latter in several respects. It is very highly resistant to Cabbage Yellows, and if you are in the Yellows infested area, you should plant this cabbage early. We have records of over 25 tons per acre, and every head solid and salable. Pkt., 8c; 1/4 oz., 15c; oz., 25c; 1/4 lb., 85c; 1 lb., $2.75; 5 lbs., $11.90 Postpaid.

- LATE CABBAGE

- DANISH BALLHEAD Short Stemmed

One of the best varieties for general garden use, has been selected for more than fifty years by the Danish gardeners, who grow it almost exclusively for Winter Cabbage and annually export large quantities. The heads are not as large as the late Dutch Plants, but harder and more solid, fine grained and good keepers. Pkt., 5c; oz., 15c; 1/4 lb., 65c; 1 lb., $1.60; 5 lbs., $6.90 Postpaid.

- PREMIUM LATE FLAT DUTCH

As a variety for winter market it has no superior. Heads large, bluish green, round, solid, broad and flat on top, they open white and crisp, are tender and well flavored. It is a fall and winter variety, and one of the very best to keep. Pkt., 5c; oz., 25c; 1/4 lb., 90c; 1 lb., $1.55; 5 lbs., $6.60 Postpaid.

- MAMMOTH ROCK RED

This is by far the best, largest and surest heading red cabbage ever introduced. The plant is large, with numerous spreading leaves. The head is large, round, very solid and deep red color. Pkt., 7c; oz., 25c; 1/4 lb., 80c; 1 lb., $2.40.

EARLY CABBAGE

- EARLIEST CABBAGE

A very good variety for second early use. Makes good sized flat heads and is very tender and of fine grain. Has few outside leaves. Pkt., 5c; oz., 20c; 1/4 lb., 55c; 1 lb., $1.60.

- IMPROVED PEKIN

Resembles both celery and cos lettuce. The heads are tall and cylindrical, usually being 18 inches in height, but often reaching two feet. It is a sure heading type, and the flavor is very fine. It is a far better storage variety than Wong Bok. Pkt., 5c; oz., 15c; 1/4 lb., 40c; 1 lb., $1.20.

- CHIHILI

Early and very sure heading. Head becomes 18 to 20 inches tall, 3 1/2 to 4 inches thick, tapered near tip, very firm, well blanched, crisp, tender, and sweet. Pkt., 7c; oz., 20c; 1/4 lb., 50c; 1 lb., $1.40.

CHINESE CABBAGE

- IMPROVED PEKIN

Resembles both celery and cos lettuce. The heads are tall and cylindrical, usually being 18 inches in height, but often reaching two feet. It is a sure heading type, and the flavor is very fine. It is a far better storage variety than Wong Bok. Pkt., 5c; oz., 15c; 1/4 lb., 40c; 1 lb., $1.20.

- CHIHILI

Early and very sure heading. Head becomes 18 to 20 inches tall, 3 1/2 to 4 inches thick, tapered near tip, very firm, well blanched, crisp, tender, and sweet. Pkt., 7c; oz., 20c; 1/4 lb., 50c; 1 lb., $1.40.
I have learned to like cucumbers in about every way they can be prepared; the early ones sliced and then the delicious pickles made in various ways. I have only succeeded in my desire to like them in the last two or three years and I do not know of a more beautiful sight than a large field of cucumber vines covering the ground with their thousands of yellow flowers and then the picking of the little ones 2 to 2½ inches long for pickling; then the larger, rapid growing ones, cool and crisp, for slicing; then the large yellow ones for the sweet pickles; then in the seed fields the literally millions of full grown fruit and the same size, yellow-bronze in color and when you look at them you know that anyone can grow a cucumber and—like myself—learn to like them.

Plant cucumber seed 10 or 15 to the hill after danger of frost is past. Thin out later when danger of bugs is past. For the big crop of pickles, plant from June 1st to the middle of July.

Gurney's New Longfellow

- STRAIGHT 8
All American Winner for 1935
See colored picture inside front cover.
This wonderful, new dark green shipping and pickling cucumber is the best new cucumber introduced for many years. Grows about 8 inches long and 1¼ inches through, perfectly straight, dark green from end to end. A bushel of Straight 8 cucumbers will attract attention and find ready sale when other cucumbers are unsalable.

The strong, vigorous vines bear continuously until killed by frost. Pkt., 8c; oz., 15c; ½ lb., 45c; 1 lb., $1.20; 5 lbs., $5.25; Postpaid.

- GURNEY'S NEW EVERBEARING
Very early, enormously productive, literally covering the ground with its fruit the entire season until killed by frost, making it the most prolific variety in existence. Fruit is medium size and rich, dark green in color, shape long, excellent for pickling or slicing.

Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 75c; 5 lbs., $3.50. Postpaid.

BLACK DIAMOND
It Stays Green. The best early cucumber for shipping. This excellent cucumber is adapted to all sections and all soils. Whether used for pickling when small or for slicing when fully grown, it is a valuable variety for the home garden, for local markets, and for distant shipping. The fruits grow 7 to 8 inches long, are cylindrical in shape, perfectly smooth, and of handsome appearance. Their even dark green color, extending from one end of the fruit to the other, will sell them on sight. Firm, white, crisp flesh.

Pkt., 5c; 1 oz., 12c; ½ lb., 36c; 1 lb., 85c; 5 lbs., $3.85 Postpaid.

Gurney's New Everbearing cucumbers from you last year and I never had such fine pickles. They bore all year until the frost killed them.

Yours truly,
Mrs. Cora B. Felix

Tipton, Iowa

The House of Gurney, Inc.,
Yankton, S. Dak.

Gentlemen:
I bought Gurney's New Everbearing cucumbers from you last year and I never had such fine pickles. They bore all year until the frost killed them.

Yours truly,
Mrs. Cora B. Felix

Cucumbers Can Be Planted Until the Middle of July
SWEET CORN — Delicious Roasting Ears for Two Months

1 Pound for 250 Hills, 13 Pounds per Acre—Sweet Corn Should Not Be Planted More Than 1 1/2 Inches Deep

Most of us make a single planting of sweet corn; consequently, we get sweet corn only a part of the year. You can spread this season over two months by planting different varieties at the same time maturing at different seasons; or by planting same varieties if you have a choice, a week or ten days between each planting. In the little town garden, a short row or maybe two or three dozen hills planted as early as possible, then two weeks later another row between potato rows and continue this for several plantings. You will be surprised at the increased value of this little garden. On the farm, plant a good acreage, enough to supply the house every day and a sufficient quantity for canning and drying.

- GOLDEN SUNSHINE SWEET CORN

An outstanding new variety of yellow corn, of exceptional merit. It was originated at the North Dakota Agricultural College. The ears are broader than those of Golden Bantam, are 16 rowed, and of deliciously rich flavor, light yellow in color. Sunshine is ready for use 6 to 10 days earlier than Bantam. The stalks are quite dwarf, the ears set only 2 1/2 to 3 feet from the ground, usually 2 ears to the stalk. Those who have tried it are highly enthusiastic, and say it is real sweet corn.

It is the sweetest and the nicest corn I know of; good yields, an exceptionally good corn for the market gardener. Prices: 1/3 pt., 12c; 1 lb., 25c; 5 lbs., $1.20 Postpaid. Not Prepaid 10 lbs., $1.99; 25 lbs., $4.50; 50 lbs., $8.50; 100 lbs., $16.50.

- GOLDEN BANTAM

Fifty per cent of the sweet corn planted in the United States is of the Golden Bantam variety. On account of the hardiness of this variety it allows early planting consequently it reaches the roasting stage very early. You can sow this as early as any variety of field corn. The stalks grow only about 4 to 5 feet high and bear generally two good ears to the stalk. When ready for use the kernels are rich golden yellow color—a mighty satisfying sweet corn. Prices: 1/3 pt., 12c; 1 lb., 25c; 5 lbs., $1.20 Postpaid. Not Prepaid 10 lbs., $1.99; 25 lbs., $4.50; 50 lbs., $8.50; 100 lbs., $16.50.

- GOLDEN GEM SWEET CORN

After having produced Golden Sunshine Corn, a remarkable early yellow sweet corn, Prof. A. F. Yeager, Horticulturist at the North Dakota Agricultural College Experiment Station, has bred Golden Gem Sweet Corn, which is days earlier than that famous variety.

The ears are of good size, averaging 7 to 8 inches in length, and are borne close to the ground on stalks about 3 1/2 feet high. From one to three ears are produced on each stalk. Golden Gem is eight rowed; kernels are quite deep, broad, meaty, rich golden yellow, very tender and of the sweetest and most sugary flavor imaginable. The greatest feature, however, is its extreme earliness! With Golden Gem, market gardeners may secure even better prices and home gardeners may have absolutely the very earliest corn. Prices: 1/3 pt., 12c; 1 lb., 25c; 5 lbs., $1.40 Postpaid. Not Prepaid 10 lbs., $2.00; 25 lbs., $4.70; 50 lbs., $8.90; 100 lbs., $17.50.

- COUNTRY GENTLEMAN

This variety has a small, white cob, densely covered with irregular rows of very long slender, white grains of excellent quality. The ears are seven to nine inches long. The stalks are from six and one-half to seven feet high. It is well adapted for canning as well as the home garden and market, and many consider it as the best of the late varieties. Prices: 1/3 pt., 12c; 1 lb., 25c; 5 lbs., $1.20 Postpaid. Not Prepaid 10 lbs., $2.00; 25 lbs., $4.70; 50 lbs., $8.85; 100 lbs., $17.25.

- STOWELL'S EVERGREEN

Standard late variety, very valuable for canning and much grown for market. Plants 7 to 8 feet tall. Ears 8 to 10 inches long; 2 1/2 to 3 inches thick; 14 to 20 rowed. Kernels very deep, white, sweet, and tender; remain in table condition a long time. Prices: 1/3 pt., 12c; 1 lb., 25c; 5 lbs., $1.20 Postpaid. Not Prepaid 10 lbs., $2.05; 25 lbs., $4.80; 50 lbs., $9.10; 100 lbs., $17.75.

- 60-DAY WHITE

Among the many early extra sweet corns recently introduced, this stands out because of its extreme earliness, large ear and good quality. With our market gardeners who have tried it, "60-Day White" has been highly profitable. Height: 5 feet, ears 10 to 12-rowed, 6 to 7 inches in length. Prices: 1/3 pt., 12c; 1 lb., 25c; 5 lbs., $1.30 Postpaid. Not Prepaid 10 lbs., $1.95; 25 lbs., $4.60; 50 lbs., $8.65; 100 lbs., $16.50.

- GOLDEN CREAM SWEET CORN

Sometimes called Golden Country Gentleman. A cross of Country Gentleman and Golden Bantam, taking on the character of the former variety, except in color, and combining the delicious qualities of both. The seven-foot stalks produce two or three medium large ears. The yellow shoepeg type kernels are set on the ears in the Country Gentleman style. One of the best yielders and very good quality. 1/3 pt., 12c; 1 lb., 25c; 5 lbs., $1.40 Postpaid. Not Prepaid 10 lbs., $2.15; 25 lbs., $5.15; 50 lbs., $9.80; 100 lbs., $19.25.

Lakefield, Minn. April 25, 1936

The House of Gurney, Gentlemen:
I am again ordering some Longfellow Cucumber seed. I will never plant any other kind. They are the very best for pickles. They never get soft when canned.

Yours truly,
Mrs. W. R. Cook, Lakefield, Minn.
CAULIFLOWER

**ONE OF THE MOST PROFITABLE Crops for Market Gardeners**

Cauliflower culture is practically the same as that of cabbage. One ounce of seed will produce about 4,000 plants. Our pedigreed cauliflower seed is the best you can buy anywhere.

**GURNEY’S EARLIEST MARKET**

Cauliflower may be grown anywhere, and Gurney’s Early Market Cauliflower is the easiest to grow. This wonderful new large-headed, heavy-leaved Cauliflower was offered by us in 1910 for the first time, and we wish to say to all lovers of this delicious vegetable that you can grow these as easily as you can grow cabbage. It is desirable for market gardeners on account of earliness and clear white color. Pkt., 12c; ½ oz., 70c; 1 oz., $1.29; ¼ lb., $4.25.

**EARLY SNOWBALL**

This is a popular extra early strain of dwarf, compact growth. Under favorable circumstances nearly every plant will make a fine solid head of good size. It is valuable for both early and late. Pkt., 10c; ½ oz., 60c; oz., $1.00; ¼ lb., $3.50; 1 lb., $11.75.

**GURNEY’S EARLY FAVORITE**

The best sort for inexperienced growers, as it will head when conditions are unfavorable. It may be used either for an early or a late crop and is ready in about 110 days. It forms large, firm, fine-grained heads, very white in color. Pkt., 7c; ½ oz., 46c; 1 oz., 75c; ¼ lb., $2.35.

**HERBS ARE EASY TO GROW**

No garden is complete without a few herbs for culinary or medicinal purposes. Harvest them carefully on a dry day, before they come into full bloom.

- **Anise**—Cultivated principally for garnishing. Pkt., 5c; oz., 15c.
- **Caraway**—Cultivated for the seed which is used in confectionery and medicine. Pkt., 5c; oz., 15c.
- **Catnip**—Pkt., 10c; ½ oz., 25c.
- **Dill**—The leaves are used in soups and pickles. Pkt., 5c; oz., 15c; ¼ lb., 25c; 1 lb., 65c.
- **Horehound**—Principally used for medicinal purposes. Pkt., 5c; ½ oz., 40c.
- **Lavender**—A popular aromatic herb. Pkt., 10c; ½ oz., 30c.
- **Marjoram, Sweet**—For seasoning. Pkt., 5c; ½ oz., 15c.
- **Sage**—The leaves and tender tops are used in stuffing and sauces. Pkt., 5c; ½ oz., 15c; oz., 25c.
- **Savory, Summer**—Used for seasoning. Pkt., 5c; oz., 15c.
- **Thyme, Broad-Leaved**—For seasoning, etc. Pkt., 5c; ½ oz., 20c.
- **Wormwood**—It is beneficial to poultry and should be planted in poultry grounds. Pkt., 5c; ½ oz., 15c.

**EGG PLANT**

1 Ounce for 1000 Plants

Sow in hotbeds very early in the spring and transplant to 2 or 3 feet apart, in very rich, warm ground. Hoe often and hill up gradually until they blossom.

- **New Improved New York Purple**—The best variety in cultivation, being early, a sure cropper and of fine quality. The fruit is large, oval, very deep purple. Pkt., 7c; ½ oz., 20c; oz., 35c; ¼ lb., 90c; 1 lb., $2.85.

**CELERIAC**

A variety of celery having turnip-shaped roots, which, when cooked and sliced in vinegar, make a most excellent salad, also used for flavoring soups.

**Giant Smooth Prague**—Is the largest and best variety grown. Pkt., 5c; oz., 20c; ¼ lb., 60c.
GURNEY’S CHOICE WATERMELONS

DELICIOUS WATERMELONS
BY AUGUST 1st
Early Red Heart
Earliest and Sweetest
Round Light Icing
Fordhook Early
Sugar Swika

• EARLIEST AND SWEETEST
The average weight of this melon would probably be from 12 to 15 lbs., flesh scarlet, very fine grained, and the flavor is delicious. The seeds are white. Vines producing wonderful crops, often producing eight to twelve melons to the vine. We wish to say to our Northern customers that this Earliest and Sweetest melon is the one they should plant. There is but little use in planting the large late varieties in your locality. They are only a disappointment, nearly ripe when the frost comes. You will always get under the wire with the Earliest and the Sweetest.
Pkt., 6c; oz., 15c; ¼ lb., 30c; 1 lb., 85c; 5 lbs., $3.50. Postpaid.

GURNEY’S MASTODON RADIO WATERMELON

Watermelons are liked by everyone, and the kids especially like to go out and crawl into someone’s corn field hoping that they will find a watermelon patch. Gurney’s Mastodon Radio Watermelon will produce more melons than any other variety; it also produces the largest melons; the flavor cannot be beat, and you will never find the hard core as in so many of the melons. It is not unusual to produce melons of this variety weighing ninety pounds. They have been known to exceed one hundred pounds. Its bright red flesh is of delicious flavor and the quality that calls for more. The glossy dark green skin and tough rind makes this one of the most attractive shipping melons on the market.
Pkt., 7c; oz., 12c; ¼ lb., 25c; 1 lb., 85c; 5 lbs., $3.50; Postpaid.

RED SEEDED HUTCHINSON—ONE OF THE BEST

This is the best of the new watermelons developed in the last few years. Large, nearly round, light green with dark green stripes. A load of them can easily be realized from an acre of melons. This selection of varieties will do it. Make this the most profitable acre on your farm.

Can easily be realized from an acre of melons. This selection of varieties will do it. Make this the most profitable acre on your farm.

Yankton, S. D., has the best equipped State Hospital, takes better care of its patients, and cures more than any other in the United States. It is equipped with theatre, dance hall, ball ground, tennis court. You wonder what this has to do with winter watermelons. I am just coming to that. I have been on the grounds of the Hospital for the Insane at Yankton a number of times, and it was not unusual to see hundreds of the patients on these beautiful grounds, each patient, if they wanted it, eating watermelon. Their garden covers about thirty acres, and they had thousands of the winter watermelons. It is not only good at time of maturity but can be harvested and kept well up to Christmas time. It is medium-sized, almost clear white rind, the brightest red flesh and small black seeds, very firm and very tough rind. These should be harvested when ripe, not overripe, placed in a cool dry cellar; or place them in the open in straw, seeing that the melons do not touch each other and covering all of them with sufficient straw to keep from freezing. Take them out as wanted.
Pkt., 5c; oz., 15c; ¼ lb., 30c; 1 lb., 85c; 5 lbs., $3.75 Postpaid.

Now that the picture is taken—Can we eat the melon?
GURNEY'S WATERMELONS

GOLDEN HONEY SWEET
The most desirable yellow fleshed melon, and for home use the best of all melons. Very thin rind, golden yellow flesh, so remarkably sweet and tender that they will be chosen above all other melons for home, not shipping purposes.
Pkt., 7¢; oz., 15¢; ½ lb., 30¢; ½ lb., 50¢; 1 lb., 85¢.

KLECKLEY SWEET
Vines are strong-growing, producing uniformly large-sized melons. The fruits are oblong. The skin is dark green. Flesh is bright scarlet and ripens to within one-half inch of the rind. The quality is very rich and sweet, hence its name. For the home market or family garden it is decidedly one of the best.
Pkt., 5¢; oz., 10¢; ¼ lb., 20¢; 1 lb., 75¢; 5 lbs., $3.00 Postpaid.

WILT RESISTANT WATERMELON
PRIDE OF MUSCATINE
This is an improved strain of Kleckley's Sweet, developed by the Iowa Agricultural College at Ames. It is bred to resist melon wilt and is the only melon that can be raised in many parts of Iowa, Wisconsin and Illinois where wilt is prevalent.

CULTURE: The hills should be 8 ft. apart each way, with some well rotted manure in each hill. Plant the seed as soon as the weather is warm. An ounce will plant about 30 hills; 3 or 4 pounds of seed to the acre. Allow two or three plants to remain in each hill. Ready to use in 70 to 100 days.

ELY SWEET
This is an improved strain of Kleckley's Sweet, as it has a thinner rind.
Pkt., 5¢; oz., 15¢; ¼ lb., 25¢; ½ lb., 50¢; 1 lb., 85¢; 5 lbs., $3.75 Postpaid.

GURNEY'S SCARLET WONDER
Did you ever see a scarlet watermelon, not just red, but a bright flaming scarlet. Gurney's new scarlet wonder is what melon growers have long wanted but have never been able to find. The black seeds and dark green rind contrasting sharply with the bright scarlet flesh make sales for this melon when other varieties are a drug on the market. Appearance sells the first melons. The high quality takes care of reduced sales for there is no better quality melon grown. Medium size, early, thin, tough rind—a good shipping melon as well as a melon for the home garden.
Pkt., 5¢; oz., 15¢; ½ lb., 25¢; 1 lb., 80¢; 5 lbs., $3.50 Postpaid.

ROUND LIGHT Icing
Fruit medium sized, nearly round, greenish white, slightly veined or dotted with light green. The flesh is light red, sweet and crisp, seed white. A very early melon producing remarkable crops. Late in May in the spring of 1921, we had a telephone order from one of our customers for more than 100 pounds of this seed. I advised that it was too late to plant any watermelon, but he insisted on planting and I recommended some earlier varieties; but he still insisted on Round Light Icing, and he marketed from that field dozens of carloads about as early as the earliest varieties, and received top prices for them.
Pkt., 5¢; oz., 10¢; ¼ lb., 20¢; ½ lb., 35¢; 1 lb., 65¢; 5 lbs., $3.00 Postpaid.

FORDHOOK EARLY
Without a rival. This is the earliest large-fruited melon in cultivation. These fruits are of good size, rather short and blocky in form, with large diameter; skin dark green, occasionally with faint stripes of lighter green; flesh bright red, crisp, sweet, and of splendid quality; rind quite thin, but skin tough; makes a fair shipping variety.
Pkt., 5¢; oz., 10¢; ¼ lb., 20¢; 1 lb., 75¢; 5 lbs., $3.00 Postpaid.

Gurney's Farthest North
Rocky Ford

Dear Sirs:

I have been perfectly satisfied with all seed purchased of you. They have never failed to grow.

Yours truly,

Mrs. A. B. Erickson

Elgin, Iowa

An All-American Winner

GURNEY'S SWEET AND SPICY MUSKMELONS

For the HOME MARKET
Golden Champlain—Earliest
Benders Surprise
Milwaukee Market
Sugar Rock

MUSKMELON NEW IMPERIAL CANTALOUPE

An all-American winner. This is the only cantaloupe that can be allowed to ripen on the vine and still be of high grade quality. Other cantaloupes must be picked from three days to a week before they are ripe and will never have the quality of the vine ripened fruit. The grower who has the New Imperial Cantaloupe can let his fruit ripen on the vine, ship it long distances, have it arrive at the market in perfect condition, and the quality will be better than any other melon. This is a heavily netted, round melon; small seed cavity; bright yellow flesh. One of the most attractive melons ever put on the market. Market gardeners can safely discard all others and raise only the New Imperial.
Pkt., 7¢; 1 oz., 15¢; ¼ lb., 35¢; ½ lb., 60¢; 1 lb., $1.05; 5 lbs., $4.55 Postpaid.

GURNEY'S GOLDEN ICE CREAM

This is the second year we have listed this wonderful new golden fleshed muskmelon. We named it Ice Cream because the seed cavity is so small an ordinary dipper of ice cream completely fills it. An early melon—ripen in from 80 to 85 days. Fruits are 6 to 7 inches in diameter and almost round. Heavily netted, a good shipper, crisp, color when ripe. The Golden Ice Cream will outsell any melon on the market because of its fine appearance, thick yellow flesh, and delicious flavor.
Pkt., 7¢; oz., 15¢; ¼ lb., 35¢; ½ lb., 60¢; 1 lb., $1.05; 5 lbs., $4.55. Postpaid.

CULTURE: The hills should be 8 ft. apart each way, with some well rotted manure in each hill. Plant the seed as soon as the weather is warm. An ounce will plant about 30 hills; 3 or 4 pounds of seed to the acre. Allow two or three plants to remain in each hill. Ready to use in 70 to 100 days.

Plant Muskmelons, they will stand the dry weather.
**Gurney's Muskmelons**

$300.00 income from one acre of melons is not unusual

---

**Health Value of Muskamelon**

Calories per lb. 185; Vitamins A, B, C; Proteins .5%; Carbohydrates 9.5%; Iron .00039%

---

**CULTURE:** Muskemelons like a warm, rich soil. Plant in the open ground as soon as the weather is warm. Plant seed in hills 4 to 6 feet apart or in a row. After the danger of insects is over, thin to 3 plants to a hill. Muskemelons can be started in paper pots and transplanted to the open field. In this way you gain 2 to 3 weeks in earliness.

---

**HEARTS OF GOLD MUSKEMELON**

On this page we show the best of varieties for the market gardener. Hearts of Gold muskemelon is the hardest, the highest yielding, and the best quality melon that can be grown in this Northern territory. It is an excellent shipper and a good keeper, and we recommend it especially to the market gardeners as it is exceptionally early. Pkt., 5c; oz., 12c; ½ lb., 30c; ½ lb., 90c; 5 lbs., $3.90. Postpaid.

---

**WEAVER'S SPECIAL**

This delicious, new yellow sweet muskemelon is one of the finest introduced in recent years. Flesh very thick and spicy, having much the same flavor as Honey Dew, which is one of its parents. The light green skin is very hard and well netted making it a good shipper. This melon can be thoroughly ripened on the vine and will still stand long distance shipping. The melons are perfectly round and weigh about 5 to 7 pounds each. One of our Yankton Market Gardeners planted one-half acre of Weavers Special this year and he is so well pleased with them that next year he is going to plant ten acres. Pkt., 5c; oz., 12c; ½ lb., 30c; 1 lb., 90c; 5 lbs., $3.90. Postpaid.

---

**MILWAUKEE MARKET**

Brother Don planted about an acre of Milwaukee Market one year. Not because he wanted to, but on account of the dry weather he had a big field of Strawberries and had to fill in with something else.

It was a fortunate proposition, as Milwaukee Market proved to be the earliest, good sized, high quality, thick yellow sweet muskemelon that appeared on the market, and he realized a good price for them. His finest crop was the immense crop at from 15c to 25c per melon.

The ribs are fairly prominent, and the netting heavy. A light green or cream color. I believe it will produce as many melons to the acre as any melon you can plant, and when it comes to quality—Oh Boy!

Pkt., 5c; oz., 10c; ½ lb., 25c; 1 lb., 80c; 5 lbs., $3.80. Postpaid.

---

**HONEY DEW MUSKEMELON**

This large, round, delicious muskemelon is raising to the north of Yankton, seed should be started in pots and transplanted to the field after danger of frost. Honey Dew melons sell at an extremely high price, retailing often at from 25c to 75c each. The Honey Dew is in a class by itself, being different from any other. The skin is very thick and firm, emerald green in color, spicy, and of a flavor that you do not get in any other melon. Melons 7 to 10 inches in diameter, nearly round, and weigh from 8 to 12 pounds.

Green Fleshe Honey Dew—Pkt., 7c; oz., 15c; ½ lb., 35c; 1 lb. $1.00.

---

**GOLDEN CHAMPLAIN**

This melon is so early that it can be grown much farther north than any other variety yet introduced. The nature of this melon is that it throws lateral and blossoms below the main stems are six inches long, and real fruit sets on these laterals and develops rapidly. You will find from eight to fifteen large melons in a bunch right around the hill where the seeds were planted, making easy and inexpensive handling when ripening. The first setting of melons on account of starting at the same time, mature at the same time, giving a large crop and the early money getter. The vines are exceptionally strong and hardy. Quality of fruit excellent, flesh golden yellow. Outside skin green, netted, and firm. Size from 2½ to 3½ lbs. Three years out of four we have picked ripe melons fifty-seven days after planting seeds.

This melon is successfully grown in the Lake Champlain district in high altitude, hence its name, Golden Champlain.

Pkt., 7c; oz., 12c; ½ lb., 30c; ½ lb., 50c; 1 lb., 90c; 5 lbs., $3.90. Postpaid.

---

**ROCKY FORD**

This variety is an improvement on the Netted Gem, and is largely grown in Colorado and shipped by the railroad to the eastern cities. It is much sought after by hotel and restaurant keepers on account of its size and exceptionally fine flavor. Flesh is greenish white in color, very juicy and rich and good clear to the rind. It is medium in size, nearly round and a most excellent shipper.

Pkt., 5c; oz., 10c; ½ lb., 25c; 1 lb., 80c; 5 lbs., $3.50. Postpaid.

---

**BENDERS SURPRISE**

Folks here's a real melon, one that I feel like recommending to everyone. A special strain of selected seed will be used for every order. It is a melon that is excellent for shipping and a damper better at local markets, but best of all it's one that you will like better than any other because of its excellent flavor. Melons are round to oval in shape, ribbed and covered with coarse netting. Their flesh is exceptionally thick, and the melons rarely crack. The ripe melons have a golden tint giving the fruit a very attractive appearance. They are quite large, many weighing over ten pounds. Because the flesh is so thick and firm they remain in good condition much longer than other melons of this class, and remember that this is very important if you are going to ship. Package, 5c; oz., 10c; ½ lb., 25c; ½ lb., 50c; 1 lb., $1.00; 5 lbs., $1.10. Postpaid.

---

**GURNEY'S FARTHEST NORTH**

This melon originated in the Imperial Valley in California and is one of the best long-distance shipping melons we have, but on account of its extreme earliness—in 68 days from the planting of the seed—it can be grown farther north than any other muskemelon. Salmon, flesh of exceptional thickness about 8x4 inches with heavy nettings fairly prominent ribs. Its chief value is its extreme earliness ability to stand long distance shipping and its good quality. Pkt., 7c; oz., 15c; ½ lb., 30c; ½ lb., 50c; 1 lb., $1.00; 5 lbs., $4.10. Postpaid.

---

**SUGAR ROCK OR HONEY ROCK**

This is a new and unusually fine melon. Sweet as sugar and solid as a rock. It has four main points of superiority: quality, productiveness, ability to stand shipping and appearance. Its flavor and quality are the finest we have ever seen, the flesh being a very deep salmon color right out to the very rind. Under good growing conditions it is a very heavy yielder, often producing five to seven perfect melons on one vine. Its rind is unusually thick, making it a good shipper. This wonderful, new melon is as early as the Rocky Ford and one-third larger—making it suitable for either market or garden. Pkt., 5c; oz., 10c; ½ lb., 25c; ½ lb., 45c; 1 lb., 80c; 5 lbs., $3.50. Postpaid.

---

The House of Gurney, Inc.

Delt, Minn.

Dear Sirs:

We ordered all of our garden seed from you last spring and it proved to be so good that we are ordering again this year.

We saved the seed as usual, thinking that only half of them would come, but when the seeds came up we found that the plants were too close together and that practically all of the seeds had grown.

Yours truly,

Mrs. Abram Lepp

---

**15**
GURNEY’S CRISP AND TENDER LETTUCE

Lettuce from your own garden should be and can be served at least once a day during the summer months. Do not make just one planting but plant every three weeks so as to have a continuous supply of this delicious salad plant. Eat more lettuce, it is rich in all the vitamins and contains iron.

- **BLACK SEEDED SIMPSON**
  A favorite forcing variety; it does not head, but forms a compact mass of leaves, lighter colored than any other leaf lettuce, stands the summer heat well, and is very large, making immense plants over a foot across.

  Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 50c; 5 lbs., $1.25. Postpaid.

- **CHICKEN LETTUCE**
  Your poultry needs “green” food and this variety of lettuce is just the thing you will want to grow for this purpose. It is a genuine lettuce which will yield as much or more chicken or rabbit feed than any plant you may have used for “greens.” When once cut it starts to grow again and makes a successive crop.

  Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 50c.

- **NEW YORK WONDERFUL**
  This is the head lettuce grown in thousands of acres around Los Angeles, Calif., in Idaho and other places, and shipped in carload lots all over the world. It is the standard head lettuce and best of any except Gurney’s Stonehead Riviera.

  Pkt., 5c; oz., 15c; ¼ lb., 45c; 1 lb., $1.25; 5 lbs., $5.50. Postpaid.

- **GURNEY’S CRISP AS ICE**
  Very large, extremely crisp, hardy, and extra long standing.

  Is of more pleasing appearance and retains its crispness and mild flavor to a greater degree during the hot summer months than any other crisp-head variety. While especially adapted for midsummer, it is most desirable also for spring and fall weather.

  The plants are of quick, strong growth, attaining a diameter of twelve inches with good cultivation. The leaves are of a soft bright green, growing closely around the head. The heads are tightly folded, six to eight inches in diameter, bleached to a silvery white and nearly as crisp and brittle as celery.

  Pkt., 6c; oz., 12c; ¼ lb., 50c; 1 lb., 95c.

- **GURNEY’S STONEHEAD RIVIERA—**
  The Best Head Lettuce

  All of us like head lettuce, and our idea of a good head lettuce is the one that has the hardest head, one that is compact; one that will stand the hot dry weather that we have during the summer. Gurney’s Stonehead Riviera Lettuce is without doubt the best variety of head lettuce that can be grown in this northwest territory.

  Hardest head, longest fit for use, heads solid, interior leaves blanching to a cream white. No equal for late planting or places that are hot and dry. Packet, 10c; oz., 20c; ¼ lb., 50c; 1 lb., $1.40; 5 lbs., $6.00. Postpaid.

- **GURNEY’S TOM THUMB**
  This variety is exceptionally good for the home garden. Seed may be planted in the hot bed and transplanted to the open, just as early as possible in the spring, and on account of its extremely hard, crisp heads and small size of the plant, it may be planted about ten inches apart in the row. Plant this so it will mature before extremely hot weather.

  Pkt., 5c; 1 oz., 10c; ¼ lb., 30c; 1 lb., 90c; 5 lbs., $4.00. Postpaid.

- **IMPROVED HANSON**
  A very fine heading variety of large size. The heads are very solid, sweet, tender and crisp throughout and entirely free from any bitter taste. A standard Summer Head Lettuce, very slow to run to seed.

  Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 80c; 5 lbs., $3.50. Postpaid.

- **GRAND RAPIDS—**
  The Best Leaf Lettuce

  This is beyond question the most popular of all forcing lettuce. On account of its upright habit of growth it can be grown much closer than the other sorts, and it is less liable to rot; the leaves are bright yellowish green, excellent for shipping and keeps a long time without wilting.

  Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 80c; 5 lbs., $3.50. Postpaid.

- **MUSTARD SPINACH OR TENDERGREEN**
  The new vegetable is all its name implies, a very mild Mustard with a creamy Spinach flavor. In 1930, in New York City, plantings were made every two weeks throughout the entire summer, including the dry hot months of July and August. Not a single planting failed.

  Mustard Spinach may be harvested when the plants are four to five inches high; packed in handy retail bundles, and with a proper introduction will sell well in any market.

  Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 60c. 5 lbs., $2.25 Postpaid.

CULTURE: Head lettuce seed should be planted very early so it will make heads before the extremely hot weather. Thin out to at least ten inches apart in the row. To be a good lettuce must grow fast, and if it is planted too thick growth is checked and the lettuce is tough and bitter. 1 ounce of lettuce seed for 3000 plants; 5 lbs. for 1 acre.

Little Falls, Minn.
The House of Gurney, Inc.
Yankton, S. Dak.

Gentlemen:
Last year I purchased a package of Stonehead Riviera lettuce seeds from you which produced excellent heads. It is the only one I have found which will actually develop into firm heads. I was so pleased with it that I want more seed of the same kind. Very truly,

Math Roster, Jr.
**GURNEY’S DELICIOUS DRY LAND PEAS**

All our peas are raised in the dry areas of the United States without irrigation. They will yield better than seed grown under irrigation.

--

**EARLY PEAS**

- **BIG DAKOTA**
  
  This fine new variety of early peas is going to supplant a good many older types. The vines are dwarf, 15 to 18 in. high, and the deep green pods are often 4 1/2 in. long and are tightly packed with 8 to 10 luscious peas. By actual count, they contain one more pea to the pod and more pods to the vine than any other. Our tests show it to be the earliest dwarf, large podded pea. The peas are of a delicious, melting quality sweet and tender. 1/2 pt., 12c; 1 lb., 28c; 5 lbs., $1.25 postpaid. Not prepaid, 10 lbs., $2.15; 25 lbs., $4.75; 50 lbs., $8.90; 100 lbs., $17.20.

- **ALASKA**
  
  Or Earliest of All—(52 days to maturity)—A greater acreage of Alaska is planted by canners and market gardeners than any other. It is of unequalled evenness of growth of vine and maturity of peas. By actual count, they contain one more pea to the pod and more pods to the vine than any other. Our tests show it to be the earliest dwarf, large podded pea. The peas are of a delicious, melting quality sweet and tender. 1/2 pt., 12c; 1 lb., 28c; 5 lbs., $1.25 postpaid. Not prepaid, 10 lbs., $2.15; 25 lbs., $4.75; 50 lbs., $8.90; 100 lbs., $17.20.

- **AMERICAN WONDER**
  
  More work has been done in improving American Wonder than on any other Pea. Our improved strain has larger pods, more of them, and will produce a crop of Peas in the hottest and driest years. One of the earliest Wrinkled Peas in cultivation. Very compact and dwarf growth, seldom ex-

--

**SECOND EARLY AND LATE VARIETIES**

- **BLISS EVERBEARING**
  
  70 Days to Maturity
  
  Height of the vine 24 to 30 inches, vigorous and branching in habit. Many stalks grown from a single root, pods will average 3 inches in length, broad, blunt, light green in color. The dark green pods will retain their fine, marketable appearance much longer than the lighter colored ones of the old sort, and even after shipping a long distance, will look fresh and handsome. 1/2 pt., 12c; 1 lb., 28c; 5 lbs., $1.25 postpaid. Not prepaid, 10 lbs., $2.00; 25 lbs., $4.50; 50 lbs., $8.45; 100 lbs., $15.75.

- **NEW LONG PODDED ALDERMAN**
  
  The dark green vigorous vines grow 4 1/2 to 5 feet tall and are very productive. The pods are often 8 to 10 1/2 inches long, broad and rich dark green in color. They hold 7 to 9 peas of the largest size and finest quality.

  The dark green pods will retain their fine, marketable appearance much longer than the lighter colored ones of the old sort, and even after shipping a long distance, will look fresh and handsome. 1/2 pt., 12c; 1 lb., 28c; 5 lbs., $1.25 postpaid. Not prepaid, 10 lbs., $2.00; 25 lbs., $4.50; 50 lbs., $8.45; 100 lbs., $16.50.

- **GURNEY’S YANKTON MAIN CROP—65 Days to Maturity**
  
  The Yankton Main Crop is one of the most luxuriant of the semi-dwarf peas, attaining a height of about two feet, not tall enough to make it necessary to stake or brush them.

  This has become one of the standard medium early peas all over the Northwest. It is the one variety that can be planted and almost insures yourselves all of the green peas you can use during their season. They produce very large pods, six to nine peas, excellent quality, and yield heavily.

---

**CULTURE:** Sow the seed of the smooth-seeded varieties as early in the spring as possible. Wrinkled-seeded varieties are most susceptible to cold weather and the seed should not be planted until all danger of frost has passed. To insure a continuous supply of fresh, sweet peas, make succession sowings every 10 days until June 1. Sow again late in August for a fall crop. Place the rows 2 1/2 to 4 ft. apart and cover the seed 1 to 1 1/2 in. deep.

---

2 Pounds Will Plant 100 Feet of Row—120 Pounds Will Plant One Acre

---

Tune in on WNAX—570 kilocycles—526 meters

---

American Wonder 100 Feet of Row—1000 Pounds Will Plant One Acre
**GURNEY’S ONIONS for Profit**

**CULTURE:** Plant onion seed just as early as you can work the ground in the spring. Make a good firm seed bed and plant the seed ¼ inch deep, the roots about 2 inches apart. Cultivate shallow and often. Get the weeds while they are small.

**YELLOW ONIONS**

- **RIVERSIDE SWEET SPANISH**
  
  This is absolutely the largest and mildest onion that can be grown from seed in the north. Single onions have been grown that weighed over four pounds. These enormous onions are a beautiful golden yellow, perfect globe shape and the very sweetest and mildest onions you have ever tasted. Yields from 500 to 1000 bushels per acre are not uncommon. At the meeting of the South Dakota Horticultural Society, the Yellow Sweet Spanish Onion was highly recommended, outyielding all other onions. The mild flavor and fine appearance make them salable at the highest market price. Pkt., 5c; oz., 25c; ¼ lb., 70c; 1 lb., $2.10; 4 lbs., $7.75 Postpaid.

- **PRIZETAKER**
  
  (110 days to maturity)—This is the largest of the American onions, the most handsome and mildest in flavor. Our seed stock of this onion is pure American grown and produces the largest and handsomest onion we have ever seen, many of the bulbs weighing as high as 1 lb. each. Skin rich golden color, and so mild and sweet it can be eaten raw like an apple. This onion is a reasonably good keeper, but should be disposed of by January 1st. We strongly urge the planting of a reasonable acreage of this variety, as it will certainly prove profitable. Pkt., 5c; oz., 25c; ¼ lb., 75c; 1 lb., $1.75; 4 lbs., $6.50 Postpaid.

- **SOUTHPORT YELLOW GLOBE**
  
  (110 days to maturity)—The true Southport Yellow Globe is particularly valuable for winter market. It is a more perfect globe than the Yellow Globe Danvers and a better keeper. The onions are similar in size and form to the Southport Red Globe, but have a pale straw yellow skin, mild flavor and a heavy cropper. Owing to its handsome appearance and delightful flavor it sells readily on all markets. Pkt., 5c; oz., 25c; ¼ lb., 75c; 1 lb., $1.85; 4 lbs., $7.00 Postpaid.

**RED ONIONS**

- **SOUTHPORT RED GLOBE**
  
  (110 days to maturity)—Consider this the most profitable of the onions for planting in the north. Brings the best price on the market of any of the onions. Has a large and dark, glossy red color and the fact that it is one of the best keepers makes it very desirable. We advise that you make the bulk of your planting Southport Red Globes. This variety has given as high as 900 bushels per acre, and is the leading market onion in the north. Pkt., 5c; oz., 25c; ¼ lb., 65c; 1 lb., $1.75; 4 lbs., $6.50 Postpaid.

**WHITE ONIONS**

- **SOUTHPORT LARGE WHITE GLOBE**
  
  (110 days to maturity)—This is the best all-purpose white onion in cultivation: it is large, a perfect globe, silvery white and the very best keeper, and excellent quality. In growing onions we advise that you put in a part of your acreage of this large White Globe, as there is always a demand for a reasonable amount of them at a better price than you could get for other onions. On account of their mild flavor they are particularly valuable for green onions for bunches. Pkt., 5c; oz., 25c; ¼ lb., 75c; 1 lb., $2.25; 4 lbs., $8.00 Postpaid.

- **WHEAT BUNCHING ONION**
  
  (90 days to maturity)—For early green onions, the seed of this onion may be treated as any onion seed, making one-third the expense and labor of growing any other onion. Maximum results, however, are obtained by treating as an annual; sow in the spring or fall. Pkt., 5c; oz., 25c; ¼ lb., 75c; 1 lb., $2.25.

**LEEK**

- **SOUTHPORT large WETHERSFIELD**
  
  (100 days to maturity.) One of the old standard varieties and a favorite onion especially in the West, where immense crops are grown for shipment. Large size, skin deep purplish red, form round, somewhat flat, flesh purplish white, moderately fine grained, and stronger in flavor than most other kinds. Very productive, best keeper, it is the best of any variety on poor or dry soil. Pkt., 5c; oz., 25c; ¼ lb., 65c; 1 lb., $1.80; 4 lbs., $6.75 Postpaid.

**An Onion Bulletin With Each ¼-Lb. Order**

So that you may grow as successful as expert growers, we will enclose with each order of ¼ lb. and up, our Onion Bulletin, giving complete instructions for preparing the seed bed, planting, growing, harvesting and marketing.

**GURNEY’S DAKOTA RED GLOBE**

The parentage of this onion is strictly Southport Red Globe, but has been grown in Dakota for a number of years, and by careful selection of the bulbs we have produced an onion that is very uniform in size, very dark red in color, a perfect globe, and quite a bit earlier than any other globe onion. We consider this one of the most profitable onions for the people of the Northwest to plant. The seed will cost you a little more money than the others, but a few cents per acre are more made up by the results in the fall. Pkt., 7c; oz., 25c; ¼ lb., 75c; ½ lb., $1.25; 1 lb., $2.25; 4 lbs., $8.60 Postpaid.

A good seeder and wheel hoe will pay for itself many times over in raising an acre of onions. We handle the famous Hudson Seeder and Cultivator combined at the low price of $15.35 each, transportation paid.

Plant as many onions as you can take care of. Your profits will take care of you.

**LARGE RED WETHERSFIELD**

(100 days to maturity.) This is the best all-purpose white onion in cultivation; it is large, a perfect globe, silvery white and the very best keeper, and excellent quality. In growing onions we advise that you put in a part of your acreage of this large White Globe, as there is always a demand for a reasonable amount of them at a better price than you could get for other onions. On account of their mild flavor they are particularly valuable for green onions for bunches. Pkt., 5c; oz., 25c; ¼ lb., 75c; 1 lb., $2.25; 4 lbs., $8.00 Postpaid.

**HE-SHI-KO**

New Japanese Bunching Onion.—This is the very best of the bunching onions. The long thick pure white stalks keep their sweetness and mild flavor even if left in the ground until fall. They are tender and crisp at all times. A bed of these will supply you with delicious green onions seven months of the year. Pkt., 5c; oz., 25c; ¼ lb., 75c; 1 lb., $2.65.

**LEEK**

September Giant—This wonderful new Leek is the largest and best of the Leek family. The giant white stalks are often 12 inches long and from 2 to 3 inches in diameter. This splendid quality, giant white Leek is very mild and tender, and is better than onions in salads and for cooking soups. Pkt., 5c; oz., 25c; ¼ lb., 75c; 1 lb., $2.25.
**BERMUDA ONION PLANTS**

Our plants are open field grown. Large size, Strong, Healthy and Sturdy. Shipped fresh the day they are pulled. Onion plants produce large onions, which are Sweet and Tender. They grow faster and quicker, sell at the high market price, because they are of much superior quality. Grown from Imported Seed, produce the genuine Bermuda Onion. Thin skin, white meat Sweet and Tender. They are hardy, easy to grow, and easy to harvest. They will produce perfectly in any State. Frost or light freeze will not injure them. 1000 plants will produce from 7 to 10 bushels of onions. 500 plants, 85c; 1000 plants $1.45 Postpaid. Crate of 6000 plants Not Prepaid, $5.45.

---

**GURNEY’S PUMPKINS**

**FOR PIES AND STOCK FEED**

1 Ounce for 25 Hills; 4 Pounds Per Acre

Pumpkins are easily grown and profitable for stock feeding. At time of corn planting scatter seeds in every fourth or fifth hill, or for a large crop sow in May in good warm soil, in hills eight to ten feet each way; four plants to a hill.

**JAPANESE PIE**

A very valuable new pumpkin of Japanese origin. The flesh is very thick, of a rich salmon color, fine grained, dry and sweet. Of medium size, early; very productive and highly desirable for pies or cooking. A Crook-neck variety with curiously marked seeds. Matures in 95 days.

Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 65c; 1 lb., $1.25 Postpaid.

**CONNECTICUT FIELD**

A large yellow variety; hard shell; an excellent variety for field culture. Matures in 100 days.

Pkt., 5c; oz., 10c; ¼ lb., 20c; ½ lb., 65c; 1 lb., $1.25 Postpaid.

**MAMMOTH KING**

The largest variety ever introduced. 100 lb. harvest the peanuts because it is easier to do than it is to harvest them in any other way. Up here peanuts are grown profitably, and a panful of them set in the oven and baked and eaten during these long winter evenings is certainly worth while. The variety which we are offering is early enough to grow in any of the northern states, produces an immense yield of excellent nuts. We have enough of the South Dakota grown nuts to supply our customers this season, and believe it to be a profitable crop to grow. A peanut at its best should be planted in a light sandy soil. You can grow peanuts in other soil profitably, but the light sandy soil produces the greatest crop. With each order for peanuts we will inclose the peanut bulletin that will give you full instructions for planting and care. Per lb., 25c; 5 lbs., $1.15 Postpaid; Not Prepaid 10 lbs., $1.70; 25 lbs., $3.75.

---

**SOUTH DAKOTA GROWN**

A few years ago we offered a quantity of South Dakota grown peanuts. It sounded almost wonderful to think that South Dakota was growing them and we find that peanuts are just as easy to grow as potatoes, sometimes a little more so. Down south they let the hogs harvest the peanuts because it is easier to do than it is to harvest them in any other way. Up here peanuts are grown profitably, and a panful of them set in the oven and baked and eaten during these long winter evenings is certainly worth while. The variety which we are offering is early enough to grow in any of the northern states, produces an immense yield of excellent nuts. We have enough of the South Dakota grown nuts to supply our customers this season, and believe it to be a profitable crop to grow. A peanut at its best should be planted in a light sandy soil. You can grow peanuts in other soil profitably, but the light sandy soil produces the greatest crop. With each order for peanuts we will inclose the peanut bulletin that will give you full instructions for planting and care. Per lb., 25c; 5 lbs., $1.15 Postpaid; Not Prepaid 10 lbs., $1.70; 25 lbs., $3.75.

---

**ONION SETS**

These may be planted early in the spring to be used for green onions, or can be allowed to grow, producing large onions very early. They are planted largely by market gardeners and allowed to grow full size on account of coming into the market when other onions are scarce; in this way they realize the best price.

Prices:—Red-Yellow or White Bottom Sets, 1 lb., 23c; ½ lb., 55c; 5 lbs., $1.00 Postpaid.

Not Prepaid—½ bu. (16 lbs.), $2.00; 1 bu. (32 lbs.), $3.60; 2 bu. (64 lbs.), $7.25.

Multiplier Sets—1 lb., 25c; ½ lb., 60c; 5 lbs., $1.15 Postpaid.

---

**PARSLEY**

Parsley thrives best in a rich soil. The seeds germinate very slowly, three or four weeks generally elapsing before it makes its appearance. Sow early in spring half an inch deep, previously soaking the seeds for a few hours in tepid water. One oz. to 150 feet of drill.

Champion Moss Curled—A beautiful crimped and curled variety. Pkt., 5c; 1 oz., 10c; ¼ lb., 25c; 1 lb., 65c.

Turnip-Rooted Parsley—This vegetable has the same flavor as the regular parsley, but it produces small turnip-shaped roots underground that are used for flavoring soups, etc. Pkt., 7c; 1 oz., 15c; ¼ lb., 40c.

---

**SMALL SUGAR**

This variety is smaller than the Large Field, but of finer grain, sweeter and very prolific. We recommend small sugar as one of the best for pumpkin pies. Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 60c; 1 lb., $1.20 Postpaid.

---

**ROSELLE**

or Annual Currant Jelly Plant

Make delicious jelly from the leaves and branches of this wonderful new Australian plant, using only half the amount of sugar required with fruit juices. Roselle makes a bright red jelly, that both looks and tastes like currant and would take an expert to tell the difference. Roselle Seed should be sown in April in the field where the plants are to remain in rows six feet apart and thinned to two feet in the row. The plants grow rapidly and thrive anywhere in the United States. Cooking directions on every package Pkt., 10c; ½ oz., 25c; oz., 45c; ½ lb., $1.45.

---

Victor & Agnes Vopat—White River, S. Dak., holding one plant of Gurney’s Peanuts

---

The House of Gurney, Inc.

Gentlemen:

This is my third order from you and I have had wonderful results from the seed. Last year I had a fine garden even though we did have a drought here.

Yours truly, Albert Forman
PARSNIPS

1 OZ. for 150 Feet of Row; 4 Lbs. per Acre

CULTURE—Plant as early in the spring as the weather will permit and continue planting till the middle of June. Plant ½ inch deep in a rich, deeply worked, sandy loam, in rows 18 inches apart, and when 2 inches high thin out to 4 to 6 inches apart. Parsnips germinate rapidly in dry weather. Parsnips are improved by frost, so they can be dug as wanted, or stored for winter use.

Guernsey (Improved Half Long)—The roots do not grow so long as the Hollow Crown, but are of greater diameter and more easily gathered. The roots are very smooth; the flesh is fine grained and of most excellent quality. Pkt., 5c; 1 oz., 10c; ½ lb., 20c; 1 lb., 60c; 5 lbs., $2.50. Postpaid.

GARGANTUAN—One of the largest sweet peppers that can be grown and produces abundantly. It comes the first of anything in the spring, just when you want it. It will grow any old place and will thrive there for years, but the better the place, care and cultivation given it the better returns. It is as easily grown from seed as from the roots; and you get a nice cutting the second season. Try at least a package of these seeds. Early, large and tender. Pkt., 5c; oz., 15c; ½ lb., 45c; 1 lb., $1.25.

GIANT SWEET PEPPERS

1 Ounce for 1000 Plants

CULTURE—Peppers like a light, rich, warm soil for best results. They require about same treatment as tomatoes. Sow seed in hotbed early in April and transplant to open ground when weather is settled—or start seed outside after all danger of frost is past.

California Wonder

Thickness of flesh alone, which is often ½ of an inch, places this sweet pepper above all others. It is crisp and juicy, too, without a trace of pungency. Vigorous growing plants bear a heavy yield of blocky fruits that become as much as 6 inches long and 4 inches wide. They are unusually good for serving whole. It is a splendid new variety, which has proved valuable to both market growers and home gardeners. Pkt., 5c; ½ oz., 15c; oz., 25c; ½ lb., 75c; 1 lb., $1.25.

Harris Early Giant

One of the largest sweet peppers that can be grown in the North. Older varieties of peppers are satisfactory only in the South. Harris Early Giant is not only very large, but the plants produce enormous yields, and mature earlier than most other varieties. Plants of strong, vigorous growth, often 18 inches tall and covered from top to bottom with enormous peppers, seldom taking more than 45 to 50 days to fill a bushel crate. Color dark green, turning to a bright red. Pkt., 6c; ½ oz., 20c; oz., 35c; ¼ lb., $1.05; 1 lb., $3.25.

Neapolitan

Earliest and Best for the North—This is the earliest of the large, mild red Peppers and very productive. The plant grows about two feet high and is completely laden with fine Peppers about four inches long. Flesh is very thick and exceedingly mild. Color of fruit dark green turning a brilliant red when ripe. Ripen in 125 days. Pkt., 5c; ½ oz., 15c; oz., 25c; ½ lb., 90c; 1 lb., $2.75.

Long Red Cayenne

The true Cayenne, hot and pungent. Pkt., 5c; ½ oz., 20c; oz., 35c; ¼ lb., 90c; 1 lb., $4.00.

HYBRIDIZED POTATO SEED

From the Seed-Balls—Millions never saw a Potato Seed Ball. Thouands have tried in vain to get the seed. Now is your opportunity. This unrioted seed will produce an endless variety of new kinds. Your fortune may be in one of them. They are as easy to grow as tomatoes.

Growing new and distinct Seedling Potatoes from the Seed-Ball Seed is intensely interesting. This article will produce a large number of new kinds, colors, shapes, sizes, and qualities. Some may be of immense value and bring you a golden harvest. Every farmer, gardener, and bright boy should plant a few packets. Full directions on every pkt. Pkt., 10c; 3 for 25c; 7 for 50c.

Photo of Potato Seed Balls—One Half Natural Size

It is from these that ALL valuable new varieties of Potatoes are produced.

Rhubarb or Pie Plant

How many farmers and city people are supplied with this delicious fruit? It is easily grown and produces abundantly. It comes the first of anything in the spring, just when you want it. It will grow any old place and will thrive there for years, but the better the place, care and cultivation given it the better returns. It is as easily grown from seed as from the roots; and you get a nice cutting the second season. Try at least a package of these seeds. Early, large and tender. Pkt., 5c; oz., 15c; ½ lb., 45c; 1 lb., $1.25.

EVERGREEN AND TREE SEEDS

CARAGANA, or Siberian Pea Tree

A very hardy hedge or low growing tree from Siberia. Foliage dark green, while the bark is light green making a very ornamental hedge plant. Oz., 20c; ¼ lb., 65c; 1 lb., $1.95.

HONEY LOCUST THORNLESS

A native American tree of large size and rapid growth. Valuable for timber and posts. Oz., 15c; ¼ lb., 45c; 1 lb., $1.10.

RUSSIAN MULBERRY

This well-known hedge, shade and fruit tree grows readily from seed. Often grows to a height of 20 feet. One of this kind is grown here at Yankton. Pkt., 10c; ½ oz., 30c; oz., 50c; ½ lb., $1.95.

BLACK HILLS SPRUCE

One of the best ornamental Evergreens grown. This variety only seeds once in several years, consequently seed is very scarce and high priced. Pkt., 10c; ½ oz., 40c; oz., 75c.

COLORADO BLUE SPRUCE

A rare, elegant tree, with foliage of a rich blue. One of the most distinct and striking of all the Spruce family. Pkt., 10c; ½ oz., 30c; oz., 55c; ½ lb., $1.50.

BULL PINE

(Ponderosa)—This is the most easily grown from seed of any Evergreen. One of the most rapid growing, hardy and best trees for windbreak. Pkt., 7c; oz., 25c; ½ lb., 75c; 1 lb., $2.00.

MUSHROOMS

A Free Bulletin With Each Order

Our spawn is the highly desirable Snow White No. 9 S. recommended by most authorities as not only the easiest to raise but of the very finest quality and appearance.

These delicious fungi can be grown in a warm cellar or close shed in which an even temperature can be maintained of from 50 to 60 degrees, and where plentiful supply of fresh, horse-stable manure for making the beds can be obtained. We furnish spawn in bricks weighing about one pound and a brick is sufficient to plant about nine square feet. Best Spawn, 35c per lb.; 5 lbs., $1.50. Postpaid.

MUSTARD OSTRICH PLUME

The plants are of vigorous growth and have beautiful dark green leaves which curve outward like fine ostrich plumes. It is a handsome variety, of strong growth, yielding a large quantity of greens. The plants stand a long time before bolting to seed. The flavor is mild and the leaves are excellent for garnishing and salads. Does well even during hot weather. Pkt., 5c; oz., 10c; ½ lb., 25c; ½ lb., 40c; 1 lb., 65c.

OKRA OR GUMBO

White Velvet—Sow about the middle of spring in drills and then the plants to a foot or more apart. Highly esteemed and cultivated for its green seed pods, which are used in soups or stewed and served like asparagus. Pkt., 5c; 1 oz., 10c; ¼ lb., 25c; 1 lb., 65c; 5 lbs., $2.50. Postpaid.

Parsnips Contain Vitamins A and B—294 Calories Per lb.
1 Ounce for 150 Feet of Row; 4 Pounds Seed per Acre

For a successive supply sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hotbed in February, care being taken to give plenty of ventilation, otherwise they will run to leaves.

Our Radish seed are all raised from transplanted roots, the bad shaped and off-color radishes being discarded. We could raise radish seed for one-half our present cost but they would not be Gurney quality.

Our Radish seed are all raised from transplanted roots, the bad shaped and off-color radishes being discarded. We could raise radish seed for one-half our present cost but they would not be Gurney quality.

GURNEY'S RADISHES ARE BETTER

EARLY SCARLET GLOBE

In offering this Scarlet Globe Radish to the public we are offering the very best radish on the market. It is earlier than any other market variety, and the quality is so crisp and sweet that it always creates a demand for more. It is especially valuable for early planting in hotbeds or out doors. Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 60c, 5 lbs., $2.35. Postpaid.

FRENCH BREAKFAST

Excellent home and market garden sort; also suitable for forcing. Tops small. Roots oblong, blunt, with slender well defined tap root; about 1½ inches long and ⅝ inch through; rich scarlet scarlet, globe in shape, an exceptionally clear to the top—sweet, tender, and mild. The maximum size before becoming over-ripe is about one and one-fourth inches in diameter. Its shape is nearly round, being only slightly flattened on the under side. Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 60c, 5 lbs., $2.35. Postpaid.

CRIMSON GIANT

A remarkable feature of this Radish is that it will grow double the size of other red forcing radishes and will remain solid, not showing the least sign of becoming hollow. It will grow six and seven inches in circumference, weighing about ten ounces. Shape is round to oval and very attractive. Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 60c, 5 lbs., $2.25. Postpaid.

GURNEY'S ALL-SEASONS RADISH

This new radish is a great acquisition to the list of radishes. It can be planted very early and can be used as soon as it is large enough, but will continue to grow if left in the ground until it is as large as an ordinary turnip and does not become pithy or strong. It is one of the best money makers for the market gardeners on account of its long season and its immense size. Can be sliced and eaten with vinegar. Color is bright scarlet, globe in shape, an exceptionally fine radish in bunches. Pkt., 7c; oz., 15c; ¼ lb., 25c; 1 lb., 80c, 5 lbs., $2.10. Postpaid.

WHITE ICICLE

Our seed of this long white radish is as near perfect as it is possible to produce it. Out of 100 White Icicle Radishes pulled in our trial ground 98 were even in size, good shape, perfect color clear to the top—sweet, tender, and mild. The other two were good radishes but slightly imperfect in shape. Market Gardeners should plant Gurney's White Icicle for a good cash crop. Ready to use in 26 days. Pkt., 5c; oz., 10c; ¼ lb., 20c; 1 lb., 60c, 5 lbs., $2.25. Postpaid.

When ordering radish seed get enough to produce several bushels of delicious radishes. Take them up in the fall and store in your house, or cellar, same as other vegetables, and you will have fresh crisp radishes all winter.

CHINESE ROSE, or SCARLET CHINA—Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 60c.

LONG BLACK SPANISH WINTER—Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 60c.

MAMMOTH JAPANESE WINTER RADISHES

These monstrous Japanese winter radishes were considered a novelty some time ago, but they are becoming just as staple a winter vegetable as potatoes, carrots or beets. Some of them will measure as much as four or five feet long. Some of the other varieties are globe shaped and grow as large as the largest turnip. We have grown these in the trial ground for regular winter use for a number of years, and we have never found any of them but what were crisp and juicy. They will keep perfectly until spring.

TOKINASHI—GIANT LONG. Pkt., 7c; oz., 15c; ¼ lb., 40c.

WINTER RADISHES

Winter Radishes should be planted in July or early August. An ounce of seed will produce several bushels of delicious radishes. Take them up in the fall and store in your house, or cellar, same as other vegetables, and you will have fresh crisp radishes all winter.

GURNEY’S TABLE QUEEN

For many years it was quite an event to have squash on the table, and I wonder if you really know the reason why. Not because it was hard to prepare but because it was hard to get enough people at one table to eat one squash. Gurney’s Table Queen Squash is an individual squash, equally as good quality as any other, and just enough for one person. I have seen as high as 100 squash on one vine; they are dark green in color, and are more or less pear shaped approximately 5 inches in diameter and 7 or 8 inches long. The flesh is of golden yellow, and the squash is an excellent keeper. A few vines of this Table Queen Squash will furnish enough squash for the entire family for the whole winter.

Pkt., $5; oz., 12c; 1/4 lb., 30c; 1 lb., 58c; 5 lbs., $3.75 Postpaid.

WARTED HUBBARD

This is the well known winter squash of which a larger acreage is produced than any other variety, and the best known of all squash. Fruit large, olive shaped, with skin very dark green. Skin more or less warty, and very hard. Flesh, rich yellow. A good shipper and keeper.

Pkt., 5c; oz., 10c; 1/4 lb., 30c; 1 lb., 85c; 5 lbs., $3.50 Postpaid.

NEW TOBACCO, TOM SUTTON

Grow Them—Smokes for yourself on your own farm.

Not being an expert on tobacco myself, I will have to give you the originator’s description, and the experience of the boys around here who use tobacco. This tobacco originated in Minnesota, is extremely early, yields wonderfully, and if I am to believe the fellows who use it, it is of remarkably fine quality. The originator says of it: “I feel that I have perfected as nearly a perfect tobacco for the northwest as it is possible to grow. It is unequaled as a pipe and cigar tobacco. My crop was all right to cut before frost this year. Stock four to six feet high, with as many as 24 large leaves on a stalk. Pkt., 6c; 1/4 oz., 25c; 1 oz., 40c; 1/4 lb., $1.00.
GURNEY'S NORTHERN GROWN TOMATOES

Plant Earlibell and Bison and Have Tomatoes 10 DAYS EARLIER

One pkt. to 100 feet of row—½ pound to the acre. It is not how cheap we can furnish you Tomato Seed, but how good. In buying Tomato Seed from us you get Gurney Quality, which means the very best product. There are no better strains of any of the varieties that we are offering, and the constantly increasing demand for Gurney Tomato Seed proves that we are furnishing seed that produces the best quality, smoothest and best shipping tomatoes.

BISON, THE TOMATO FOR NORTHERN GARDENS

The best early tomato yet developed by Professor A. F. Yeager. In place of gaging its vitality in continuous branching, as do practically all other tomatoes, Bison grows a compact plant and puts all its energies into producing and ripening, a heavy and extra early crop of smooth, solid, meaty, medium sized red tomatoes. In 1930 Professor Yeager had a plant in his plot that produced 40 pounds of ripe fruit. Do not prune Bison plants. We believe this is the best thing that Professor Yeager has developed to date and that is saying a lot. Pkt., 8c; ½ oz., 25c; 1 oz., 45c; ¼ lb., $1.25; 1 lb., $4.25.

RED RIVER SPECIAL

Claimed by some to be as early as the Earlibell. Our tests show them to nature at approximately the same time. Anyway, it is one of the earliest tomatoes and has proven one of the hardest, very solid and meaty. The Canadian experiment station at Morden, Manitoba, proved it to be the heaviest yielder out of 49 varieties. It is a cross between one of the older varieties and one of Professor Yeager's newer varieties. Fruit is small medium size, bright scarlet color, meaty and slightly flat. Package, 5c; ½ oz., 20c; 1 oz., 40c; ½ lb., $1.00; 1 lb., $2.50.

EARLIBELL

The earliest, large, smooth red tomato. This tomato is not only remarkable for its earliness, but for its very large size, handsome shape and bright red color. Its solidity and fine quality are quite equal to the best medium, and late sorts. Enormously prolific. The very finest for the northern market and home garden. Pkt., 5c; ½ oz., 15c; 1 oz., 25c; ¼ lb., 50c; 1 lb., $2.25; 5 lbs., $9.25. Postpaid.

EARLIANA

The earliest, large, smooth red tomato. This tomato is not only remarkable for its earliness, but for its very large size, handsome shape and bright red color. Its solidity and fine quality are quite equal to the best medium, and late sorts. Enormously prolific. The very finest for the northern market and home garden. Pkt., 5c; ½ oz., 15c; 1 oz., 25c; ¼ lb., 50c; 1 lb., $2.25; 5 lbs., $9.25. Postpaid.

JUICY (For Tomato Juice)

The new tomato developed especially to produce a fine flavored, highly colored tomato juice. The fruits are medium to large in size, with thick outer and inner walls, and a small seed cavity. The flesh is firm and very bright red. Juicy ripens about the same time as Pritchard—will outyield any main crop tomato we have ever grown. A bushel basket of large, rich scarlet "Juicy" tomatoes will out-sell any other tomato on the market, and whether blanched, used for tomato juice, or as fresh sliced tomatoes "Juicy" will prove superior to any other variety. Pkt., 7c; ½ oz., 20c; 1 oz., 35c; ½ lb., 90c; 1 lb., $2.50.

NEW STONE

The tomato for a main crop. We call this the king of the Livingstone kinds, which are the best types of large, smooth, solid "beefy" tomatoes. If asked to select one main crop, market sort, we advise this. Color, fine scarlet; stem set high, core small and shallow, so that but little is lost when it is taken out of the fruit before slicing. If in doubt, buy the New Stone. Pkt., 5c; ½ oz., 15c; 1 oz., 25c; ¼ lb., 75c; ½ lb., $2.00; 1 lb., $1.90; 5 lbs., $7.50 Postpaid.

SCARLET TOPPER OR PRITCHARD

Medium-early, large, smooth, and extremely solid Tomato of an intense scarlet color. Most productive and very attractive. Of a solidity that is truly remarkable, with very small seed pockets and no core. Its productiveness, particularly on rich soil, is amazing and individual plants will bear 70 to 80 fruits each. It will yield 15 tons and more per acre. Pkt., 6c; ½ oz., 15c; 1 oz., 25c; ¼ lb., 75c; 1 lb., $2.15; 5 lbs., $7.75 Postpaid.

When Better Tomato Seeds are Sold Gurney's will Sell Them

The House of Gurney, Inc.

Lodgepole, Neb.

Dear Sirs:

Am very glad to tell you I had a swell garden even though the weather man was against me, but he didn't stop the garden seeds from growing. Every seed grew and my Earlibell tomatoes surely were very heavy yielders, giving us all we could eat raw, canned 150 quarts and sold and supplied my neighbors.

Mrs. J. E. Scott

- **MARGLOBE TOMATO**
  Marglobe is a second-early, red-fruited variety equally suitable for trucking or canning. It produces large, smooth, meaty, globular, red fruits, which ripen uniformly and are relatively free from cracks. The Marglobe fruits are very meaty and though early, ripen slowly, and therefore ship and keep well. Owing to their shape, solidity, color, and uniform ripening qualities, they make a splendid canned product and first-class pulp. Large yields of excellent fruit have been reported from nearly every region where this variety has been tried. Pkt., 5c; ½ oz., 15c; 1 oz., 35c; ½ lb., $1.75; 1 lb., $3.45.

- **JOHN BAER**
  Extra early red. Not quite so early as Earliana, though there is only a few days' difference. John Baer yields a much heavier crop of larger, more uniform and more attractive fruits. Most profitable extra early sort. Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ¼ lb., $1.75; 1 lb., $3.45.

- **GOLDEN QUEEN**
  "Queen of All the Yellows."—It is very prolific, early, and a solid, alwayssolid, entirely free from ridges, large in size and delicious in flavor. It is fine for slicing. Price: Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ¼ lb., $1.75.

- **YELLOW PEAR**
  Fruit bright yellow, distinctly pear-shaped; of rich flavor and used largely for preserving. The stock we offer is the true pear-shaped, not the large yellow plum often sold for it. Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ½ lb., $1.25.

- **RED PEAR**
  A bright red fruit identical in shape with the Yellow Pear shaped tomato; however, it has a distinct flavor and a rich red color and is a special favorite for preserves and to make what is known as Tomato Figs. Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ½ lb., $1.25.

- **YELLOW HUSK OR GROUND CHERRY**
  This is of the dwarf growing type, earlier and more suitable to the northern states than the tall spreading variety. Fruit about the size of the common cherry, bright yellow, enclosed in a loose husk. Bears abundantly and is most excellent for sauce and preserves. Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ½ lb., $1.25.

- **GARDEN HUCKLEBERRY**
  A wonderfully productive plant, producing literally ropes of jet black fruit along its branches from the ground to its tips, plants grow about four feet tall, fruit matures about with ordinary tomatoes, size about that of the cranberry and are delicious for preserves or pies. Pkt., 7c; ½ oz., 25c; 1 oz., 45c.

- **POPCORN**
  This remarkable vegetable grows and sets fruits freely. The smooth creamy white skinned fruits measure about 8 in. long and 4 in. in diameter. You pick the fruit when well matured and cook it in boiling water for about 20 minutes, take it out and cut and you will find a quantity of stringy Spaghetti-like contents which is quite tasty when seasoned with vinegar, sauce, or cooked in other ways. The following three points are important: 1. Do not pick too young. Leave until fully matured. 2. Do not skin or cut the fruits. They must be cooked whole. 3. Do not cook too long as this will soften the stringy texture of the contents. Pkt., 7c; ½ oz., 15c; 1 oz., 25c; ½ lb., 75c.

- **VEGETABLE SPAGHETTI**
  This vegetable is one of the best for slicing and canning, produces large, smooth, meaty, globular, red fruits, which ripen uniformly and are relatively free from cracks. The Marglobe fruits are very meaty and though early, ripen slowly, and therefore ship and keep well. Owing to their shape, solidity, color, and uniform ripening qualities, they make a splendid canned product and first-class pulp. Large yields of excellent fruit have been reported from nearly every region where this variety has been tried. Pkt., 5c; ½ oz., 15c; 1 oz., 35c; ¼ lb., 45c.

- **GARDEN LEMON—VINE PEACH OR MANGO MELON**
  The vine on which this fruit is borne is similar to the muskmelon and requires the same cultivation; fruit about the size of a large peach, oval shaped, somewhat russeted and the color of a bright orange when ready for use. For sweet pickles, pies and preserves, they are excellent. Pkt., 5c; oz., 15c; ¼ lb., 45c.

- **SOUTH AMERICAN MAMMOTH**
  A wonderfully productive plant, producing literally ropes of jet black fruit along its branches from the ground to its tips, plants grow about four feet tall, fruit matures about with ordinary tomatoes, size about that of the cranberry and are delicious for preserves or pies. Pkt., 7c; ½ oz., 25c; 1 oz., 45c.

- **CHERRY**
  This is of the dwarf growing type, earlier and more suitable to the northern states than the tall spreading variety. Fruit about the size of the common cherry, bright yellow, enclosed in a loose husk. Bears abundantly and is most excellent for sauce and preserves. Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ½ lb., $1.25.

- **RED PEAR**
  A bright red fruit identical in shape with the Yellow Pear shaped tomato; however, it has a distinct flavor and a rich red color and is a special favorite for preserves and to make what is known as Tomato Figs. Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ½ lb., $1.25.

- **YELLOW HUSK OR GROUND CHERRY**
  This is of the dwarf growing type, earlier and more suitable to the northern states than the tall spreading variety. Fruit about the size of the common cherry, bright yellow, enclosed in a loose husk. Bears abundantly and is most excellent for sauce and preserves. Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ½ lb., $1.25.

- **GARDEN HUCKLEBERRY**
  A wonderfully productive plant, producing literally ropes of jet black fruit along its branches from the ground to its tips, plants grow about four feet tall, fruit matures about with ordinary tomatoes, size about that of the cranberry and are delicious for preserves or pies. Pkt., 7c; ½ oz., 25c; 1 oz., 45c.

- **POPCORN**
  This remarkable vegetable grows and sets fruits freely. The smooth creamy white skinned fruits measure about 8 in. long and 4 in. in diameter. You pick the fruit when well matured and cook it in boiling water for about 20 minutes, take it out and cut and you will find a quantity of stringy Spaghetti-like contents which is quite tasty when seasoned with vinegar, sauce, or cooked in other ways. The following three points are important: 1. Do not pick too young. Leave until fully matured. 2. Do not skin or cut the fruits. They must be cooked whole. 3. Do not cook too long as this will soften the stringy texture of the contents. Pkt., 7c; ½ oz., 15c; 1 oz., 25c; ½ lb., 75c.

- **VEGETABLE SPAGHETTI**
  This vegetable is one of the best for slicing and canning, produces large, smooth, meaty, globular, red fruits, which ripen uniformly and are relatively free from cracks. The Marglobe fruits are very meaty and though early, ripen slowly, and therefore ship and keep well. Owing to their shape, solidity, color, and uniform ripening qualities, they make a splendid canned product and first-class pulp. Large yields of excellent fruit have been reported from nearly every region where this variety has been tried. Pkt., 5c; ½ oz., 15c; 1 oz., 35c; ¼ lb., 45c.

- **GARDEN LEMON—VINE PEACH OR MANGO MELON**
  The vine on which this fruit is borne is similar to the muskmelon and requires the same cultivation; fruit about the size of a large peach, oval shaped, somewhat russeted and the color of a bright orange when ready for use. For sweet pickles, pies and preserves, they are excellent. Pkt., 5c; oz., 15c; ¼ lb., 45c.

- **SOUTH AMERICAN MAMMOTH**
  A wonderfully productive plant, producing literally ropes of jet black fruit along its branches from the ground to its tips, plants grow about four feet tall, fruit matures about with ordinary tomatoes, size about that of the cranberry and are delicious for preserves or pies. Pkt., 7c; ½ oz., 25c; 1 oz., 45c.

- **CHERRY**
  This is of the dwarf growing type, earlier and more suitable to the northern states than the tall spreading variety. Fruit about the size of the common cherry, bright yellow, enclosed in a loose husk. Bears abundantly and is most excellent for sauce and preserves. Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ½ lb., $1.25.
To stay young and healthy, eat plenty of greens. Spinach, lettuce, parsley and beet greens contain minerals and vitamins your body needs. They are found in no other food.

This is one of the most important of our market garden crops, and one that requires very little care. For summer sow at intervals of two or three weeks from April to August and for fall sow in September, covering it in exposed places with straw to protect it from severe frost.

**EAT GURNEY’S SPINACH AND BE HEALTHY**

![Spinach Ad]

Sow early in the spring and drill 1 1/2 inches apart. Cultivate same as Carrots or Parsnips. Gather what may be wanted for the winter and let the balance stand in the ground for next spring.

**Mammoth Sandwich Island**—A new and large variety. Pkt., 5c; oz., 15c; 1/4 lb., 40c; 1 lb., $1.25.

**Mammoth Island Salsify**

**SUNFLOWER**

**Chinese Russian**—The plant produces very large heads which measure 12 to 20 inches in diameter, and contain an immense quantity of large striped seeds, which are highly valued as an excellent and cheap food for fowls. They eat it greedily, thrive well, and lay the greater number of eggs.

Increased importance of the growing of sunflower seed is foreshadowed in the increased growth of the plant for forage purposes. Sunflowers as a silage crop are said to have been found to be of higher food value than corn.

**Increased importance of the growing of sunflower seed is foreshadowed in the increased growth of the plant for forage purposes. Sunflowers as a silage crop are said to have been found to be of higher food value than corn.**

**TURNIPS**

**AND**

**RUTABAGAS—SWEET AND TASTY**

1 Ounce for 150 Feet of rows; 1 Pound per Acre

**TURNIPS**

**Purple or Red Top Strap Leaf**

Flat: fine flavor and one of the most popular varieties grown. When sown late it is one of our best varieties, an excellent keeper. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 50c; 5 lbs., $2.00 Postpaid.

**Extra Early White Milan**

Extra early turnip, in which the extreme earliness, small top and tap root of the Purple Top Milan are united with the clear, white skin and flesh. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 60c; 5 lbs., $2.25 Postpaid.

**Gurney’s Purple Top White Globe Turnip**

This is an all-season Turnip; is sweet from the time it is large enough to use until the following spring; size above medium.

This new English Turnip was recommended to us by one of the largest turnip specialists as the best ever originated. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 50c; 5 lbs., $2.25 Postpaid.

**RUTABAGAS**

**Krasnoseelski Russian**

On our trial grounds for past three seasons this gave the best satisfaction and produced the largest yield of any of the rutabagas. This made an extra large percentage of good-sized rutabagas, bright in color and of excellent quality for table use. This will take the place of older varieties on account of the increased yield and quality of the fruit. Pkt., 7c; oz., 15c; 1/4 lb., 25c; 1 lb., 60c; 5 lbs., $2.25 Postpaid.

**Purple Top Yellow Rutabaga**

Best variety of Swedish turnip in cultivation. Hardy and productive; flesh yellow, of solid texture, sweet and well flavored; shape slightly oblong; terminates abruptly with no side or bottom roots; color deep purple above, and bright yellow under the ground; leaves small, light green, with little or no neck; the most perfect in form, the richest in flavor, and the best in every respect. Pkt., 5c; oz., 10c; 1/4 lb., 20c; 1 lb., 50c; 5 lbs., $2.00 Postpaid.

Raise Spinach for the children, they need it
Whether you have acres of ground or just a little dooryard, you want the best flowers you can buy. On the following pages we offer a carefully selected list of choice varieties that are easily grown by amateurs. By planting assorted kinds a profusion of flowers may be had from early summer until killing frosts in the fall. In this list you will find flowers for all purposes—for edging and borders, for garden display and cut flowers, and for winter bouquets. You need not be without flowers any time during the growing season. Cultural directions are on each packet and the prices given are prepaid.

## GIANT OF CALIFORNIA

We have had this strain under observation and it now fully meets with our ideas as to quality. It is a splendid mid-season flowering strain, the result of years of painstaking selection by one of California’s leading hybridizers. Thus grown 3½ feet high with long strong stems 18 to 24 inches in length, bearing beautifully formed, curled and interlaced flowers 5 inches and over across. The plants begin to bloom quite early in the season. Pkt., 10c; 1 oz., 15c; 4 oz., 25c.

## HEART OF FRANCE—Wilt Resistant

The best pure red aster ever produced. Opens red as the purest ruby, deepens with age and retains its remarkable beauty to the very end. The flowers are large and full. The plants are of branching type and very robust habit. Stems are long and strong. The plants begin to bloom quite early in the season. Pkt., 7c; ⅛ oz., 25c; 1 oz., 80c.

## CREGO’S GIANT ASTER—Wilt Resistant

With their long twisted curved petals they resemble the choicest of Japanese Chrysanthemums; flowers measuring five inches in diameter; borne on long, strong stems, making them suitable for cut flower purposes. Crego’s Giant Mixed. Pkt., 7c; ⅛ oz., 20c; 1 oz., 70c.

## DAKOTA SUNSHINE

We offer this wonderful new aster as the best aster novelty ever introduced. The color in these new asters is startlingly beautiful. A full ring of tubular petals surround the center, creating an airy, lace-like effect which is altogether charming. In color the flowers may be described as varying shades of Enchantress pink; Apple-blossom, Deep rose, Blue and Lavender.

We feel confident this glorious new strain will be acclaimed a distinct acquisition to modern floriculture. Pkt., 10c; ⅛ oz., 20c.

Dakota Sunshine

## QUEEN OF THE MARKET

The earliest grown, earlier than Queen of the Market. Height about fourteen inches; branching and free flowering. Flowers measure about two and one-half inches. Mixed Colors. Pkt., 5c; ⅛ oz., 15c; 1 oz., 50c.

## EARLY AMERICAN BEAUTY ASTER—Wilt Resistant

This new strain of American Beauty Aster is at least 4 weeks earlier than the regular strain and is the only American Beauty that should be planted in the North. Immense, brilliantly colored flowers borne on long stems make this one of the best cut flowers; mixed colors. Pkt., 7c; ⅛ oz., 25c.

## SUPER GIANT LOS ANGELES

All America Selection—Los Angeles is the largest and most fully double Aster known. The flowers, six to eight inches across, are a lovely soft shell pink. For those who want the finest Aster yet developed, we heartily recommend Los Angeles. Pkt., 10c; 3 pkts., 25c.

## QUEEN OF THE MARKET

The earliest grown, earlier than Queen of the Market. Height about twelve inches; branching and free flowering. Flowers measure about two and one-half inches. Mixed Colors. Pkt., 5c; ⅛ oz., 15c; 1 oz., 50c.

## EARLY AMERICAN BEAUTY ASTER—Wilt Resistant

This new strain of American Beauty Aster is at least 4 weeks earlier than the regular strain and is the only American Beauty that should be planted in the North. Immense, brilliantly colored flowers borne on long stems make this one of the best cut flowers; mixed colors. Pkt., 7c; ⅛ oz., 25c.

## SUPER GIANT LOS ANGELES

All America Selection—Los Angeles is the largest and most fully double Aster known. The flowers, six to eight inches across, are a lovely soft shell pink. For those who want the finest Aster yet developed, we heartily recommend Los Angeles. Pkt., 10c; 3 pkts., 25c.

## QUEEN OF THE MARKET

The earliest grown, earlier than Queen of the Market. Height about twelve inches; branching and free flowering. Flowers measure about two and one-half inches. Mixed Colors. Pkt., 5c; ⅛ oz., 15c; 1 oz., 50c.

## EARLY AMERICAN BEAUTY ASTER—Wilt Resistant

CANDYTUFT
All the varieties look best in beds or masses. Seed sown in autumn produces flowers in early spring. When sown in April, flowers from July till frost. Hardy annual, height 8 in.

- Dark Crimson—We all know the Candytuft, the white variety, and love it for the beautiful border it makes. This new dark crimson variety produces the finest racemes of flowers of a beautiful dark crimson and makes a wonderful border. Pkt., 5¢; oz., 20c.

- Giant Flowering Mixed—Flowers profusely throughout the whole season. The flowers of our strain are nearly double the size of the old varieties and fairly cover the plants, which are useful in beds, pots or borders. Pkt., 5¢; oz., 20c.

CHINESE WOOLFLOWER
The name Woolflower, has been given to the plant because the flower-heads resemble a large loose ball of wool. Bone in long stems and practically cover the plant during the blooming season, with both mid-summer and autumn flowering. Even a short row of them will yield a continuous supply of blooms for cutting.

- Chinese Woolflower, Crimson—a magnificent variety with large flower-heads borne from mid-summer until frost. The color is rich and intense shade of bright crimson, height 3 ft. Pkt., 7¢; ½ oz., 15c.

- Chinese Woolflower, Mixed—This wonderful mixture includes every shade of red, yellow, pink and orange. A very choice mixture that we know will please you. Pkgs., 5¢; ½ oz., 15c.

CELOSIA OR COCKSCOMB
- Giant Crimson Empress Maxima—Dwarf plants bearing mammoth bright cockscobs. The bronze foliage, makes it one of the most attractive of the Cockscombs. Pkt., 10¢; 2 for 15c.

- Ostrich Feather (Celosia Plumosa)—A beautiful feathered Celosia, producing large bright crimson and orange plumes. Mixed. Pkt., 5¢; ½ oz., 15c; 1 oz., 25c.

ANNUAL CHRYSANTHEMUM
All the varieties look best in the autumn flowering, blooming all summer and making a gorgeous display.

- The Sultan—This beautiful single Chrysanthemum is a true giant. Its large, coppery orange flowers with yellow centers completely cover the plants. Height, 20 inches. Pkt., 5¢; ½ oz., 15c.

CLARKIA
This pretty and easily grown annual has been improved in recent years. They do well either in sun or shade, growing 18 inches tall, with lovely racemes of double flowers, which all open in water when cut.

- Elegans Double Mixed—A fine mixture containing all the colors. Pkt., 5¢; ½ oz., 15c; ½ lb., 30c.

COSMOS
Extra Choice Mixed—Seed saved from 20 varieties of only the very best of the large or Gladiolus flowered type. Blooms in about ten weeks after planting. Pkt., 7¢; ½ oz., 20c.
CASTOR BEAN

The Ricinus has very ornamental foliage and beautiful showy fruit. Fine for the center of a bed, as it gives a magnificent semi-tropical appearance; or planted thick, it makes a fine screen or hedge. Plant seed in open, very rich, deep-spaded ground, in a dry situation as soon as safe in spring.

Zanzibairensis—The tallest growing Castor Oil Bean, reaching an average height of 12 ft. The large pale leaves often measure 2 ft. or more across. A stately plant for a background. Each plant makes a perfect pyramid of green and bronze foliage. The House of Gurney will give $5.00 for the photograph of the tallest Castor Bean raised from seed. Take the picture with some member of the family standing by the plant, measure it carefully and send it in to be judged before October 1st. If your Castor Bean is the tallest, you will receive $5.00 in cash. Let's raise a 16-ft. bean.

Pkt., 7c; oz., 20c; Is lb., 50c.

Camphodgensis—The finest dark-foliated Ricinus. Leaves maroon; stem nearly black, fruit bronzy purple. Five feet. Pkt., 5c; oz., 15c; ¼ lb., 45c.

ESCHOLTZIA CALIFORNIA POPPY

Golden West—The State flower of California. A bright free-flowering plant of low spread, and bronze foliage. The House of Gurney

Pkt., 6c; ¼ oz., 15c; 1 oz., 25c.

FORGET-ME-NOT

Victoria Blue—This charming little blue flower succeeds best in damp, shady situations, but will thrive in almost any soil. Victoria Blue which we offer is the largest flowering, and blooms longest of any. Pkt., 6c; ¼ oz., 15c; 1 oz., 25c.

CHINESE FORGET-ME-NOT

An annual recently introduced from China; of the easiest culture, forming strong plants 18 to 24 inches high and producing through the summer months sprays of intense blue Forget-me-not like flowers, delicately sweet scented. A splendid addition to the comparatively short list of real blue flowers. Pkt., 5c; 1 oz., 20c.

Gurney’s Selected CALENDULAS

CALENDULA CHRYSANTHA

All American Selections 1934

Chrysanthemum is distinct in type, a new break in Calendulas which is outstanding among all varieties known up to the present time. The large double flowers are an exquisite shade of clear buttercup yellow, with long loosely arranged petals which droop somewhat to give the rounded appearance of a Chrysanthemum. Besides adding a bright golden splash of color to the garden, Chrysanthemus is remarkable for its long stiff stems, making it ideal for cutting. The fact that it won one of the coveted Gold Medals in the All American Selections competitions this year indicates the high esteem in which it is held by the horticulturists of the country.

Pkt., 5c; ¼ oz., 15c; 1 oz., 25c.

Radio—This novel development of form in Calendulas has been received with much favor. The flowers are hemispherical in shape with bristling quilled petals which add materially to the grace of the blossoms. Their color is a glowing rich orange. Pkt., 5c; ¼ oz., 15c; 1 oz., 25c.

Orange King—Double, dark orange red, dark center, a very select strain. The plants in the open ground under ordinary field cultivation attain a height of eighteen inches and produce blossoms three and a half inches in diameter. Pkt., 5c; ¼ oz., 15c; 1 oz., 25c.

DOUBLE PINKS DIANTHUS

Double Mixed—For brilliancy of coloring and markings, as well as beautiful forms of flowers, this family cannot be surpassed. The colors range through white, pink, and crimson to the very deepest maroon; many varieties are finely fringed. Bloom early from seed sown in the spring. Fancy mixed. Pkt., 5c; ¼ oz., 15c; ½ oz., 25c; 1 oz., 40c.

ANNUAL DAISIES

GOLDEN ORANGE DAISY

African—This flower is from South Africa and is the earliest grown of any of the showy border plants. It grows to a height of about fifteen inches and blooms profusely all summer. On our trial ground it was the most attractive flower of any shown there; the flowers are about two and one-half inches across and the most beautiful golden orange color. We recommend this specially for borders.

Pkt., 5c; ¼ oz., 15c.

SWAN RIVER DAISY

Brachycome—This free flowering dwarf-growing annual is covered during the summer with a profusion of pretty blue and white flowers. It is especially suitable for edging for small beds and borders and for the taller growing daisies. Height, 9 inches. Pkt., 5c; ¼ oz., 15c.

DAHLIA

Double finest mixed—For specimen plants and for rich autumn display these flowers can not be surpassed. The blossoms are wonderfully perfect and symmetrical with long stems, making them especially valuable for bouquets. Usually grown from tubers, robust plants and excellent blooms may be produced the first year from seed started early in boxes and planted out after danger of frost is past.

Pkt., 10c.

FOUR O’CLOCK, MARVEL OF PERU

Gurney’s Giant Scarlet—A mass of red flowers blooming over a long period. A row of these in the flower garden produces almost a startling effect during the late autumn and early winter.

Pkt., 5c; 1 oz., 25c.

Gurney’s Giant Mixed—Well known hardy annual succeeding all others. Handsome plants. 2 feet high, covered all summer with hundreds of bright colored, showy, sweet scented flowers. They make a wonderfully attractive hedge.

Pkt., 5c; 1 oz., 15c; ¼ lb., 45c.

GODETIA

Double Mixed—Long graceful spikes are decorated with double blossoms resembling satin pompons one above another. One of the most beautiful annuals and should be in every flower garden. A good cut flower, height 2 ft. Pkt., 7c; ¼ oz., 15c; ½ oz., 25c.

GAILLARDIA

New Double (Annual)—Large bright-colored double flowers, useful for cutting. The colors embrace Sulfur, Golden Yellow, Orange, Aman- thanch, and Claret. Pkt., 5c; ¼ oz., 15c; 1 oz., 25c.
### Ornamental Grasses
The ornamental Grasses serve the double purpose of rendering the mixed flower-bed or border attractive and for the use of the spikes or panicles in winter bouquets. They are now largely used in prominent position in many of the finest public parks.

Our mixture is composed of the best of the hardy grasses. They grow from 2 to 6 feet tall, and once established will last many years.

<tbody>
<tr>
<td>GYPSOPHILA</td>
<td>Annual Baby's Breath—The flowers are small, star-like and borne on feathery sprays, which are highly esteemed for cut flowers, as they lend a most graceful effect when combined with other flowers in bouquets. Pkt., 5c; oz., 15c.</td>
</tr>
<tr>
<td>GERANIUM</td>
<td>Double and Single Mixed—The brilliant colors of the flowers and the exquisite zone or horse-shoe markings of the leaves of some of the varieties, render the Geranium very desirable for pot culture as well as for bedding out of doors and for growing in window boxes. Sow in a pot or box in the house in rather light soil, preferably containing a little leaf mold and sand. Keep as near 65°F. as possible. Water moderately, and as soon as the third leaf appears, pot in two-inch pots. The seed we offer will produce a large percentage of double flowers in many beautiful shades. Pkt., 15c; 2 pkts., 25c.</td>
</tr>
</tbody>
</table>

### Everlasting or Straw Flower Helichrysum
Mixed—These are of the most beautiful colors: pink, white, red, yellow, lavender. They bloom on good, strong stocks, standing 3 to 4 feet high and are as beautiful as any of the annuals you can have. Cutting these just as the buds commence to open, they retain their delicate colors perfectly and remain beautiful for several years. These are the genuine everlasting flowers. Plant liberally of these. Cut large quantities of the just opening buds and retain them for the holidays and for special occasions. Pkt., 5c; ¼ oz., 15c; oz., 25c.

### Everlasting Globe Amaranth
Gomphrena—A first-rate bedding plant; the flowers resemble clover heads and can be dried and used in winter bouquets. Mixed colors. Pkt., 5c; ½ oz., 15c; 1 oz., 25c.

### Heliotrope
Highly valued for the fragrance of their flowers and duration of bloom. Height one foot. Easily grown from seed. Seed sown in early spring will bloom by August 1st.

### Linum or Scarlet Flax
One of the most showy annuals for flower beds and masses. Brilliant crimson-scarlet flowers, 1 inch across, borne in wonderful profusion. Height 1 foot. Pkt., 5c; ½ oz., 15c; 1 oz., 25c.

### Hunnemannia Semi Double Sunlite
Award of Merit Winner All America Selections

- Sunlite, the attractive semi double form of the well known Mexican tulip poppy, has become one of the most popular garden flowers. The plants are about two feet in height, and like a sunny position. These will stand our hot Dakota summers without watering. The bright, lemon-yellow flowers are about two inches in diameter. Pkt., 5c; $0.25.
- Single Yellow—Seed sown early in May will, by the middle of July, produce plants covered with their large buttercup-yellow poppy-like blossoms and never out of flower until hard frost. The plants grow about 2 feet high, are quite bushy, with beautiful feathery foliage. Pkt., 5c; ¼ oz., 15c.

### Ice Plant
Handsome plant for baskets, rock work, vases and edgings. Leaves and stems appear as though covered with ice crystals: easily grown. Height 3 inches. Pkt., 5c; ¼ oz., 15c.

### Sweet Mignonette
Seeds sown early in the garden will give flowers through the summer. Very few cultivate the sweet Mignonette compared with the many that might show their love for this sweet little flower. Height 10 inches. Pkt., 5c; ½ oz., 15c.

### Mixed Flower Seed
This is a combination of all the very best annual flowers for cutting. We have taken special pains in picking varieties with deeper than Sky Blue. The habit is decidedly upright, with long branched flowering spikes, well adapted for cutting. Height 3 to 4 ft. Pkt., 8c; ¼ oz., 20c.

### Japanese Flower Garden
We have secured from Japan a wonderful mixture of Japanese Flower Seed, many of them entirely new to this country. These new and unusual flowers will keep the children interested all summer. Pkt., 5c; ½ oz., 15c; 1 oz., 25c.

### Cut Flower Mixture
Our mixture of annual flowers for cutting is carefully selected from the finest varieties. We have taken special pains in picking varieties with long stems that will make a great show of colors and will last for many days after cutting. Pkt., 5c; ½ oz., 15c; oz., 25c.

### Linum or Scarlet Flax
One of the most showy annuals for flower beds and masses. Brilliant crimson-scarlet flowers, 1 inch across, borne in wonderful profusion. Height 1 foot. Pkt., 5c; ½ oz., 15c; 1 oz., 25c.

### Larkspur, Annual Varieties
The annual varieties are very free bloomers and produce large spikes of flowers, white, pink, rose, light blue, dark blue and violet. In some varieties the flowers are double, in others single. The beautiful plumose-like foliage is very ornamental.

- **Giant Imperial Mixed**
  - Great advancement has been made in this new and valuable type of Larkspur in the past few seasons. Especially fine for cutting, as it produces flower-stems 3 to 4 feet long, branching from the base of the plant. Pkt., 5c; ½ oz., 15c; ¼ lb., 60c.

### Dwarf Double Hyacinth Flowered
These early flowering Larkspurs grow about 12 to 18 inches high and come in a great variety of colors. Fine for border or rock gardens. Pkt., 5c; ¼ oz., 15c; 1 oz., 25c.

### Larkspur Rosamond
Gold Medal Winner All America Selections, Award of Merit Royal Horticultural Society

- The New Annual Larkspur Rosamond has been acclaimed the most distinct Larkspur to be introduced in many years. It is two weeks earlier than other Stock Flowered varieties. The plants bear numerous good spikes heavily covered with fully double flowers. The color is new and distinct, a pure deep rose self, holding well out of bloom. Height, 3 to 4 ft. Pkt., 10c; ½ for 25c.
**ROYAL MARIGOLDS**

**MARIGOLD YELLOW SUPREME**

Gold Medal Winner 1935
All America Selections

Heralded as a companion to the popular Guinea Gold, Yellow Supreme does in many respects resemble it. It is very free flowering, compact and somewhat pyramidal in habit, two to two and a half feet tall, bearing loosely ruffled, carnation flowered blossoms. The color is a creamy lemon yellow, and the flowers are somewhat larger than Guinea Gold. Pkt., 8c; 1/4 oz., 20c.

**GUINEA GOLD**

The golden orange flowers are not shaped like ordinary African Marigolds; they are more like Carnations, with their petals loosely placed and waved. Bushy, blossom covered plants are ideal for borders, and many florists have already pronounced Guinea Gold the best Marigold for cutting. Pkt., 7c; 1/4 oz., 15c.

**AFRICAN ORANGE ALDOUBLE**

Any strain of African Marigold that will come fifty per cent double is considered good—sixty is excellent. We are pleased to announce, however, that we have developed a strain of African Orange Marigold which has come one hundred per cent double for the past two years. We are pleased to be able to offer this to the trade under the name of “All double.” Pkt., 5c; 1/4 oz., 15c.

**AFRICAN TALL**

Double Mixed—The African Marigolds are valuable for their flowers in autumn, and can be grown to advantage in the little clumps with other plants in the front of shrubbery or in the garden border. The African varieties are the taller in growth. They succeed best in a light soil, with full exposure to the sun. Pkt., 5c; 1/4 oz., 15c.

**FRENCH MARIGOLD**

Robert Beist—Deep Red

This is the finest of the new French Marigolds, growing about one foot high. One of the best border plants, and covered from mid-summer until frost with a solid mass of deep velvety maroon-red flowers. Pkt., 5c; 1/4 oz., 15c.

**GURNEY’S GLORIOUS NASTURTIUMS**

**DWARF OR TOM THUMB**

These are dwarf, compact plants, and like all Tom Thumb, succeed on light, well-drained soil. The Tom Thumb Nasturtiums are much freer bloomers than any of the other varieties and are excellent for border plants.

Tom Thumb Mixed—This mixture is composed of all of the best Tom Thumbs and is remarkable both for brilliancy of color and perfection of individual flowers. The low price at which we are offering this seed brings it within the reach of everyone, and it should be planted liberally. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c.

**TALL OR TRAILING**

These are all of strong, vigorous growth and can be trained upon strings or wires, or for covering fences or trellises. Our mixture of these Nasturtiums includes all of the brightest colors and is made up of the best of the named varieties. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c.

**AFRICAN MARIGOLDS**

Yellow Supreme

- **MARIGOLD YELLOW SUPREME**
  - Gold Medal Winner 1935
  - All America Selections

- **GUINEA GOLD**
  - The golden orange flowers are not shaped like ordinary African Marigolds; they are more like Carnations, with their petals loosely placed and waved. Bushy, blossom covered plants are ideal for borders, and many florists have already pronounced Guinea Gold the best Marigold for cutting.
  - Pkt., 7c; 1/4 oz., 15c.

- **AFRICAN ORANGE ALLDOUBLE**
  - Any strain of African Marigold that will come fifty per cent double is considered good—sixty is excellent. We are pleased to announce, however, that we have developed a strain of African Orange Marigold which has come one hundred per cent double for the past two years. We are pleased to be able to offer this to the trade under the name of “All double.”
  - Pkt., 5c; 1/4 oz., 15c.

- **AFRICAN TALL**
  - Double Mixed—The African Marigolds are valuable for their flowers in autumn, and can be grown to advantage in the little clumps with other plants in the front of shrubbery or in the garden border. The African varieties are the taller in growth. They succeed best in a light soil, with full exposure to the sun.
  - Pkt., 5c; 1/4 oz., 15c.

**FRENCH MARIGOLD**

- **Robert Beist—Deep Red**
  - This is the finest of the new French Marigolds, growing about one foot high. One of the best border plants, and covered from mid-summer until frost with a solid mass of deep velvety maroon-red flowers.
  - Pkt., 5c; 1/4 oz., 15c.

**GURNEY’S GIANT ANNUAL PLATYCODON**

An extra early flowering annual Platycomdon of gigantic size. Individual flowers measure as large as four inches across. They grow 30 inches tall but start flowering in June at the height of 6 inches. We consider this to be one of the startling novelties and should be planted by every flower lover.

**NASTURTIUM**

- **DOUBLE GOLDEN GLEAM**
  - This plant forms a large vigorous bush which throws out short runners. In full bloom entire plant, including the runners, is a blaze of color.
  - The large, golden yellow semi-double flowers average 2 1/2 to 3 inches across. They are borne on cist, stiff stems 6 inches in length. A bouquet of double sweet scented Nasturtiums will fill a room with a delicate musk like fragrance.
  - Pkt., 6c; 1/2 oz., 10c; 1 oz., 15c; 1/4 lb., 50c.

- **DOUBLE SCARLET GLEAM**
  - Gold Medal Winner 1935
  - All America Selections

  - The same type as the Glorious Clem Hybrids Scarlet Gleam is an intense dangling scarlet. It has been likened to a huge, fiery carpet spread over the ground.
  - Pkt., 10c; 1/2 oz., 15c; 1 oz., 25c.

- **GLORIOUS GLEAM DOUBLE FINEST MIXED**
  - Glorious Clem Hybrids are the result of years of scientific breeding and selection for the development of this sensational new double, sweet scented Nasturtium. Grown in a bed or border in the garden their effect is startlingly beautiful.
  - The color range includes a blend of brilliant shades: salmon, golden yellow, orange scarlet, cerise, cream yellow, orange, maroon, crimson, and many spotted varieties.
  - Pkt., 7c; 1/4 oz., 10c; 1 oz., 15c; 1/4 lb., 45c.

**POPPIES**

- **AMERICAN LEGION—FLANDERS POPPY**
  - All of us have a greater affection for the poppy after reading Lieut.-Col. J. D. McCrae’s “In Flanders Fields.” This is the beautiful Single Red Flanders poppy that the boys who were over there saw in the fields. Plant a package of these for the boys who went across.
  - Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

- **PEONY FLOWERED DOUBLE MIXED POPPY**
  - These are immense balls as large as the ordinary poppy, very clear white to flaming scarlet. Stands about two and one-half feet high and bloom over a period of about four weeks. A bed of these is one of the most desirable in the annual garden.
  - Pkt., 5c; 1 oz., 25c.

- **ROHEAS SHIRLY SINGLE MIXED**
  - A superb blend of this beautiful type of Poppy ranging in color from pure white through tones of salmon, pink, and rose to brightest carmine red.
  - Pkt., 5c; 1 oz., 25c.
**GIAN T PANSIES**

- **TRIMARDEAU GIANT MIXED**
  A bed of Pansies in bloom always has something new for you in variety of color and marking, every time you visit it. Are in bloom continuously from spring until late fall. The seed may be sown in the hot bed, in boxes in the house or in the open ground. Very fine mixed. Pkt., 5c; 1/4 oz., 25c; 1/2 oz., 40c; 1 oz., 75c.

- **GIANT MASTERPIECE MIXED**
  These Pansies are very large and the petals are frilled and ruffled to a greater extent than other kinds. The colors are excellent and the plants of great vigor, holding the immense flowers well up on four strong stems. The petals are often so large and fluted that the flowers appear to be double. Pkt., 12c; 2 for 20c.

- **ORCHID FLOWE RED MIXED**
  This distinct and beautiful strain will appeal to those who prefer delicate shades and soft tints of coloring. Includes orchid shades of chamois, pink, lilac, rose, orange and lavender. Pkt., 10c; 2 pkts., 15c.

---

**GURNEY'S PETUNIAS ARE DROUGHT AND HEAT PROOF**

- **BALCONY QUEEN MIXED**
  Balcony Petunias are larger and flowers are much brighter in color than the common Petunias. Although one of the best for general outdoor culture, it is used extensively for balconies and window boxes. This strain begins blooming early in the spring and continues long after the first frost. There seems to be no limit to its ability to flower. Mixed. Pkt., 10c; 1/4 oz., 35c.

- **BALCONY STAR of CALIFORNIA**
  A magnificent new Petunia bred with extra long branches for window boxes and hanging baskets. The flowers are velvety violet with a touch of crimson, starred with five pure white blotches. The flowers are very large. Pkt., 15c; 2 pkts., 25c.

- **Balcony Blue**—The large velvety blue blossoms completely cover the plant. A bed of Balcony Blue Petunias will always attract attention. Pkt., 15c; 2 for 25c.

- **Gurney's Balcony Crimson**—Produces rich, velvety crimson flowers, that can only be appreciated when you see them. Pkt., 15c; 2 for 25c.

---

**ANNUAL PHLOX**

- **DRUMMONDI GRANDIFLORA**
  Mixed—Large flowered. These are decided improvements over the old class, with much larger flowers, a better range of colors and of more compact growth. Choice mixed, all colors. Pkt., 5c; 1/4 oz., 20c.

- **STAR-SHAPED PHLOX**
  The most interesting of the Phlox family, bearing pretty star-shaped and fringed flowers, rich in colors, varying from violet blue to deep rose and blood-red, margined with white. Starred: fringed; choice mixed. Pkt., 7c; 1/4 oz., 25c.

- **NANA COMPACTA DWARF**
  Mixed—8 in.—These are much superior to the other Phloxes for bedding or borders. The plants grow very symmetrical in neat, little bushes, covered with flowers during the whole summer and fall. Pkt., 8c; 1/4 oz., 30c.

**BALCONY PETUNIAS**

- **NEW PETUNIA**
  Dwarf Globe Mixed—A new strain of Dwarf Compact Petunias. Each plant in this mixture forms a perfect ball effect from eight to ten inches high and about twelve inches in diameter. To get the full beauty of this new flower, be sure to give them plenty of room, at least one foot between plants. They come in a complete range of colors from pure white to the deep blues and crimsons. Pkt., 10c; 1/4 oz., 30c.

- **GURNEY'S VIOLET BLUE**
  Dwarf growing, almost continuously covered with velvety indigo blossoms. Pkt., 12c; 2 for 20c.

- **ROSY MORN**
  This is of the new dwarf growing type, producing flowers of a most beautiful shade of pink, continuous blooming from early in summer until freezing weather. Pkt., 7c; 1/4 oz., 25c.

- **DWARF MIXED**
  The Dwarf variety is particularly fine for beds and borders, growing about fifteen inches tall with a diameter of about eighteen inches. Gurney’s Special Dwarf Mixed—Pkt., 5c; 1/4 oz., 25c.

---

**DWARF PETUNIAS**

- **Balcony Petunia Collection**—1 package each of the four Balcony Petunias—45c.

---

**PRIMROSE PRIMULA**

Primroses are charming plants which blossom freely during the spring and winter. They are of easy culture and should be sown from March to May and again in July to August for a succession of bloom. All make splendid pot plants and blossom freely out of doors.

**Giant Flowered**—The beautiful Fringed Chinese and Obcorna Grandiflora are large flowered, bloom freely for several months and are of the very best house plants. We offer only the best seed. Pkt., 20c.

---

**QUEEN ANNE LACE FLOWER**

"In ye olden days" the Queen Anne lace was the most delicate and beautiful and Nature has done its best to reproduce the delicate figures and beautiful patterns in this flower. The color is a charming, dainty baby blue. Borne on long stiff stems, making this one of the best cut flowers. Pkt., 5c; 1/4 oz., 20c.
If I were restricted to one flower, I believe I would choose Sweet Peas.

Gurney's W.N.A.X. Mixture of Giant Spencer Sweet Peas

For those who do not care for sweet peas in separate colors, Gurney's W. N. A. X. mixture of Spencers, will satisfy the most exacting flower lover. This mixture is made of the best of the old standard Spencers and a careful selection of the new creations with their heavier, longer stems, longer blooming period and larger flowers, some of them measuring two inches across. Four or five perfect flowers on a stem. Pkt., 5c; oz., 12c; 1/2 lb., 30c; 1 lb., 55c.

BEST GIANT FLOWERING SPENCER SWEET PEAS

Powerscourt—The clearest lavender. The British National Sweet Pea Society has classed this as the best lavender. Your garden of Sweet Peas will not be complete without this beautiful Sweet Pea. Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c.

Captain Blood—Brilliant scarlet with a tinge of copper. A Sweet Pea everyone will stop and admire. Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c.

Rosie—Deep rose-pink, with all the vigor and robustness necessary to make it a first-class Sweet Pea. Rosie is vastly superior to all other varieties in the rose-pink class. Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c.

Pirate Gold—A rich golden orange. Pirate Gold is a new shade in Sweet Peas. The strong vigorous plants and enormous flowers make this one of the best. Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c.

Fluffy Ruffles—A big flower, vigorous and free blooming—first of the "Ruffled" Sweet Peas. It exhibits a most consistent double and ruffling of petals. A lovely rich rose pink, a gleam of soft salmon, and a bright creamy undertone blend into a harmonious cream-pink shade of exquisite beauty. Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c.

Avalanche—This is by far the finest of all white winter-blooming varieties. The flowers are extra large, of fine form, with a magnificent and boldly waved standard. Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c.

Heavenly Blue—A most beautiful soft tone of delphinium-blue, without a trace of violet. Flowers of immense size, four to each stem. Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c.

CUPID DWARF SPENCER

These form a bush of emerald-green foliage a little over a foot wide and six inches high. It blooms from June until late summer and literally a sheet of bloom. Pkt., 7c; 1/2 oz., 15c; 1 oz., 25c.

Gurney's Mammoth Flowering Mixed. Pkt., 5c; 1/2 oz., 20c.

VINCA

Ornamental free-blooming plants with bright green shiny foliage and one of the most satisfactory and long-flowering bedding plants we have. Seed can be sown out of doors as soon as the ground is warm; they may be potted and kept in bloom through the winter, a fine cut flower. 12 to 18 in. Mixed—Pkt., 7c; 1/2 oz., 20c.

STOCKS

The Ten Weeks Stocks bloom in 10 weeks after being sown; they grow from 12 to 18 inches high, each plant forming a perfect bouquet of delightful fragrance. Our strain of Double Giant Perfection Stocks is the finest we have ever seen. Pkt., 10c; 3 for 25c.

VERBENAS

Not so many years ago we considered as almost perfect any strain of Verbena, the flower of which could cover a 25-cent piece. By careful selection an individual flower of our strain now almost covers a 50-cent piece. The trusses are of the largest size; of brilliant colors, free-blooming and of vigorous habit. For best and quickest results seed should be sown early in the house or hotbed, and transplanted to flowering quarters in May. If sown outdoors in May, it blooms from the end of July on.

Gurney's Mammoth Flowering Mixed. Pkt., 5c; 1/2 oz., 20c.

Early Flowering Mixed Spencer Sweet Peas

These bloom two weeks before the standard Spencer varieties, but with the same large, wavy flowers. They have replaced the standard Spencers in greenhouse planting and, though they do not grow quite as tall, their earliness and long season of bloom make them invaluable in outdoor planting, particularly in the short season. Pkt., 7c; oz., 15c; 1/2 lb., 40c; 1 lb., 70c; 1 lb., $1.30.

BEST EARLY FLOWERING SPENCER SWEET PEAS

Mother Machree—A golden rose suffused coral. A single flower measures two inches across, a spray of four 3½"×5½", length of stems 13 to 15 inches. The color is a delightful shade of golden coral rose and it is a strong grower. The color of flower and plant alike at once suggests itself as the noblest of offerings for that day of fest remembrance—Mother's day. Pkt., 12c; 1/2 oz., 30c.

Sunkist Maid—A new soft, bright orange Sweet Pea very fragrant and will continue to bloom through the very hottest weather. Pkt., 12c; 1/2 oz., 25c.

Blue Bonnet—The color is a clear deep blue of great beauty. Flowers are unusually large and come four to a stem. Pkt., 8c; 1/2 oz., 20c.

Miss Annie Laurie—The richest tone of pure rose-pink ever produced in a Sweet Pea. It is an abundant, prolific and continuous bloomer. Pkt., 10c; 1/2 oz., 25c.

Lavanda—At last we really have a pure lavender Sweet Pea. The blossoms of Lavanda are extremely large and waved; four blossoms on each stem and highly perfumed. Pkt., 12c; 1/2 oz., 25c.

Vulcan—A dazzling scarlet-cerise. Vulcan is a strong grower with large flowers on long stemmed sprays. Pkt., 8c; 1/2 oz., 20c.

Early Pal—This is an entirely new shade in Early Flowering Sweet Peas; a rich rose-crimson, which holds the brightness and depth of color. Pkt., 8c; 1/2 oz., 20c.

Maiden America—A new deep pink Sweet Pea of the same exquisite shade of pink as the American Beauty Rose; beautifully waved and frilled. Pkt., 12c; 1/2 oz., 30c.

Plant Sweet Peas Early. Late planting will not be satisfactory.

Early Flowering Mixed Spencer Sweet Peas

Vulpal—A dazzling scarlet-cerise. Vulcan is a strong grower with large flowers on long stemmed sprays. Pkt., 8c; 1/2 oz., 20c.

Early Pal—This is an entirely new shade in Early Flowering Sweet Peas; a rich rose-crimson, which holds the brightness and depth of color. Pkt., 8c; 1/2 oz., 20c.

Maiden America—A new deep pink Sweet Pea of the same exquisite shade of pink as the American Beauty Rose; beautifully waved and frilled. Pkt., 12c; 1/2 oz., 30c.

VERBENAS

Not so many years ago we considered as almost perfect any strain of Verbena, the flower of which could cover a 25-cent piece. By careful selection an individual flower of our strain now almost covers a 50-cent piece. The trusses are of the largest size; of brilliant colors, free-blooming and of vigorous habit. For best and quickest results seed should be sown early in the house or hotbed, and transplanted to flowering quarters in May. If sown outdoors in May, it blooms from the end of July on.

Gurney's Mammoth Flowering Mixed. Pkt., 5c; 1/2 oz., 20c.
GURNEY'S DAHLIA FLOWERED ZINNIAS

The large size, fullness of petals, extraordinary color range, and good keeping qualities of this flower have all contributed to its popularity. It is easily grown, and keeps well when cut. It has been truly called "A New Flower for the People."

- DAHLIA FLOWERED MIXED ZINNIA

This is a most wonderful Zinnia, coming in practically all colors and measuring as much as nine inches across. All colors mixed. Pkt., 5c; 1/4 oz., 15c; 1/2 oz., 25c.

- CRIMSON MONARCH

By far the largest and best of the red shades. Flowers often eight inches in diameter. Plants very vigorous. A marvelous production of extraordinary merit. Pkt., 8c; 1/4 oz., 20c.

PICOTEE ZINNIAS

- NEW GIANT MIXED

This novelty is the most attractive thing in all the race of Zinnias. The flowers are of the Giant type, each petal distinctly tipped with a darker shade. They come in a variety of colors: orange, flesh, lemon, pink and cerise. Picotee Mixed—Pkt., 7c; 1/4 oz., 15c; 1/2 oz., 25c.

DWARF LILLIPUT ZINNIAS

- RED RIDING HOOD GRACILLIMA

A beautiful fiery red Zinnia which grows to a height of one foot. A bed of these is the most intense dazzling scarlet you have ever seen or can imagine. Pkt., 7c; 1/4 oz., 20c; 1/2 oz., 35c; 1 oz., 60c.

- DWARF LILLIPUT MIXED

Double Dahlia-like flowers about two inches across on dwarf compact plants about 16 inches tall. Our Dwarf Mixed Zinnias come in the brightest colors we have ever seen. Pkt., 5c; 1/4 oz., 15c; 1/2 oz., 25c.

SALVIA

- SALVIA VOLCANO—Scarlet Sage

Of all varieties of Salvia cultivated this is undoubtedly the most satisfactory and finest of them all. It grows about 20 inches high, pyramid-shaped, and is a mass of extra long racemes of fiery red, trumpet-shaped flowers. The scarlet flowers should be planted in a hot-bed and given some care as they are easily raised. Do not plant outdoors until danger of frost is over. Pkt., 10c; 1/4 oz., 25c.

CALIFORNIA GIANT DOUBLE ZINNIAS

DOUBLE GIANT (2 1/2 FT.)

Here is the class to which the Zinnias are indebted for the favor they enjoy today. In habit the plants are tall, branching and vigorous. The flowers are usually brighter than the dahlia-flowered type and are nearly as large.

- GIANT FLOWERED MIXED

A splendid mixture of all the brightest colors. These will produce flowers nearly six inches across. Pkt., 5c; 1/4 oz., 15c; 1/2 oz., 20c; 1 oz., 40c.

- GOLDEN YELLOW DOUBLE GIANT

I saw a field of this variety of nearly ten acres, every plant producing a large number of brightest golden yellow flowers you can imagine, immense in size, and truly a wonderful sight. Excellent for cut flowers. Pkt., 7c; 1/4 oz., 20c.

SALPIGLOSSIS

- EMPEROR MIXED

This has long been one of our Favorite Flowers but has never gained the popularity to which it is entitled. It is a splendid annual, with flowers of a peculiar richness, very delicate. unsurpassed for cutting. Grows about three and one-half feet high, producing flowers nearly as large and about the shape of the Morning Glory, and comes in almost every color that one can imagine, deep blues, purples, crimson, yellow, white, etc. Mixed pkt., 5c; 1/4 oz., 15c.
There is a place in every yard for climbing vines.

CARDINAL CLIMBER

One of the finest annual climbers. Very graceful and beautiful, growing rapidly, it reaches a height of twenty feet, densely clothed with laciniate, rich green leaves. The numerous clusters of fiery scarlet, tubular spear-shaped flowers resemble the cypress vine, but are much larger, often measuring one and one-quarter inches across. Pkt., 7c; ½ oz., 20c; 1 oz., 35c.

BLACK-EYED SUSAN

(Thunbergia)—Beautiful, rapid growing, annual climbers preferring a warm, sunny situation; used extensively in hanging baskets, vases, low fences, etc.; very pretty flowers in buff, white, orange, etc., with dark eyes; mixed colors; 4 feet. Pkt., 7c; ½ oz., 15c; ½ oz., 25c.

BALSAM APPLE

A very beautiful, cut leafed, rapid growing, annual climbing vine, producing beautiful flowers, followed by seed pods bursting open and showing the interior, bright crimson. A very satisfactory climbing vine for hot, dry places where others will not do well. The seed grows readily and rapidly. Pkt., 5c; ½ oz., 15c.

BEAN, SCARLET RUNNER

The well known rapid-growing annual climber, producing bright red flowers, from July to September. The foliage is laciniate, makes it splendid for porches or any location where shade is desired. Pkt., 5c; ½ lb., 15c; 1 lb., 45c.

WILD CUCUMBER

The most rapid growing vine in existence. It will make a growth of 50 feet in a single season and will cover instantly places quicker than anything else you can plant. It is an excellent shade for summer houses or to train over trellis or porches. Pkt., 5c; ½ oz., 15c; ½ lb., 45c.

CYPRESS VINE

A most beautiful vine, with delicate fernlike foliage and beautiful star-shaped rose, scarlet and white flowers. Pkt., 5c; ½ oz., 15c; oz., 25c.

JAPANESE MORNING GLORY

Imperial Fancy Fringed—Exceptionally large flowers, beautifully fringed and ruffled, contains all, and many more, colors than the ordinary Morning Glory. Pkt., 5c; ½ oz., 15c; 1 oz., 25c.

CLEMATIS

A very fine hardy climber; leaves bright and glossy green, flowers small and hawthorne scented, and just covering the plant when in bloom. Excellent for covering trellises or fences. Perennial White. Pkt., 7c; ½ oz., 20c.

COBAEA SCANDENS

Cup and Saucer Vine—A climber of rapid growth, attaining a height of as much as 30 feet in the season. Valuable for covering a trellis, arbors, trunks of trees and will cling to any rough place. It is covered with immense quantities of bell-shaped flowers set in a saucer which gives the name of ‘cup and saucer’ plant. Its foliage is very beautiful and it is one of the annual climbing vines with which you will be well pleased.

Gurney's Purple flowered. Pkt., 7c; ½ oz., 15c; ½ oz., 25c.

GOURDS—Ornamental

FINEST MIXED

A tribe of climbers, with curiously shaped fruit in various colors. Being of rapid growth, they are fine to cover old fences, trellises, stumps, etc. Do not plant the seed till the danger of frost is over, and select rich mellow ground. Tender annual climbers, 10 to 20 feet. Pkt., 5c; oz., 15c.

GREEN SNAKE GOURD

A most interesting novelty of recent introduction. Young fruits of this gourd grow to an astounding length of over 10 ft. when the vines are twined to a lofty trellis and the fruits left to grow. Excellent for covering trellises or fences. Pkt., 6c; oz., 15c; 1 oz., 25c.

JAPANESE KUDZU VINE PERENNIAL

The most remarkable climbing vine of the age and should be planted by everyone for dense shade of porches, arbors, or places where you wish to screen outbuildings. It comes from Japan, the land of the flowers and of the most curious vegetable productions.

The large purple blossoms are borne in clusters which completely cover the vine. It requires but little care and is perfectly hardy south of Vanselow. North of there it should have some winter protection. Pkt., 5c; ½ oz., 15c; 1 oz., 25c.

JAPANESE VARIEGATED HOP

Where an attractive climber is desired that will stand rough usage there is nothing better. The leaves are strikingly variegated; the first color is bright deep green, distinctly marked and bletched with silver white. A strong grower—20 to 30 feet in a few weeks' time; not injured by heat or insects. Sow early in May. Pkt., 6c; ½ oz., 15c; oz., 25c.

Send your watch to Gurney's—No repair job over $2.50.

There is a place in every yard for climbing vines.
Plant a Perennial Garden and have lovely flowers from April until frost.

**AQUILEGIA—Columbine**

Dobies Long Spurred Hybrids—This is the finest strain of Columbine it is possible to buy. They come in every conceivable color, with spurs two to three inches long. Pkt., 15c; 2 for 25c.

Aquilégia—Mixed. These hardy perennials bloom freely during the spring and early summer, and you have undoubtedly seen them growing wild in a timbered country. They come in a great variety of colors and are one of the easiest to raise of any of the perennials. Height from 18 inches to 3 feet. Pkt., 5c; ¼ oz., 15c.; ½ oz., 25c.

**HARDY PERENNIAL ASTER**

Mixed (Michelmans Diasire). Single, double or semi-double and semi-double in many colors. Height from 18 inches to 3 feet. Pkt., 10c; 2 for 15c.

**ACHILLEA**

The Pearl—A hardy perennial; covered from spring until frost with many very double, pure white flowers. Grows two feet high. Blossoms the first year. Pkt., 16c.

**ALYSSUM**

(Basket of Gold)—A hardy perennial variety of dwarf habit, bearing a profusion of golden yellow flowers in April or May. Will resist the most extreme weather. Very showy. 9 inches. Pkt., 6c; ¼ oz., 15c.; ½ oz., 25c.

**COREOPSIS**

Single Grandiflora—One of the finest hardy perennial plants. Bright yellow flowers, which bloom from June until frost. Pkt., 5c; ¼ oz., 15c.

New Double—Coreopsis Lanceolata has for a long time been a gem in the perennial border. This new double and semi-double form is just as easy to grow and the extra petalage adds a further charm to the flower. Will bloom first season if seed is sown early. Pkt., 7c; ¼ oz., 15c.

**CHINESE LANTERN**

A showy variety of Winter Ground Cherry, 18 to 24 inches high and producing large, balloon-like fruits, changing from green to bright crimson as the season advances. Husk covering the fruit measures nearly 2 inches through. Pkt., 6c; ¼ oz., 15c.

**CANTERBURY BELL**

Perennial Double Blue—Blue bell, handsome, easily grown plants of stately branching habit and produce blooms for beds and backgrounds. Produce long racemes of strikingly effective bell-shaped or saucer-shaped flowers of rich color. Height, 3 ft. Pkt., 10c; 3 for 25c.

Biennial Double Mixed (Cup and Saucer)—A beautiful and distinctive type laden with flowers, each of which is a large cup-shaped bell surrounded by a calyx similar in color and resembling a saucer. Pkt., 5c; ¼ oz., 20c.

Three of the best low growing perennial rock garden plants are:

- Maiden Pinks Dianthus Deltoides
- Snow in Summer Cerastium Tomentosum
- Gypsophila Repens

All these have beautiful foliage as well as flowers and are easily grown from seed.

We recommend sowing perennial seeds in spring. Seed germinates better in the cool weather than in the heat of midsummer. The majority of these perennials bloom the second year from seed although some like Coreopsis and Gaillardia, if sown early, bloom the first year. Plants can be raised in beds and transplanted or the seed may be planted directly in your perennial garden.

**NEW HARDY PINKS**

Grass Pinks—Dianthus Plumarius—This seed will produce an average of 75 per cent, double, deliciously clove-scented flowers in many colors. They are perfectly hardy, and flower continuously from spring until late in the autumn. Double and semi-double varieties in beautiful colors. Pkt., 7c; ¼ oz., 20c.

Maiden Pinks—Dianthus deltodes—A Creeping Pink—very fine for rock work or low borders. The rose flowers grow on slender stems about 6 inches high, completely covering the foliage. Pkt., 10c.

**DIGITALIS OR FOXGLOVE**

Foxgloves are stately and highly ornamental plants when well grown, with flower stems at least three feet in height. They are fine for the mixed border or planted singly in half-shady places near a walk or drive. Perfectly hardy. Sow seed in spring in the garden and transplant as desired. Perennial. Mixed varieties. Pkt., 5c; ¼ oz., 15c.

**GEUM—AVENS**

Mrs. Bradshaw—Beautiful hardy perennial, bearing profusely large, showy double dark-crimson flowers all through the summer; an elegant flower for bouquets; 18 inches.

Large double brilliant orange scarlet; in flower the entire summer. Pkt., 10c; 2 Pkts., 15c.

**GYPSOPHILA, OR BABY'S BREATH**

Perennial Double—One of the most important hardy perennials of recent introduction. The plant grows from 3 to 3½ feet high, bearing its pretty little double white flowers in much-branched panicles which, when cut, can be used to great advantage with other flowers or by themselves as they retain their beauty for months. Pkt., 15c; 2 Pkts., 25c.

Perennial Single—The flowers are small star-like and borne on feathery sprays. They are combined with other flowers for making bouquets. Bloom the first year; height 2 feet. Pkt., 5c; ¼ oz., 15c; 1 oz., 25c.

**GYPSOPHILA REPENS**

A beautiful trailing plant not over 3 inches high, which sends out clouds of white flowers on slender stems. A perfect rock garden plant. Pkt., 10c; 2 for 15c.

**GAILLARDIA**

The Bremen—A new Gaillardia that is sure to please. Twice as large as the common kind. The immense coppery-scarlet flowers with narrow golden edges completely cover the plants from early spring until fall. Pkt., 5c; ¼ oz., 15c.

**HIBISCUS OR MALLOW**

Shrub-like plants growing from four to six feet high and bearing bright colored flowers varying from three to five inches in diameter. Perfectly hardy. A fine background for any garden. Pkt., 5c; ¼ oz., 15c.

**IRIS—Flowering Flag**

Finest Mixed (Japanese Iris)—The seeds we offer have been saved from our own unrivaled collection, and should produce only varieties of the highest merit. Blooms the second year from seed. Pkt., 6c; ¼ oz., 25c.

**LINARIA**

Gurney's Perennial Yellow—This is a very fine perennial, easily grown from seed, and is undoubtedly the best yellow perennial that can be grown in the garden. It is hardy and can be used where medium height is needed in rock garden work. The flowers resemble golden yellow snapdragons, borne on stems averaging 2 feet. Pkt., 8c; ¼ oz., 20c.

When in Yankton visit our new radio station and tower. The tower is 452 feet high.
GURNEY'S HARDY PERENNIAL FLOWER SEEDS

DELPHINIUM LARKSPUR

Perennial Blue—Blooms freely the first year from seed. The most showy of any of the perennials. We use only the finest florists strains which make stately plants 4 to 5 feet tall. The flowers vary in color from light lavender to deepest blue. One of the best cut flowers. Pkt., 7c; 1/4 oz., 20c; 1/2 oz., 35c.

Hollyhock Strain, Wreath Type—These are the greatest advance in Delphiniums. Their graceful plume shaped spikes of enormous size and beauty of form are rapidly bringing them to the forefront as the most popular flower for cutting or the garden. This mixture contains all the colors in Delphiniums, many individual blooms measuring over two inches across. Pkt., 15c; 2 for 25c.

LYCHNIS

Chalcocenia, or Burning Star—One of the greatest hardy perennials, which grow and bloom year after year, requiring no protection and easily started. Color, brilliant scarlet. Height 2 feet. Pkt., 5c 1/2 oz., 20c.

PERENNIAL PHLOX

Height, 2 feet. The immense flower heads of the double fists are the most continuous bloomer of any of the perennials. Pkt., 10c; 2 for 15c.

SHASTA DAISY (Alaska)

Hardy perennial. A bed of these giant white Daisies in full bloom is a sight worth seeing. Flowers measure 3 1/2 inches bore on stems 18 inches long. The numerous long, slender-stemmed white flowers rise most gracefully amidst the bed of green, blooming all through the spring and summer months.

Of the many varieties the Alaska is the best bloomer and hardest. Blooms first season. Pkt., 5c; 1/4 oz., 20c.

ENGLISH DAISY DOUBLE

This hardy, early spring blooming plant is easily grown. Maximum height 6 inches, producing flowers in various shades of pink and white, double mixed; Chinese varieties. Pkt., 8c; 1/4 oz., 25c.

PAINTED DAISY

Pyrethrum Roseum—Height 2 feet. This hardy Persian Daisy has long been a favorite in European gardens. The plants are erect growing, consisting of upright slender stalks adorned with fern-like leaves and carrying nine terminal blooms per stem. Pkt., 10c.

Single Mixed. Radiating petals in many tones of rose and red about a golden center. Pkt., 7c; 1/4 oz., 25c.

GOLDEN MARGUERITE DAISY

The golden yellow flowers are borne on long 2-foot stems from July until frost. The sweet scented flowers are about 2 inches across and will keep perfectly for over a week after being cut. Pkt., 5c; 1/4 oz., 25c.

PEONY SEED

We gathered a quantity of these seeds, more than we shall need for our own use in the production of new varieties. Peony seeds, you understand, do not reproduce true to their parents, but produce different varieties of flowers single, semi-double and double. It is really worth while watching them from year to year, and as new varieties are produced in this way, you might secure something better than any of the varieties of today. They are very easily grown and bloom the second year after planting. Pkt., 10c; 1/2 oz., 35c; 1 oz., 50c.

PERENNIAL FLAX

Linum Perenne Sibiricum—A rich blue-flowered Flax. The attractive flowers last only a day, but they are borne continuously from July on; 15 inches tall. Pkt., 5c; 1/2 oz., 15c.

SWEET PEAS PERENNIAL

Hardy vines of robust growth resembling Sweet Peas but the flowers are not fragrant. Bloom through a long season and are excellent as cut flowers. Height, 4 feet. Colors: White, pink and rose. Pkt., 5c; 1/2 oz., 15c; 1 oz., 25c.

SWEET WILLIAM

Dwarf Double Mixed—These seldom grow over 6 to 8 inches high. Profuse bloomers, excellent for borders or bedding. Pkt., 5c; 1/2 oz., 15c.

SNOW IN SUMMER

Cerastium Tomentosum—A valuable spreading plant with attractive silvery white foliage and showy white, star-shaped blooms covering the plants during May and June. When in full bloom, the plants resemble a drift of snow. A wonderful low border plant and perfect for rock gardens. Will stand any amount of heat and sun. Pkt., 10c; 2 for 15c.

VIOLET

Sweet Violet—Well known, old fashioned hardy garden violet; prized for their fragrance and pretty blue and white flowers. Pkt., 10c.

HOLLYHOCK

Double Mixed—We have improved this old garden favorite until it is the highest and best type yet developed. Colors ranging from white and apricot, rose, cerise and crimson, to the darker shades of wine, maroon, and black. Every garden should have some of these majestic flowers. Pkt., 7c; 1/2 oz., 20c.

Mammouth Fringed Single Mixed—The flowers of this grand variety range from 4 to 6 inches across, single, finely fringed and curled. Pkt., 5c; 1 oz., 20c.

HOLLYHOCK DOUBLE "IMPERATOR"

Rising to a stately height it bears flowers 5 1/2 to 6 1/2 inches across, consisting of wide outer petals elegantly frilled and deeply fringed, in the center of which appears a very double rosette, about 2 inches across, the whole suggesting a crested Begonia on a giant scale. The plants branch from the base, forming a majestic clump. Pkt., 15c; 2 for 25c.
Cossack alfalfa is no longer an experiment. It is many years now since Prof. N. E. Hansen of Brookings brought the first seed over from the wilds of Siberia where it had been growing under much more rigid climatic conditions than we find in any part of the United States. Today it has proved itself of infinite value to the farms of the great Northwest, since it grows and thrives in spite of low temperatures and does unusually well even on dry, high land. It has proved to be the best alfalfa from the Gulf of Mexico well up into Canada, producing plants in the far north seven feet high, and producing more hay per acre than any other alfalfa.

A few thousand dollars invested in Prof. Hansen’s search for alfalfa in Siberia have returned themselves to the people of the United States many thousand fold. Every farmer owning land that would not produce common alfalfa profitably and successfully is now assured of a hardy alfalfa that will produce paying crops on that ground. We find the Cossack alfalfa is very frost resistant, in fact, almost frost-proof as heavy freezes in the middle of May killed back and destroyed the first cutting of common alfalfa while the Cossack continued to grow and produce the regular crop of hay. We find in the fall it will be green and suitable for pasture, long after all other varieties are frozen and brown.

Price of Cossack seed in sealed bags: 1 lb., 40c; 5 lbs., $1.75; 10 lbs., $3.30; 25 lbs., $7.90; 60 lbs. (1 bu.), $17.85; 100 lbs., $29.75.

**GRIMM’S ALFALFA**

Purity 99%, Germination 90% or Better

This alfalfa was introduced into Minnesota from Germany in 1857 by a German immigrant named Grimm. The seed was planted on his farm, and plants from the original planting are still growing from the original planting.

We have a reasonable supply of this variety of seed to offer. 99% Pure and will germinate 90% or better.

Grimm’s Alfalfa seed prices are where they belong. We quote Grimm’s alfalfa at a competitive price, one that gives us a fair profit on each transaction. Why pay more? 1 lb., 50c; 5 lbs., $1.65; 10 lbs., $3.10; 25 lbs., $7.45; 60 lbs. (1 bu.), $16.65; 100 lbs., $27.75.

**NEBRASKA GROWN ALFALFA**

Purity is over 99%, germination 90% or better. For those living south of Yankton, this alfalfa should be very satisfactory. At this low price you will save considerably money on your purchase of alfalfa seed. 1 lb., 35c; 5 lbs., $1.50; 10 lbs., $3.00; 25 lbs., $6.70; 60 lbs. (1 bu.), $14.85; 100 lbs., $24.75.

We guarantee that all seed ordered from this catalog will prove of satisfactory germinating test to you; that is, on arrival of the seed test it, and if it does not prove satisfactory you may return it to us within twenty days after receipt of the seed by you, returning at our expense and your money, together with the transportation charges which you have paid, will be refunded. It is so manifestly impossible for a seller of any perishable article to be responsible for what may happen to it after it leaves his hands, especially one like seeds, which are planted under varying conditions of soil and climate, that we and all other American seed houses disclaim responsibility as to the crop that may be raised from seed which we sell. At the same time, in case of failure to secure proper results caused from some inherent fault in the seeds, the House of Gurney, Inc. accept responsibility not for the crop, but to the extent of the amount of money paid for the seed if immediately advised; or, seeds may be returned.
Why not plant the best seed corn, when it costs less than 50c per acre? Why pay more when you can buy the best from Gurney's at this low price? All seed corn germinates 90% or better.

GURNEY'S MINNESOTA NO. 13

The Corn That Added Millions of Dollars to Farm Values and Crowded the Corn Belt 300 Miles Farther North

When the Minnesota Department of Agriculture originated and disseminated Minnesota No. 13 they could not realize the countless millions of dollars they were adding to the agricultural wealth of the Northwest. This was the forerunner of the early varieties that made corn-growing profitable much farther north than it had been previously. They gave us a high yielding, high protein content corn that would grow several hundred miles north of the profitable corn-producing belt heretofore.

Minnesota No. 13 is a yellow variety and has been grown successfully as far north in North Dakota and Montana as the Canadian line. With us May 25 planting matures about September 1, depending, of course, on the season. This variety is outyielding many later varieties by actual weight per acre. We do not advise Minnesota No. 13 for the main crop further north than central North Dakota because unusual weather conditions might destroy the crop further north than that. To the people of Kansas, Oklahoma, Iowa, and Nebraska, who are short feed from the previous crop, plant Minnesota 13 early for feed or hogging down. We can furnish two different types of Minnesota No. 13—the early type suitable for the North and the medium type, a larger corn, for southern Minnesota and central South Dakota. Early Type Minnesota No. 13, 1 lb., 20c; 14 lbs., $1.20; 28 lbs., $2.10; 1 bu., $3.75; 5 bu., $18.25; 10 bu., $35.50.

Medium Type Minnesota No. 13, 1 lb., 20c; 14 lbs., $1.20; 28 lbs., $2.10; 1 bu., $3.75; 5 bu., $18.25; 10 bu., $35.50.

We have originated and introduced many of the best varieties of early corn. Gurney's August 15th and Gurney's Rainbow Flint are two of our own creations.

We are glad to furnish samples of seed corn.

Order Now—Good Seed Is Scarce
DEWOLF'S EXTRA PROLIFIC
[See Colored Picture on Front Cover]

This is another production of the late M. J. DeWolf. This corn matures well to the central part of South Dakota and can be grown in the same district as improved Minnesota No. 13, but will outyield it. This bright yellow corn will outyield any other early corn and should be planted in the central half of South Dakota and southern Minnesota. We believe that if you will try this corn one year you will discard the corn you are now growing and plant. DeWolf's Prolific exclusively. 1 lb., 20c; 14 lbs., $1.25; 28 lbs., $2.50; 1 bu., $19.50; 10 bu., $38.00.

GURNEY'S AUGUST 15th

The Earliest Dent Corn Grown

This corn is of our own origination and is nearly identical with Minnesota No. 23. Ours was introduced and catalogued for the first time in 1915. DEWOLF'S EXTRA PROLIFIC

WIMPLE'S YELLOW DENT

A famous Dakota variety of corn. It originated with Mr. Wimple, a corn specialist of South Dakota, and is now largely planted over the corn belt throughout the northern states. This variety, which has had a lot of careful work put on it, is a bright yellow corn, producing kernels of unusual depth. It gives good results anywhere south of central South Dakota, southern counties in Minnesota and all points south. The ears grow well upon the stalk and the stalks are from 7 to 9 feet high. 1 lb., 20c; 14 lbs., $1.20; 28 lbs., $2.10; 1 bu., $3.75; 5 bu., $18.25; 10 bu., $35.50.

RED COB ENSILAGE CORN

Among all the varieties of Ensilage corn, this one gives the greatest amount of green forage per acre, amounting on rich land and proper cultivation to as much as 10 tons. The fodder is sweet, tender and juicy, growing to a height of 8 to 12 feet. It is easier, and the first cost is far less, to sow the ordinary field corn for ensilage purposes, but the thoughtful farmer will consider quantity and quality of the products as of first importance. 28 lbs., $1.15; 1 bu., $3.45; 5 bu., $16.75; 10 bu., $32.50.

PRIZE WINNING CORN

The Wimple's, Reid's and DeWolf's corn we are offering is all from prize winning strains.

REID'S YELLOW DENT

We have grown and selected a Reid's Yellow Dent that would be satisfactory to the planter in the southern tier of counties in South Dakota, northern Nebraska and northern Iowa. Reid's Yellow Dent is the ideal corn where it can be safely grown. It is too late for any place north of the northern tier of Iowa. Reid's corn will please you in every way. It is early enough to get perfectly ripe in a normal season and large enough to produce an immense crop. 1 lb., 20c; 14 lbs., $1.25; 28 lbs., $2.25; 1 bu., $4.00; 5 bu., $19.50; 10 bu., $38.00.

EARLY MURDOCK

Early Murdock is a high yielding yellow corn, slightly larger and rougher than Minnesota No. 13. It is nearly as early and can be planted in the southern two-thirds of South Dakota and the southern one-third of Minnesota.

The stalks are strong, grow from 6 to 8 feet tall, and many stalks produce two ears. A very good main crop corn for the North. 1 lb., 20c; 14 lbs., $1.20; 28 lbs., $2.10; 1 bu., $3.75; 5 bu., $18.25; 10 bu., $35.50.

GEHU FLINT

The earliest flint corn grown. Makes good yields of both corn and fodder. A small yellow flint which produces from 2 to 3 ears on a stalk. Fine for late planting or for hogging down. 1 lb., 20c; 14 lbs., $1.40; 28 lbs., $2.50; 1 bu., $4.50; 5 bu., $22.00.

RAISE WHITE CORN AND GET HIGHEST MARKET PRICES

SOUTH DAKOTA WHITE DENT

Gurney’s South Dakota White Dent Corn originated in the Rosebud Section of South Dakota. It is a medium early, large white corn...early enough so that it gets ripe in the comparative short season of the Rosebud country, and still it is large enough so that in a good year, it will yield from 60 to 65 bushels per acre.

The ears are from 8 to 10 inches long. The kernels are of medium depth and are not mixed with yellow in any way. Gurney’s South Dakota White Dent Corn will stand drier corn than any other Dent corn we have ever raised. We firmly believe that this variety, over a period of years, will outyield any Dent corn, because its early maturity assures a crop every year.

During the last two or three years, White Corn in car lots has been worth from $5 to $15 more per bushel on the market than yellow varieties. It is used for White Corn Meal, Hominy, and for many other food purposes where yellow corn is not suitable.

Our South Dakota White Dent Corn will give wonderful satisfaction anywhere in Nebraska, Southern South Dakota, Southern Minnesota, and Northern Iowa.

Although our supply is limited and good seed is scarce, our prices are at the lowest level: 1 lb., 20c; 14 lbs., $1.20; 28 lbs., $2.10; 1 bu., $3.50; 5 bu., $18.25; 10 bu., $35.50.

For the last four or five years, white corn has brought from $5 to $15 more per bushel on the market than yellow corn.

NORTH DAKOTA WHITE DENT

This extremely early White Dent Corn has been thoroughly tried out in the extreme north and has made good, maturing in North Dakota in any ordinary season.

In size like Minnesota No. 13, Yellow Dent, and like the No. 14, stands up well even in the extreme north. Stalks grow to a height of seven feet, ears are up three feet from the ground, making it easily harvested with the Corn Binder. The seed has been bred for yield and earliness, and will withstand more extremes of weather than any other Corn grown, with reasonably good farming will yield 40 bushels to the acre. 1 lb., 20c; 14 lbs., $1.40; 28 lbs., $2.50; 1 bu., $4.50; 5 bu., $22.00; 10 bu., $43.00.

SILVER KING

This extremely valuable White Corn originated with the Wisconsin Agricultural College at Madison, Wis., and has been distributed by them over the whole Northwest.

It is large, medium early, and the most beautiful of any white corn. The stalks grow from 7 to 9 feet tall, ears 8 to 12 inches long, and yields of 65 bushels per acre are not uncommon.

It is suitable for northern Iowa and Nebraska, southern South Dakota and Minnesota. 1 lb., 20c; 14 lbs., $1.20; 28 lbs., $2.10; 1 bu., $3.75; 5 bu., $18.25; 10 bu., $35.50.

NORTHEASTERN DENT

Our supply of Northeastern Dent Corn is grown from Yankton to as far north as corn matured. We place this and August 15th at the head of the list of the earliest varieties of dent corn, suitable in most sections for the early harvest of the very best in northern sections for the main crop variety. In the southern sections, where on account of drought you failed to get a good crop last year, you should plant at least an acre enough to supply your wants until the later varieties mature.

Northwestern Dent is a red corn with a lighter colored cap. Stalks 6 to 7 feet tall, ears 7 to 10 inches in length, and has produced 50 bushels of corn. Yankee 1 lb., 20c; 14 lbs., $1.40; 28 lbs., $2.50; 1 bu., $4.50; 5 bu., $22.00; 10 bu., $43.00.

GURNEY'S PEDIGREED SEED GRAIN

Many acres of land go to waste each year because seed grains are sown without much thought as to purity and quality. Fields infested with Mustard represent the result obtained from careless handling and purchase of poor quality seed. When uncleaned or impure seed grain is used for seed, noxious weeds are planted in a few hours which it takes years of effort to get rid of. Assure yourself of greater production by buying Gurney's Pedigreed Seed.

BARLEY

• WISCONSIN PEDIGREE No. 38

The Best Maltng Barley

This new malting barley was originated at the Wisconsin Experiment Station.

It is a smooth awned barley, will outyield any other barley grown, stands hot, dry weather very well, and will make a crop of nice, plump barley when other varieties may be a total failure.

Malting barley brings the highest prices and Wisconsin is large, the one small field of Thatcher wheat yielded 26 bushels per acre; other wheat made from nothing to 5 bushels of very poor quality wheat.

Thatcher is a good milling wheat, grows on strong, stiff straw, and will stand up very well. It started in this wonderful new wheat this year. Don't take chances on losing your entire wheat crop from rust. 1 lb., $2.25; 2 lb., $4.50; 5 lb., $10.50; 10 lb., $20.90; 50 lb., $100.00.

• VELVET

High Quality Malting Barley—A heavy yielder, with stiff straw, and more disease resistant than other varieties. Velvet barley is entirely free from troublesome awns.

1 lb., $1.60; 2 lb., $3.10; 5 lb., $7.25; 10 lb., $14.25; 50 lb., $70.00.

WHEAT

• THATCHER

This new wheat from the Minnesota Experiment Station has proved to be the highest yielding and most rust resistant of any wheat ever put out.

During the rust epidemic of 1935 at Fargo, North Dakota, Thatcher yielded 33 bushels per acre, Ceres 22 bushels, and Marquis 13 bushels. In Yankton County the one small field of Thatcher wheat yielded 26 bushels per acre; other wheat made from nothing to 5 bushels of very poor quality wheat.

Thatcher is a good milling wheat, grows on strong, stiff straw, and will stand up very well. Get started in this wonderful new wheat this year. Don't take chances on losing your entire wheat crop from rust. 1 lb., $2.25; 2 lb., $4.50; 5 lb., $10.50; 10 lb., $20.90; 50 lb., $100.00.

• BURBANK QUALITY

A large seeded white spring wheat more resistant to Black Rust than most varieties. Terminal Markets have pronounced this a good bread-making wheat. It will outyield other varieties 1 bu., $1.65; 2 bu., $3.20; 5 bu., $7.75; 10 bu., $15.25; 50 bu., $75.00.

• CERES

Outyields either Kota or Marquis. It is highly resistant to stem rust. The seed is northern grown, thoroughly cleaned, and of the finest quality. It is resistant to stem rust. Our 1935 yield. The seed is much larger than other varieties. 1 bu., $3.00; 2 bu., $5.90; 5 bu., $14.50; 10 bu., $28.50; 50 bu., $140.00.

• IOGOLD OATS

This new early oat was originated in 1927 in the Iowa Experiment Station. It combines the advantages of stiffness of straw, high yields per acre, and does exceptionally well on peat lands. Yields of 70 bu. per acre are not unusual. We have unusually fine seed this year. It pays to plant good seed. 1 bu., 80c; 3 bu., $2.30; 10 bu., $7.20; 50 bu., $35.00.

• GOPHER OATS

An early maturing, open panicled, white grain, stiff-straw variety. It is an excellent yielder, and does exceptionally well on peat lands. Yields of 70 bu. per acre are not unusual. We have unusually fine seed this year. It pays to plant good seed. 1 bu., 80c; 3 bu., $2.30; 10 bu., $7.20; 50 bu., $35.00.

• BISON WILT RESISTANT

It is famous for its almost complete resistance to wilt, coupled with vigorous growth and heavy yields. The seed is northern grown, thoroughly cleaned, and of the finest quality. It is resistant to stem rust. Our 1935 yield. The seed is much larger than other varieties. 1 bu., $3.00; 2 bu., $5.90; 5 bu., $14.50; 10 bu., $28.50; 50 bu., $140.00.

• ARGENTINE

An importation from Argentina which is making very high yields. This large seeded oat commands about five cents per bushel by crushers over other varieties. 1 bu., $3.00; 2 bu., $5.90; 5 bu., $14.50; 10 bu., $28.50; 50 bu., $140.00.

• SPELTZ OR EMMER

A crop, doing well under almost any conditions of soil or climate, which is neither rye, wheat, nor barley, but looks like a combination of them. It resembles wheat more closely than any. High in food value, it produces enormous crops where wheat will not grow. 50 lbs., $1.90; 100 lbs., $3.50; 500 lbs., $17.25; 1,000 lbs., $34.00.

Buy Enough Grain to Get a Start in Pure Seed.
Each year the American farmer must give more thought to the problem of maintaining the fertility of the soil on his farm. When his father or grandfather exhausted the soil on his Pennsylvania or Ohio farm, he could go west and start again on virgin soil. For the American farmer of today there is no more west, he must keep his present farm.

**SCARIFIED SWEET CLOVER**

Sweet clover is one of our most valuable pasture plants. It makes a good pasture two or three weeks earlier than almost any other grass or clover. It will stand close pasturing, in fact, if kept closely pastured it will continue to grow until freezing weather.

Sweet clover hay is equal to alfalfa hay in feeding value. Stock like it just as well, and it will yield as many pounds of cured hay per acre as alfalfa.

Sweet Clover planted alone or with small grain and plowed under for green manure is the best and cheapest method of keeping your farm fertile. White Blossom Sweet Clover grows taller and faster than any other and is the best for this purpose.

Unless the seed is scarified you will have trouble with germination. Consequently, without one cent of extra charge to our customers, we are sending out only scarified seed. With scarified seed we often have 95 per cent germination. Consequently, with scarified seed we often have 95 per cent germination in a seven day test. 1 lb., 25c; 5 lbs., 90c; 10 lbs., $1.60; 25 lbs., $3.50; 60 lbs., $7.80; 100 lbs., $12.75.

**SCARIFIED TALL WHITE BLOSSOM SWEET CLOVER**

Yellow Blossom Sweet Clover is nearly as good as the white blossom variety for soil-building but produces a better forage and hay crop. It produces finer, leafier stems which are easily cured. It grows to a height of three or five feet and under favorable conditions produces two or four tons of fine hay to the acre. 1 lb., 25c; 5 lbs., 90c; 10 lbs., $1.60; 25 lbs., $3.50; 60 lbs., $7.80; 100 lbs., $12.75.

**YELLOW BLOSSOM DWARF SWEET CLOVER**

Dwarf Sweet Clover originated in Grundy County, Illinois, which has greater value for hay and pasture purposes than the common variety of Sweet Clover. It is three weeks earlier, ripening ahead of frosts, is leafier, finer stemmed and grows to a convenient height for hay purposes. The hay is of unusually good quality. 1 lb., 25c; 5 lbs., 90c; 10 lbs., $1.60; 25 lbs., $3.50; 60 lbs., $7.80; 100 lbs., $12.75.

**GRUNDY COUNTY DWARF SWEET CLOVER**

This is a special strain of white blossom Dwarf Sweet Clover for seed has been a very profitable crop, often paying $25.00 or more per acre for the seed, besides lots of hay and pasture.

When raising the seed the first crop is usually cut for hay. The second crop has plenty of time to mature, and being shorter and more branched will produce a larger crop of seed.

**SWEET CLOVER FOR SEED**

Sweet clover for seed has been a very profitable crop, often paying $25.00 or more per acre for the seed, besides lots of hay and pasture.

When raising the seed the first crop is usually cut for hay. The second crop has plenty of time to mature, and being shorter and more branched will produce a larger crop of seed.

**NITRAGIN PRICES ARE LOWER**

**DWARF BROOM CORN**

Raising Broom Corn is one of the most profitable side lines for the farmer or market gardener, as an acre of Broom Corn will pay you as many dollars as several acres of corn or small grain. The Dwarf Broom Corn stands up better than the taller varieties, is practically free from crooked brush. The fiber is long and fine and always brings the highest market price. 1 lb., 25c; 5 lbs., 75c; 10 lbs., $1.20; 25 lbs., $2.40; 50 lbs., $4.45; 100 lbs., $8.25.

**NITRAGIN**

Restores and Maintains Soil Fertility

**ALL NITRAGIN IS POSTPAID**

Alfalfa—Sweet Clover—Red Clover—Alsike Clover and Soy Beans Should Be Inoculated With Nitrigin When Planted. No Matter How Good Your Legume Crops are Without Inoculation, They Will Be Better Inoculated.

**NITRAGIN PRICES ARE LOWER**

CLOVER, TIMOTHY AND GRASS SEED

MEDIUM RED CLOVER

We must maintain the fertility of the soil. Medium Red Clover can be grown successfully on many fields where alfalfa fails. Sow Clover liberally. Your farm needs clover. Your soil loses rapidly in fertility if you stop growing it. Medium Red Clover lives two years or more, grows about two feet high and makes two crops a year, yielding about three tons of cured hay per acre. Clover hay is very nutritious, stocked fed on it requiring less grain. Does well on a great variety of soils, thriving luxuriantly on strong, well drained loams. It is the best of the reds for rotations and increases succeeding crops from 25 to 60%.

Our red clover seed is all northern grown. This seed will be much better for the northern planter and also for those south of us than seed grown in Kansas and Nebraska. It complies with every State law. Sow about 12 to 15 lbs. to the acre.

1 lb., 40c; 5 lbs., $1.70; 10 lbs., $3.20; 25 lbs., $7.50; 60 lbs. (1 bu.), $17.40; 100 lbs., $28.50.

MAMMOTH RED CLOVER

This grows much taller than Medium Red, with larger, leafier stalks. It will produce more hay on poor ground than any of the other clovers. (60 lbs. per bu.)

1 lb., 40c; 5 lbs., $1.70; 10 lbs., $3.20; 25 lbs., $7.50; 60 lbs. (1 bu.), $17.40; 100 lbs., $28.50.

ALSIKE AND TIMOTHY MIXTURE

20 Per Cent Alsike—80 Per Cent Timothy In the Northwest there is a great demand for a mixture of Alsike and Timothy Seed mixed in the right proportion for sowing. This mixture is especially valuable for low, wet places, for permanent meadow or for pasture, and on account of the very low price at which we offer it, you can seed down more of your farm to grass.

1 lb., 30c; 5 lbs., $1.60; 10 lbs., $3.10; 25 lbs., $7.50; 50 lbs., $12.25.

TIMOTHY

Timothy is the king of all grasses in our country; as a hay crop it has long been the standard and it is adapted to a wider range of conditions and is grown over a wider area than other grasses.

This is the year to increase your timothy acreage. Our seed is all northern grown; thoroughly reclaimed, the best timothy seed on earth. You know what timothy is, and you can grow it. A few years ago it was almost unknown to the farmers and stock growers of South Dakota, today it is growing successfully in the eastern half of South Dakota, from the south to the north line. It sown alone, plant from 10 to 15 pounds per acre. (45 lbs. per bu.)

1 lb., 25c; 5 lbs., $1.60; 10 lbs., $3.10; 25 lbs., $7.50; 50 lbs., $12.50; 100 lbs., $29.25.

ALSIKE CLOVER

Alsike can be grown on soil that is slightly acid or sour, as where other clover or alfalfa will not grow. It can be grown on heavy, wet or low soil that sometimes becomes waterlogged, and it also endures drought well.

Alsike Clover is exceptionally leafy, frequently producing as much hay as Mammoth. Alsike is the hardiest of all clovers.

Withstands the severest cold and does not readily winter-kill or heave out of the ground with frost, and readily reseeds itself. Grows about two to three feet high.

This clover prefers damp, moist, loamy soil, but it will also grow fairly well on stiff clays. Here in the Northwest it is extensively grown mixed with Timothy. Both varieties are well adapted for this soil and they ripen at the same time. Fine for pasture on low grounds. Sow either in spring or fall using about 8 lbs. of seed per acre.

1 lb., 40c; 5 lbs., $1.65; 10 lbs., $3.10; 25 lbs., $7.25; 60 lbs. (1 bu.), $16.20; 100 lbs., $26.00.

WHITE DUTCH CLOVER

A low, close-growing clover; round, white heads; very fragrant; best adapted to moist soils, but does well on dry land.

Used extensively for lawns, either mixed with Kentucky Blue Grass or other lawn grasses, also an excellent pasture Clover, forming with Kentucky Blue Grass the finest and most nutritious food for sheep and cows. Sow or 6 pounds to the acre. Weight, 60 lbs. per bu.

1 lb., 35c; 5 lbs., $1.60; 10 lbs., $3.10; 25 lbs., $7.30; 50 lbs., $13.75; 100 lbs., $26.50.

PERENNIAL PASTURE MIXTURES UPLAND AND LOWLAND

Most pastures in the Northwest are dead or else the grass is so thin that the weeds have taken possession. Why not replant at least part of your pastures with Don Gurney’s Upland or Lowland Pasture Mixtures?

In ordering pasture mixture, state whether it is for high or low land.

Our Pasture Mixtures are made up principally of the hardy, native grasses which have withstood the last six years of drought—such as Bromus Inermis, Avena fatua, Bromus Over 5 Feet Tall, Blue Grass, Red Grass, Orchard Grass, Almisc, Agrostis, etc. This makes a good pasture from early in the spring through the hot, dry summer and late in the fall until the pasture is covered with snow.

Don Gurney with an Armful of Bromus Over 5 Feet Tall

Harvesting Western Wheat Grass at Carter, S. Dak.

Planting Will

Sincerely yours,

New York Mills, Minn.

Dear Sirs:

We are sending you our seed order again this year. During the numerous years that you have served us, we are glad to say that we have been more than satisfied. Even during the drouth years we got our cellar full of vegetables and could give some to our friends.

Sincerely yours,

Mrs. Matt Koitila

Clovers and Grass Seed Require a Firm Seed Bed
PLANT THAT PASTURE AND LAWN THIS YEAR

RYE GRASS

Makes more growth the first year planted than any other perennial grass, making a wonderful fall pasture, and if the season is favorable, a good hay crop. One of the best and most nutritious grasses for permanent meadows and pastures. It endures close cropping and recovers quickly after cutting. Does best on strong, rich soils.

Grows over 2 feet tall, very leafy, and produces about 2 tons of good quality hay per acre. Sow 20 to 25 pounds per acre. 1 lb., 20c; 5 lbs., 75c; 10 lbs., $1.20; 25 lbs., $2.50; 50 lbs., $4.35; 100 lbs., $8.40.

CRESTED WHEAT GRASS

The hardest and most drought resistant grass yet discovered. Introduced by the Department of Agriculture from the Steppes region of Siberia, it is a slightly heavier yielder of hay than bromus, producing 1½ tons per acre. It becomes green in spring earlier than bromus and stays green later in the fall. The crested wheat will spread widely and completely cover the ground. Plant from 10 to 15 pounds per acre.

Where you are unable to water your lawn and can not use regular lawn grass, Creasted Wheat Grass is a very good substitute, as it makes a firm, level sod and will stand close cutting. 1 lb., 75c; 5 lbs., $3.50; 10 lbs., $6.75; 25 lbs., $16.25; 50 lbs., $32.00; 100 lbs., $63.00.

MEADOW FESCUE

Or English Blue Grass—Now, this grass succeeds well in almost all soils from high, dry land to moist, wet land standing the summer heat excellently. This grass is highly recommended as a pasture grass being one of the earliest in the spring and latest in the fall. It is highly recommended as a large yielding, nutritious pasture and hay grass for all sections of the country. Sow either in the spring or fall at the rate of twenty pounds per acre. 1 lb., 25c; 5 lbs., $1.00; 10 lbs., $1.75; 25 lbs., $3.95; 50 lbs., $7.25; 100 lbs., $13.90.

WESTERN WHEAT OR SALT GRASS

Is a native of western Dakota, and this year, the first since the great drought, has come back stronger than ever, taking the place of many of the other grasses which could not stand four years of drought and grasshoppers. It makes a good yield of extra quality, highly nutritious hay. Cattle fed Western Wheat Grass can be corn fed and marketed in a much shorter feeding period than when fed any of the softer grasses. Our stock is limited and you should order early. Plant at the rate of 20 pounds per acre. 1 lb., 25c; 5 lbs., $1.15; 10 lbs., $2.00; 25 lbs., $4.45; 50 lbs., $8.45; 100 lbs., $16.25.

SHADY LAWN MIXTURE

Certain fine grasses are used that show a particular aptitude for maintaining their growth in the shade of trees. These grasses are generally shy seeders and consequently the seed is high priced, but the results obtained will fully warrant the cost.

1 lb., 35c; 5 lbs., $1.70 Postpaid.
Not Prepaid 10 lbs., $2.80; 25 lbs., $6.55; 50 lbs., $12.60; 100 lbs., $24.50.

KENTUCKY BLUE GRASS

This famous grass does well almost everywhere if the soil is fairly rich, moist, and moderately well-drained.

Kentucky Blue Grass will last for many years as the plants are fed from underground roots and rarely need reseeding. It withstands heavy feeding remarkably well, forming a firm, tough sod. Kentucky Blue Grass should be sown as early as possible to give it a good start before the weeds spring up. It is the best of all grasses for lawns, golf courses, and parks. When sown alone, use 35 to 40 pounds per acre. Fancy chafed seed. Perl lbs., 35c; 5 lbs., $1.65 Postpaid; Not Prepaid 10 lbs., $2.80; 25 lbs., $6.60; 50 lbs., $12.50; 100 lbs., $23.90.

CE CITY LAWN MIXTURE

This mixture consists of Kentucky Blue Grass and White Dutch Clover mixed in the correct proportions to make a rich velvety lawn the first year. Use this mixture for lawns where you have a supply of water available. Plant as early in the spring as possible using 1 lb. of seed to each 200 sq. ft. of surface. Water liberally. By the first of July, your lawn will be green and beautiful and far enough advanced to withstand the hot weather of July and August.

Prices: 1 lb., 35c; 5 lbs., $1.70 Postpaid; Not Prepaid, 10 lbs., $2.80; 25 lbs., $6.55; 50 lbs., $12.60; 100 lbs., $24.56.

SHADY LAWN MIXTURE

Very similar to Kentucky Blue but grows a little coarser. It can be grown on poor soil where Kentucky will not thrive. It grows about two feet high, making exceptionally fine hay greatly relished by stock of all kinds. As a pasture for dairy cows, it is especially valuable.

It is also a very popular lawn grass where Kentucky will not thrive.

1 lb., 35c; 5 lbs., $1.50; 10 lbs., $2.50; 25 lbs., $5.60; 50 lbs., $11.50; 100 lbs., $22.40.

RED TOP

Choice (Agrostis Vulgaris)—A permanent and very hardy, native perennial grass succeeding best on uncleared land, making a good pasture when fed close. It is also valuable for low, wet meadows producing large crops of good hay, often producing 2 to 3 tons per acre. It accommodates itself to a variety of soils, however, even to quite dry situations and stands a hot climate admirably. Grows about half as tall as Red top. One of the grasses that will stand a slight sour soil. Plant 8 to 12 pounds per acre. 1 lb., 5c; 5 lbs., $1.50; 10 lbs., $2.50; 25 lbs., $6.90; 50 lbs., $11.50; 100 lbs., $22.20.

REED CANARY GRASS

A magnificent grass for wet, low-lying, poorly drained soils. In fact, the only grass we know of for reclaiming waste, marshy lands. On many farms are to be found low wet situations where neither Kentucky Blue nor Red Top, Alkali, or anything else will grow, and for these situations, Phalaris or Reed Canary Grass is the thing to plant. The leaves are quite broad and the plant flourishes, often growing 5 to 7 feet high. As the seed shatters so easily and present acreage is limited, the seed is expensive but it is a real investment.

1 lb., 35c; 5 lbs., $1.75; 10 lbs., $2.80; 25 lbs., $5.95; 50 lbs., $11.50; 100 lbs., $22.25.

CAPITOL LAWN MIXTURE

It is made up of the seed of several fine leaved grasses, selected and recommended by the experts of the Agricultural Department at Washington. We can conceive of no better authority on the subject than these painstaking investigators. It may be said here concerning all these special purpose grass mixtures that they are grown and recommended only by the United States Experimental Stations. The mixture offered here for lawn purposes has been tested thoroughly under the several conditions and the results obtained will fully warrant the cost.

For the actual lawn mixture, see page 47, for city lawn mixture, see page 45.
SUDAN GRASS

Sudan Grass is unquestionably the best forage crop that can be raised in the North. It should be cut when about 3 feet high. Handled this way you will always get two cuttings a year and generally three, yielding from 4 to 6 tons of dry hay per acre. Even if left to grow 8 or 9 feet high the stalks will seldom be any thicker than a lead pencil. The greatest value of Sudan is in green pasture for the cows in the summer when pastures are poor and the milk flow is low.

Sudan Grass should not be planted until the ground has warmed up thoroughly after corn planting season. Plant 25 pounds per acre.

1 lb., 20c; 5 lbs., 60c; 10 lbs., 85c; 25 lbs., $1.65; 50 lbs., $2.85; 100 lbs., $5.20; 500 lbs., $25.00.

SOY BEANS

Soy Bean oil has come to the front in the past few years as a valuable oil in the manufacture of paints. However, soy beans have a number of other important uses. It makes an excellent hay and is wonderful for silage when grown with corn. Soy beans are more resistant to frost than corn and they also stand hot weather. They are adapted to nearly all soils and do especially well in sandy soils. They are the only legume crop in every way and probably better for hay purposes. Manchu or Illini are equally good for fodder.

Soy beans should be planted at corn planting time or even later—as late as the 20th of June and give an excellent soy bean crop. They do best with shallow covering; and be sure to inoculate the seed with Nitragin before planting.

I L L I N I SOY BEANS

This new variety was developed at the Illinois Experiment Station. It seems to grow a little taller than Manchu, giving a heavier yield and is nearly as early. Almost as desirable as Manchu in every way and probably better for hay purposes. Manchu or Illini are equally good for fodder. For silage, plant the beans with corn using an equal number of pounds of beans and corn. When planting alone with a drill or seeder, use 80 lbs. per acre. When drilled in with a corn planter, use 40 lbs.

Soy beans as a hay crop are higher in protein content than alfalfa hay or field peas. An excellent hay for dairy cattle.

Hemp has been advertised as an exterminator of Creeping Jenny. We do not know that it has any value for this purpose but are offering the seed at a fair price. Hemp grows from 7 to 10 feet tall and it takes 30 pounds to plant an acre. 10 lbs., $1.00; 25 lbs., $1.85; 50 lbs., $3.25; 100 lbs., $6.00; 500 lbs., $29.50.
The farmers who planted cane and grain sorghums have watched these plants survive the dry, hot summer then begin to grow as soon as the fall rains started. In many cases they were able to keep most of their stock with this extra feed and did not have to sell at the low prices prevailing last fall. Every stock man I have asked said he wished he had planted more cane sorghum or Sudan.

WE MAY HAVE ANOTHER DRY YEAR

Don't be caught again without a reasonable acreage of drought resistant crops.

D. B. Gurney

Sorghums for Grain and Fodder

ANOTHER DRY YEAR HAS JUST PASSED

The farmers who planted cane and grain sorghums have watched these plants survive the dry, hot summer then begin to grow as soon as the fall rains started. In many cases they were able to keep most of their stock with this extra feed and did not have to sell at the low prices prevailing last fall. Every stock man I have asked said he wished he had planted more cane sorghum or Sudan.

WE MAY HAVE ANOTHER DRY YEAR

Don't be caught again without a reasonable acreage of drought resistant crops.

D. B. Gurney

Sorghums for Grain and Fodder

GROHOMA

This new dry-weather forage plant of the Kaffir family has made a good crop of fodder and seed when Corn was a total failure and even Kaffir, Milo and Cane made only half a crop. Grows from 6 to 10 feet high with leaves clear to the bottom of the stalks. The heavy heads are nearly a foot long and sometimes weigh 1 lb. each. There are record yields of over 100 bushels per acre. 1 lb., 25c; 5 lbs., 65c; 10 lbs., 85c; 25 lbs., $1.75; 50 lbs., $3.25; 100 lbs., $5.90; 500 lbs., $28.75.

FETERITA

Much like Kaffir Corn but matures 20 days earlier, the seed is larger and the heads better cured. They are so sweet that all livestock relishes cane more than most other rough feed, and will clean it up down to the last stem. 1 lb., 20c; 5 lbs., 60c; 10 lbs., 85c; 25 lbs., $1.50; 50 lbs., $2.50; 100 lbs., $4.75; 500 lbs., $23.00.

EARLY BLACK AMBER CANE

The earliest and best Cane for the North. Grows from 5 to 7 feet tall and matures in 90 days. The stalks are very leafy, slender and easily cured. They are drought resistant crops. - Much like Kaffir Corn but matures 20 days earlier, the seed is larger and the heads better cured. They are so sweet that all livestock relishes cane more than most other rough feed, and will clean it up down to the last stem. 1 lb., 20c; 5 lbs., 60c; 10 lbs., 85c; 25 lbs., $1.50; 50 lbs., $2.50; 100 lbs., $4.75; 500 lbs., $23.00.

KAFFIR CORN

Grows from 6 to 8 feet high, making a straight upright growth with enormous wide leaves. Excellent fodder. Matures in about 120 days. 1 lb., 15c; 5 lbs., 55c; 10 lbs., 75c; 25 lbs., $1.35; 50 lbs., $2.20; 100 lbs., $3.90; 500 lbs., $18.75.

EARLY FORTUNE OR RED HOG MILLET

This is the first of the early millets. It will yield well on the driest upland in the driest years in all our western states. When it is hulled and cooked for the table the Russians call it Kasha, and it is very extensively used in Europe. Russia, Siberia, and other parts of Asia, especially the driest regions. For feeding stock, poultry, and everything of that kind Proso is equal to or better than wheat. It will yield well on the driest upland in the driest years in all our western states. When it is hulled and cooked for the table the Russians call it Kasha, and it is very extensively used in Europe. Russia, Siberia, and other parts of Asia, especially the driest regions.

PROFESSOR HANSEN'S SIBERIAN PROSO

Matures in about 115 days. 1 lb., 15c; 5 lbs., 55c; 10 lbs., 75c; 25 lbs., $1.35; 50 lbs., $2.20; 100 lbs., $3.90; 500 lbs., $18.75.

MILLET

A wonderfully productive hay millet. It never grows as coarse as the German, making a better quality hay. It grows about 3 feet tall and is the earliest of the millets. Plant 50 pounds per acre. 1 lb., 20c; 10 lbs., 75c; 50 lbs., $2.15; 100 lbs., $3.85; 500 lbs., $18.75.

GERMAN MILLET

Few grasses or plants will ever make the enormous yields of hay and seed produced by the German Millet; 4 or 5 tons of hay and 60 or 70 bushels of seed per acre have been reported. It may be planted as late as July 1st and still mature. Plant 25 pounds per acre. 1 lb., 20c; 10 lbs., 75c; 50 lbs., $2.15; 100 lbs., $3.85; 500 lbs., $18.75.

WEATHER MILO

It grows about 30 inches tall and can be harvested either with a binder, header, or combine. Mature when Corn was a total failure and even Kaffir, Milo and Cane made only half a crop. Grows about 6 feet tall. The stem is very leafy and more slender than the other sorghums, making it one of the best for fodder. If you are short of grain, plant some Feterita for early feed. 1 lb., 20c; 5 lbs., 60c; 10 lbs., 85c; 25 lbs., $1.50; 50 lbs., $2.50; 100 lbs., $4.75; 500 lbs., $23.00.

DWARF HEGARI

The heads are shorter and more compact than Kaffir, suckers heavily, and makes high yields of both grain and forage. Grows 4 to 5 feet tall. Matures about 105 days. 1 lb., 20c; 5 lbs., 55c; 10 lbs., 75c; 25 lbs., $1.35; 50 lbs., $2.20; 100 lbs., $3.90; 500 lbs., $18.75.

ATLAS SORGO

Combines the sweet stalk and high fodder yield of the Cane and the high grain yield of the Kaffir. Grows from 7 to 10 feet tall. Produces the most and best fodder of any of the sorghums. Seed has been very scarce and many other inferior sorghums have been substituted for it. For this reason, we are offering only State Certified seed—which makes it cost more—but you are sure to receive genuine Atlas Sorgo. Matures in about 125 days. 1 lb., 20c; 5 lbs., 55c; 10 lbs., 75c; 25 lbs., $1.35; 50 lbs., $2.20; 100 lbs., $3.90; 500 lbs., $18.75.

EARLY BLACK AMBER CANE

The earliest and best Cane for the North. Grows from 5 to 7 feet tall and matures in 90 days. The stalks are very leafy, slender and easily cured. There are so sweet that all livestock relishes cane more than most other rough feed, and will clean it up down to the last stem. 1 lb., 15c; 5 lbs., 55c; 10 lbs., 75c; 25 lbs., $1.35; 50 lbs., $2.20; 100 lbs., $3.90; 500 lbs., $18.75.

PROFESSOR HANSEN'S SIBERIAN PROSO

Matures in about 115 days. 1 lb., 15c; 5 lbs., 55c; 10 lbs., 75c; 25 lbs., $1.35; 50 lbs., $2.20; 100 lbs., $3.90; 500 lbs., $18.75.

EARLY FORTUNE OR RED HOG MILLET

This is one of the most valuable crops that the farmer can raise, the seed being the richest and most valuable stock food that can be produced. A very much prized peculiarity of this millet is that the seed ripens while the hay is yet green, and will clean it up down to the last stem. 1 lb., 20c; 10 lbs., 50c; 50 lbs., $1.95; 100 lbs., $3.50; 500 lbs., $16.75.
IRISH COBBLER

Tests made at the State Agricultural College, Brookings, S. Dak. place Irish Cobbler as the best yielder over a three-year period.

It is second early, nearly round, pure white, a good keeper, and of very excellent quality, always cooking dry and mealy. On account of the short, stocky growth of the vine, this potato can be planted closer together than most varieties, ordinarily about one foot apart in the row.

Price per pound, sufficient for 16 hills, 35c postpaid; not prepaid, 10 lbs., $1.00; 50 lbs., $2.75; 100 lbs., $4.75; 500 lbs., $22.50.

GURNEY'S NORTHERN GROWN SEED POTATOES

Double Your Potato Yield By planting northern grown seed.

All our potatoes are grown in North Dakota and Minnesota in the Red River Valley.

EARLY OHIO

Early Ohio is the most popular early potato in this country. It is the Standard Extra Early the country over and other varieties are measured by it. Our stock of this variety is grown under conditions that make them cost more than common stock.

They are selected, with the utmost care, and the result is grand, such as to delight every one who appreciates a good potato. 5 lbs., 40c; 15 lbs., $1.20; 60 lbs., $2.15; 100 lbs., $3.50; 300 lbs., $9.90; 600 lbs., $19.50.

EARLY JERSEY

This variety is the most satisfactory for northern planting. We can furnish these for shipment about April 1st. The potatoes should be planted by the 10th of April, the sprouts transplanted from the 15th of May to as late as July 1st. The potatoes must be planted immediately on their arrival as they decay rapidly at that time of the year. Will yield from 200 to 300 bu. per acre.

Price per pound, sufficient for 16 hills, 35c postpaid; not prepaid, 10 lbs., $1.05; 50 lbs., $3.00; 100 lbs., $6.00; 500 lbs., $25.90.

EARLY SIX WEEKS

Fine potato for the early market. It is extra early. The potatoes begin to form when the vines are only 5 to 6 inches high, and in 7 to 8 weeks from planting are of fine marketable size.

The tubers are of a handsome, oval form, red color with shallow eyes. Splendid keepers and of the finest cooking quality. 5 lbs., 40c; 15 lbs., 85c; 30 lbs., $1.20; 60 lbs., $3.50; 300 lbs., $10.20; 600 lbs., $19.90.

RED BLISS TRIUMPH

This is positively the earliest potato grown. It is the variety you find on the market first in the spring from the south. A nearly round red potato. On account of its earliness it brings the highest price of any potato offered. It yields enormously. Everyone should plant a quantity of these for first early. 5 lbs., 40c; 15 lbs., 85c; 30 lbs., $1.25; 60 lbs., $2.15; 100 lbs., $3.50; 300 lbs., $10.20; 600 lbs., $19.90.

SWEET POTATOES

For Stock Food—For Power Alcohol or for Human Consumption

There are just three reasons why you should plant Jerusalem Artichokes. First, in a small way, for experimental purposes. Second, if there is a distillery within 75 miles of you, the acreage should be large and profitable to the grower. Third, if you are a producer of livestock of any kind, you should grow a sufficient acreage of this high protein, high sugar content vegetable to care for them until the first of June of the following year. If planted for hog feed, the hogs will do the harvesting.

In the spring of 1935, I planted on my own farms, 70 acres of Artichokes, and they grew nine feet tall and made a heavy crop of tubers in spite of the dry weather. The yield varied from about five ton to twenty ton per acre, depending entirely on the season, the soil, and care. They are planted and harvested as you would potatoes, except that you mow the tops previous to harvesting.

For planting, the tubers should be cut into pieces weighing about one ounce and plant 18 inches apart in the row and the rows three feet, eight inches. Give the same cultivation that you would corn. Plant any time in the spring after the ground is open, and you can leave the crop in the ground, if you wish, during the winter as they are perfectly hardy.

The Artichoke is a very desirable food for human beings. They can be French Fried or boiled with the jacket on.

Sugar made from the Artichoke is safe for use by diabetics and when made into Power Alcohol will produce approximately 250 gallons per acre, making it the most desirable and highest income crop that can be produced on the farm.—D. B. GURNEY.

JERUSALEM ARTICHOKE

WARBA THE NEW MINNESOTA POTATO

As early as Red Bliss. It consistently out-yields Irish Cobbler. This attractive new potato looks like a pink eyed Irish Cobbler. The best potato introduced for many years. Warba is very resistant to mosaic disease and will produce a crop of potatoes in hot, dry weather when all others are a total failure. Eating quality is unusually good.

Our Warba potatoes were grown for us in Minnesota, and even though short of rain, yielded over 300 bushels per acre.

Don’t wait, get started with this wonderful new potato now.

Price per pound, sufficient for 16 hills, 35c postpaid; not prepaid, 10 lbs., $1.05; 50 lbs., $3.00; 100 lbs., $6.00; 500 lbs., $25.90.
GURNEY’S NURSERY STOCK

Four Hundred and Eighty Acres of Land are devoted to raising the trees, shrubs, and flowers offered in this catalog. Every acre is right here in the vicinity of South Dakota. It is all subject to the hot winds of summer and the below zero temperatures of winter—just the same as those that reach your place. If they grow for us, they will grow for you. If they do not do well here, we do not offer them to you. You reap the benefit of our Seventy One Years of experience in the Central Northwest.

We grow trees, shrubs, and flowers by the Millions, over five million Chinese Elm were raised from seed in 1936 on the Gurney Nursery. Forty thousand fruit trees, a hundred thousand fruit trees, a hundred thousand of other trees. By quantity production, we are able to offer you Quality Nursery Stock at prices that Save you Money. Look over this catalog carefully. Compare prices. Consider that you must have Northern Grown Stock if it’s going to last. Then place your order with us.

Early Orders are worthwhile. Early Delivery—Early Planting—Better Results—And a Free Premium.

EXTRA NURSERY STOCK FROM GURNEY’S

If you will send in your order for nursery stock on or before March 1st, you may select extra nursery items FREE to 5% of the cash value for your order. For example, if your order is for $5.00, select other stock for 25¢; if for $10.00, get 50¢ worth extra.

ZONES FOR FRUIT TREES

See Map Below

**Apples**
- Zone 1—All Gurney Fruits—Apples, Pears, Plums, Apricots.
- Zone 3—All except those mentioned in Zone 2 and McIntosh.
- Zone 4—Only Wealthy, Duchess, Haralson, Malinda, Hibernia, Anoka, Patton’s Greening, Fallgold, Melba, and All Crabs.
- Zone 5—Only Wealthy, Duchess, Malinda, Anoka, Patton’s Greening, and All Crabs.
- Zone 6—Same as Zone 1.

**Plums**
- Zone 1 to 6 inclusive—All Hybrid Plums and Plum-Cherries.
- Zone 1, 2, and 6—All Minnesota Plums and Hybrids.

**Cherries**
- Zone 1 and 6—Sour or Pie Cherries.
- Zone 1—Sweet Cherries with Winter Protection.

**Pears**
- Zone 1, 2, 3, and 6—All Blight Resistant Pears.
- Zone 1 and 6—Commercial and Blight Resistant Pears.

SHIPPING ORDERS

Parcel Post: If possible, under Postal regulations, we will ship by parcel post. All nursery orders (except Strawberries) are f.o.b. Yankton, so include postage when ordering.

FIGURE POSTAGE ON NURSERY ORDERS ONLY

On all nursery orders up to $1.25 add 10¢ extra for postage.

Do not send less than 10¢ for Postage on any nursery order.

On all nursery orders from $1.26 to $3.00 add 5% extra, or 8¢ for each $1.00. (If order comes to $1.50 add 12¢ for postage—$2.00, add 16¢—$2.25 add 18¢ extra for postage, etc.)

On all nursery orders over $3.00 add 6% for postage, or 6¢ for each dollar on your order. If your order comes to $3.50 add 21¢ for postage—$4.00 add 24¢—$5.00 add 48¢ for postage, etc.

If your nursery order can not be sent by parcel post, the amount sent will be applied on express or freight.

HARDY—HEALTHY

Trees—Shrubs—Flowers

Only these are offered by The House of Gurney. They have been proved through almost three-fourths of a century in this section of the country. Always watching for new methods of producing better stock. We have been able to offer plants that have a better chance to withstand the adversities of climate that the Middle-Northwest can produce.

Baccata Roots

For example, I believe we are the only nursery in the United States that buds and grafts apple trees exclusively on the Hardy Baccata. We have had hardier Peaches for some years. A perfectly hardy Apricot will be ready next year.

—It’s A Big Problem—

But Gurney’s will always lead with Better Plants for the Northwest.

Our Guarantee

We guarantee our nursery stock to reach customer in good growing condition. If through delay in shipment or other causes, it does not, we are to be notified at once and we will make a satisfactory adjustment by replacement or refund. Any other kind of a replacement is wrong as it makes the careful planter pay for the careless planter’s trees.

Non-Warranty

The House of Gurney, Inc., does not give any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs or plants which it sends out, and will not be in any way held responsible for the crop.

KEEP A COPY

Keep a copy of your order and check goods when they arrive. Sometimes items are sold out or come under separate cover. Mistakes will happen in any organization. When we make them, do us a favor by telling us about them immediately. We value your good will and are anxious to correct errors. Notify us if you do not get an acknowledgment of your order.
Anoka Apple—Early bearing. Originated by Professor Hansen at Duluthings, South Dakota. This tree will bear earlier than any other apple. It is not unusual for the small two-year-old tree to bear fruit in the nursery rows. It is just the tree for you people who are starting a new orchard. The quality is good, the season September, very hardy, heavy bearer and an early bearer wherever tested. First degree of hardiness. (See inside back cover for colored picture).

ANISIM
Season, early winter. Prof. Hansen reports this Russian apple proving very valuable in the northwest; the tree is a strong grower and a prolific bearer. The color of the fruit attracts favorable attention. Fruit medium in size, surface greenish yellow, covered almost wholly with a beautiful crimson. First hardiness.

CHARLO-MMOFF
Russian variety, high quality, early bearer, large fruit handsomely striped, season September. A topnotcher for hardiness.

DEE BEE
The new winter apple for the North. This tree is named in honor of D. B. Gurney, the President of the House of Gurney, and is propagated from a Seedling Apple found growing in Minnesota. Is hardy, of high quality, and productive. Green overlaid with dull red, striped. Above medium in size, high quality, and hard. Tree well formed and vigorous grower. Winter apple early bearer. The Dee Bee is a winner. First hardiness.

GURNEY’S DELICIOUS
This is not a new variety of Delicious but a direct descendant of the original apple tree. This tree had its name changed to Delicious. The Delicious is one of the greatest market apples in existence. This tree has been in existence since 1810. The fruit is very large, of excellent quality, very fragrant and considered best. Skin, dark red, shaded to yellow. The tree is hardy, produces many new fruits of fine quality that are hardy, productive, and heavy bearer wherever tested. Second degree of hardiness.

GURNEY’S IMPROVED YELLOW DELICIOUS
A tree of almost first degree of hardiness and productive fruit earlier than the average tree. Fruit of the very highest quality. Large, heavy and attractive. It is the tree that is out for 2 years old. The 5th year usually shows a very good crop. I believe “The House of Gurney” is the only Nursery Company in the United States using this tree to produce many new varieties of fine quality that are considered best. The first hardiness winter apples. First hardiness.

Duchess of Oldenburg—Early summer; one of the most valuable of the Russian apples; it is a good size and attractive in appearance. The fruit ripens in succession, so that several pickings are required in order to secure the crop. This variety can be used when it is about half ripe since it will keep in the season probably the longest of any of the varieties grown. Color, pale greenish yellow, almost covered with regular splashes and strips of bright red, mottled with crimson.

MALINDA
—This beautiful apple is one of the heaviest bearing, longest keeping and hardest winter apples that can be grown in the North. The flesh is yellowish-white, firm, juicy, mildly acid with sweet after taste. The season is late winter and can be kept until May. These trees are extremely hardy and come into bearing early in life, producing a full annual crop. It is considered the best of the first hardiness winter apples. First hardiness.

McINTOSH RED
Season, September to January. The fruit is very attractive in appearance, of bright, deep red color, and good size. The flesh is very attractive, firm, juicy, and of excellent quality for either dessert or culinary use. Very hardy and productive, healthy and vigorous, and is adapted to a wider range of territory than most apples of this class. It is the great market apple of the west and south. First hardiness.

McKeehn
—This apple is one of the heaviest bearing, longest keeping and hardest winter apples that can be grown in the North. The flesh is yellowish-white, firm, juicy, mildly acid with sweet after taste. The season is late winter and can be kept until May. These trees are extremely hardy and come into bearing early in life, producing a full annual crop. It is considered the best of the first hardiness winter apples. First hardiness.

McINTOSH
—This apple is one of the heaviest bearing, longest keeping and hardest winter apples that can be grown in the North. The flesh is yellowish-white, firm, juicy, mildly acid with sweet after taste. The season is late winter and can be kept until May. These trees are extremely hardy and come into bearing early in life, producing a full annual crop. It is considered the best of the first hardiness winter apples. First hardiness.

McIntosh
Northwestern Greening—Winter, very attractive in color, is valuable for the northern apple growing districts. Quality as a dessert apple is fair to good. The tree is hardy, vigorous, a fine erect grower, and comes into bearing reasonably early. It grows older than an exceptionally heavy cropper. Skin smooth, somewhat waxy, clear pale yellow or greenish, sometimes faintly blushed. Flesh tinged with yellow, crisp and firm, mildly sub-acid. Second hardiness.

Perkins Apple—The fruit is large, red, and round as a ball. It is not an Apple for the North alone but one that will be welcomed anywhere, will take its place with eastern Baldwins, Spys, and Seek no Furthers. The flesh is fine grained and deliciously flavored, as firm in February as it is in October. Season, October to April. First hardiness.

Salome—Fruit hangs well to the tree in high winds. Attractive, hardy, resistant to mildew. Keeps pretty well. Pale yellow or greenish blushed with pinkish-red striped carmine. Flesh tender, juicy, slightly sub-acid.

Tree vigorous, very hardy, healthy, and comes into bearing early and is reliable cropper. Season November to March.

Stayman's Winesap—An improved Winesap, fruit red, juicy, sub-acid, a long keeper; apple is larger than the old Winesap; a better tree, and longer lived; one of the Great Western commercial apples. Second hardiness.

Tolman's Sweet—Fruit medium size, bright yellow, much esteemed for cooking. In ordinary storage its season is from November to January. This is an exceptionally sweet apple. Trees are first degree of hardiness.

Wolf River—Season, October to December. One of the largest apples grown. Tree grows to immense size, very productive, bright red, fair quality, splendid cooking apple. Second hardiness.

Yellow Transparent Apple—Earliest summer. This is the best of the extra early apples, being excellent for culinary and dessert. It ripens earlier than the Early Harvest; fruit medium to large. Tree moderate grower, very hardy, healthy, comes into bearing very young. Skin thin, tender, smooth, waxy, pale yellow, changing to an attractive yellowish-white. Flesh white, tender, juicy with a pleasant flavor; good to extra good. First hardiness.

For your locality select fruits according to the zoning map on page 47. Gurney fruits on hardy roots give better results.

CRABAPPLES FOR JELLY
Florence—Very desirable for commercial planting because the tree commences bearing very young, is a reliable cropper and extremely prolific. Fruit good size, very attractive in appearance and good quality. Color, yellowish white overspread with brilliant pinkish red. Flesh tinged with yellow, crisp, tender, juicy, very brisk sub-acid; good August and early September. First hardiness.

Red Flesh Crab—Introduced 1928. A most remarkable novelty, that is probably destined to world-wide popularity wherever apples are grown. The tree is ornamental as well as useful, the beautiful red flowers and moderate growth making it a very desirable lawn tree. The original tree gives promise of being a good annual bearer and bore its first two crops in 1927 and 1928. The fruit in size is 1½ by 1½ inches in diameter, in color a brilliant solid polished dark red all over. The flesh is red throughout and makes excellent red preserves and red jelly which at-tracted favorable attention at the State College exhibit at the South Dakota State Fair, Huron, September, 1928. Season, fall. Prices: for 30 inch: ca. 40c; per 5, $1.75; per 10, $3.25; 2½-3½ ft.: ca. 50c; per 5, $2.25; per 10, $4.00.

Hyslop—Season, September and October. Fruit large, very brilliant color, dark red or purplish, overspread with thick blue bloom in clusters. The tree is a good grower, very hardy and a reliable cropper, yielding good crops annually. Has value for the home orchard. First hardiness.

Dolga—Another of Professor Hansen's. It is an oblong crab of real beauty and peculiar lemon-acid flavor—entirely different from any other crab and far superior to any other crab for jelly; producing a transparent bright-red jelly of high quality. The color is a beautiful red, solid over the entire fruit. The tree is a thing of beauty at blooming time with its large white flowers and later with its ropes of large dark-red fruit. At a distance, when the crabs are maturing, the tree appears to be covered with beautiful flowers. The heaviest bearing crab apple we have, and one of the first degree of hardiness.

Apples for the North should all be on Baccata Roots

GURNEY'S CRABAPPLES
Whitney—Season, August and September. One of the most popular of the large crab apples, particularly in the west and north; the fruit attractive, yellow, striped with lively red; good for dessert and very good for canning. Tree is a thrifty, upright grower, comes into bearing very young. Extremely productive. First hardiness.

Dolga—Another of Professor Hansen's. It is an oblong crab of real beauty and peculiar lemon-acid flavor—entirely different from any other crab and far superior to any other crab for jelly; producing a transparent bright-red jelly of high quality. The color is a beautiful red, solid over the entire fruit. The tree is a thing of beauty at blooming time with its large white flowers and later with its ropes of large dark-red fruit. At a distance, when the crabs are maturing, the tree appears to be covered with beautiful flowers. The heaviest bearing crab apple we have, and one of the first degree of hardiness.
CHERRIES

GURNEY'S TREES ARE BEST BY EXPERIENCE

GIVE YOUR BOY AN ACRE FOR CHERRIES HE WILL MAKE IT PROFITABLE

EARLY RICHMOND Hardiest of All Pie Cherries

These fine red juicy cherries can be grown successfully at Mitchell, S. D., and south. You folks in Minnesota and Iowa have ideal conditions for Pie Cherries.

The fruit is of medium size, and is borne in great quantities. One tree, I have in mind, bore fruit enough for four families—fresh and for canning.

Wide spreading tree, fresh green foliage, and the hardiest of all the Pie Cherries. Early Richmond should be planted in every home grounds. The fruit is Dark Red and delicious.

ENGLISH MORELLO The Black Pie Cherry

The fruit is large and so dark red as to be classed as a black cherry. It ripens much later than Early Richmond, Juicy, of good quality. This cherry should be in every garden.

LARGE MONTMORENCY

Large, red, rich, and containing very little acid. Very hardy and productive. Ripening about 10 days after Early Richmond; the two planted together make a Cherry season of almost a month, giving you the fruit fresh, besides plenty to can. Montmorency is the leader in the western parts of Nebraska and Kansas, and eastern Colorado. But wherever you live, if you buy a Montmorency Cherry tree from us, I know you are going to be pleased, and it won't take very many years before you know that you have a mighty fine tree.

BLACK TARTARIAN (Sweet)

Here is a Sweet Cherry that makes your mouth water when you see it. Fairly hardy, it produces large, black, sweet fruit in good quantities. Plant at least two this year.

GOLD CHERRY (Sweet)

A great big yellow Sweet Cherry and the hardiest of all Sweet Varieties. We have grown the Gold for years and find it one of the most popular.

Gurney's Baby Chicks show Profits—All from Blood Tested Flocks
Hybrid Cherries
Bear Fruit
The First Year
After Planting

*COMPASS CHERRY PLUM*
A cross between the Sand Cherry and Minor Plum, originated in Springfield, Minn. Fruit nearly an inch in diameter, bright red, sweet and juicy, and of very fine flavor. It looks more like a plum than a cherry. Wherever it is hard to raise fruit of any kind try Compass Cherry Plum, you will like it. Bears young and well, is absolutely hardy. But wherever you can grow such Cherries as Montmorency, and such Plums as the Hansen varieties, I think the Compass Cherry Plum would be less desirable. The others would make you a little better quality of fruit.

*GURNEY'S HARDY OKA CHERRY*
An unusually hardy Cherry, excellent in both the South and as far North as you wish to plant. Skin black, flesh red. Very attractive fruit, heavy bearer, and produces large quantities of fruit first year after planting. Tree of bushy habit. We have never received a complaint regarding this tree. A favorite here at Yankton. Our Canadian friends are planting large quantities of them. Fruit will dry on trees like prunes if given a chance. They are, however, of high quality and very tempting. (See inside back cover for colored picture.)

**BUFFALO BERRY**
This is very useful as well as ornamental, and is planted as much for an ornament as for its fruit. The tree grows from 7 to 12 feet high, has silvery foliage. The fruit is much like that of the Red Currant, and is used for the same purposes. The Buffalo Berry makes an excellent hedge. Each Per 10 Per 100

**RUSSIAN MULBERRY**
The Mulberry is useful as a shade tree, for hedge purposes, and for the immense quantity of fruit borne by it. The Russian Mulberry is the hardest of all. Excellent for canning with tart fruits like gooseberries, currants and plums. It is delicious to eat direct from the trees. They make an excellent ornamental hedge that will stand trimming.

**CHOOSE CHERRY**
This is one of the best of our ornamental fruit trees. Absolutely hardy anywhere. Always symmetrical, and when in full bloom is a great bank of snow with the added beauty of its nutty woodland fragrance, and later its rich, highly colored, purplish-black fruit. Our western dwarf varieties exceed all others in quality of fruit. Especially fine for jelly and jam.

**BUFFALO BERRY**
A cross between the Sand Cherry and Minor Plum, originated in Springfield, Minn. Fruit nearly an inch in diameter, bright red, sweet and juicy, and of very fine flavor. It looks more like a plum than a cherry. Wherever it is hard to raise fruit of any kind try Compass Cherry Plum, you will like it. Bears young and well, is absolutely hardy. But wherever you can grow such Cherries as Montmorency, and such Plums as the Hansen varieties, I think the Compass Cherry Plum would be less desirable. The others would make you a little better quality of fruit.

The hybrid Cherry was produced so those of the North—out of the Pie-Cherry territory—might have this luscious fruit. See the colored picture on back cover, and then hurry your order in. The supply is limited.
HANSEN HYBRID PLUMS

We propagate them on the Hardy American Wild Plum Seedlings. The Root that stands all the dry, severe winters.

**CHERISOTA**
An abundant bearer of moderately large dark red plums of high quality. Producing as the other Sand Cherry Crosses do, large quantities of fruit from one year old up. This is a cross of the sand cherry of western South Dakota and the American Plum De Sota. When Prof. Hansen had produced these plums he found there was a gap between the maturity of some of the varieties and the later ones so he produced the Cherisota. 18-36 in. and 2½-4 ft. only.

**HANSAK**
This is a cross between the native Plum and the fine fragrant Apricot Plum of China. The fruit is splendid for eating out of the hand, and when cooked retains the Apricot flavor. The size of the fruit is about one and one-half inches in diameter. The color of the fruit when ripe is bright red, with a heavy blue bloom; flesh is firm, yellow, good quality and very fragrant. It begins to ripen the first of the plums of the Sand Cherry Cross to ripen. At blooming time it is a gigantic bouquet of white flowers of the most exquisite fragrance. It blooms just a little later than the American Plum. The trees of the Sand Cherry Crosses should be grown as bushes, not trees, for the reason that you can grow twice as much fruit and one or two years earlier by letting them branch from the ground, than they will if you make them in tree form, and they are much longer lived in bush form. Color of the flesh green, flavor very pleasant, ripens about July 15th and will hang on the tree in good condition for about two weeks. (See inside back cover for colored picture.)

**KAGA**
One of Prof. Hansen's very hardy free stone Plums. Fruit exceptionally large, dark red, round, flesh firm, yellow, very sweet. We heartily recommend this variety. It ripens about the same time as Waneta.

**TOPA**
This is Sioux Indian for "bouquet" and is the first of the plums of the Sand Cherry Cross to ripen. At blooming time it is a gigantic bouquet of white flowers of the most exquisite fragrance. It blooms just a little later than the American Plum. The trees of the Sand Cherry Crosses should be grown as bushes, not trees, for the reason that you can grow twice as much fruit and one or two years earlier by letting them branch from the ground, than they will if you make them in tree form, and they are much longer lived in bush form. Color of the flesh green, flavor very pleasant, ripens about July 15th and will hang on the tree in good condition for about two weeks. (See inside back cover for colored picture.)

**SAPA**
The Sioux Indian word for "black"—"As dark as the shadows of eve banked in the Western Heavens." Turning the branches of this tree back when the fruit is ripe exposing the long ropes of glossy black fruit to the rays of the sun, the background, the smooth bark and glossy dark green foliage are a pleasant sight. When it first commences to mature the skin is dark green. The flesh a royal purple. The color of the skin and flesh gradually change until it is as black as the darkest night. (See inside back cover for colored picture.)

**TOKA**
The nicest looking tree, erect, strong, stocky growth, early, heavy bearer. Fruit roundish, slightly oval, size 1½ths by 1½ths inches in diameter. Skin rich dark orange red, mottled with orange dots, covered with light Hlac bloom. Flesh rich orange red, firm. Pit free. Sauce has the rich Chinese apricot flavor, which is superior to ordinary California plums.

**YUTECA**
Yuteca (Sioux Indian for "to refresh"). Size very large, quality good. A choice early and productive native plum.

WASTESA—(Sioux Indian name for "delicious"). Large, almost free stone, excellent. It is the best in quality of all the pure native seedlings. Wastesa is a seedling of Wyant, one of the best native plums of northern Iowa.

**GOLDENROD**

Goldenrod is one of the very few clear yellow plums produced among thousands of hardy hybrids. It carries promise as a market variety because of its firm flesh, large size, attractive color, and excellent shipping quality. It exceeds all other varieties except Tonka in keeping quality after harvest. The tree is unusually vigorous and is hardy in all but the northernmost sections of Minnesota.

**HENNEPIN**

Hennepin is a dark reddish purple plum covered with a dense bloom, giving it a distinctive and attractive appearance. It is a good dessert plum and is especially valuable for canning and preserving on account of its rich purplish red flesh. The characteristic light green foliage sets off in pleasing contrast the heavy load of richly colored fruits ripening in early August.

**LA CRESCENT**

Minn. No. 109. For delicate coloring and delicious flavor La Crescent leads all other plums produced at the University of Minnesota Fruit Breeding Farm. It is a clear yellow, faintly blushed, and lightly covered with a thin white bloom. It is too tender in skin and flesh to stand up well under rough handling, but for home use it is unequalled either to eat out of hand or for sauce. The tree is vigorous, tall, and spreading, and makes a handsome appearance. The fruit ripens a few days earlier than Underwood. It is hardy in all but the most northern sections of Minnesota. The variety is especially recommended for home orchards.

**MONITOR**

A new annual heavy bearing variety. Fruit is large, thick skinned, strong, not astringent. Color, a dullish bronze-red; yellow flesh, tender, very juicy but firm, sweet. One of the best quality plums. Very hardy. Late midseason bearer.

**TERRA**

One of the largest of pure American plums, is dark red and the tree is vigorous and healthy and very productive. A good variety and very hardy.

**WYANT**

Hardy, heavy producing, large Plum of good quality. Purplish-red in color; a good shipper.

**CREE**

Heavy bearing, extra hardy plum of high quality. A cross of a wild plum from Canada and one of the high quality California plums. Fruit is large, red, very early bearer. Hardy as far north as you wish to plant. 2 to 4 foot, 50c Ea.

**TERRY**

One of the largest of pure American plums, is dark red and the tree is vigorous and healthy and very productive. A good variety and very hardy.

**WYANT**

Hardy, heavy producing, large Plum of good quality. Purplish-red in color; a good shipper.

**CREE**

Heavy bearing, extra hardy plum of high quality. A cross of a wild plum from Canada and one of the high quality California plums. Fruit is large, red, very early bearer. Hardy as far north as you wish to plant. 2 to 4 foot, 50c Ea.

**SUPERIOR PLUM**

The 1933 sensation of the plum world. This wonderful, new plum was originated by the State Fruit Breeding Farm of Minnesota and after being tested thoroughly, was christened Superior by the Minnesota State Horticultural Society. Its very name is a challenge, for this new plum is conceded to be superior to any of the older varieties, as large as California Plums and surpasses them in quality. It has firm flesh and a beautiful red color. You can peel it as you would a peach. Don't fail to get at least two.

**UNERWOOD**

One of the hardiest and most vigorous growers of all the Minnesota Hybrids. The fruit ripens very early, making it exceptionally well adapted to northern latitudes. It has been grown successfully in several points of North Dakota and at Winnipeg in Manitoba. Picture Below.

**AMERICAN HYBRID VARIETIES**

**FIEBING PRIZE**

This delicious plum was given the high award of the Fiebing Prize at the Minnesota State Fair in 1930. Since that time its popularity has grown immensely. It is a big red plum. The fruit ripens early, flesh is firm, and of excellent flavor, and a beautiful red color. Fiebing is equal to California Plums in size and quality. Another plum that you can peel like a peach. Do not overlook Fiebing Prize in your plum list. (See front cover for colored picture.)

10 Fine Trees Only $3.45
D. B. GURNEY
SAYS THESE
HARDY PEARS WILL GROW ANYWHERE

THEY ARE
BLIGHT RESISTANT

- HARDY MENDEL PEAR
  We are offering you this hardy Pear because it has been planted without protection and not frozen back an inch in seventeen years. Perfectly hardy. May be grown anywhere apples will grow. The fruit is above medium in size, of A-1 quality, sweet high flavor, juicy. Color a golden yellow, its skin quite thick, blight-proof. Fruit hangs well to the trees. This pear seems to have all the good points necessary for successful pear growing.

- MING PEAR
  A Hansen Hybrid. Flavor delicious, melting; a first-class dessert Pear. Fruit, yellow, one and five-eighths to two inches in diameter; with minute russet dots. Hardy. Very resistant to fire blight. These pears are strictly hardy, blight-proof, and produce pears of good size and quality, and make excellent ornamental trees as well as fruit trees.

- GURNEY'S SUNSHINE PEAR
  This Pear is one of the finest new varieties that we have come in contact with in many years. It resembles the Bartlett and is probably a seedling of that variety. Very hardy and blight-resistant. Tree of excellent habit, free of thorns, of spreading, upright growth with abundance of healthy green foliage.

- PATTEN PEAR
  Blight-resistant. Originated by Mr. Patten in northern Iowa. Sent out by the Agricultural Experiment Station in 1919. Upright in growth, large healthy foliage. Blooms past midseason.

PATTEN PEAR
Fruit medium to large; smooth and regular; green turning to yellow as it ripens, often with bronze blush. Skin, thin and tender when ripe. Flesh, very tender, juicy, rich, refreshing. Trees very hardy.

SAYS THESE
PEACHES

- GURNEY'S DAKOTA PEACH
  The hardest peach in existence has borne regular crops for the last five years, hardy in both wood and fruit bud, fruit as large as Elberta, quality and color very much better. We have a very limited supply this season. Advise those planting north of Yankton to plant this Peach on south side and close up to house or fence for protection. 60c each; 5 for $2.50; 10 for $4.25.

- MISS SOUTH DAKOTA PEACH
  An extra large hardy, freestone peach. Originated at Yankton by Mr. A. C. Ellerman. On account of this tree's productiveness and hardiness and the high quality of its fruit, it is bound to hold first place among hardy Northern Peaches. This tree has been growing in the open without any protection and has stood the South Dakota winters without any indications of damage. Each, 60c; 5 for $2.50; 10 for $4.25.

- J. H. HALE PEACH
  Fruit large, perfect freestone, somewhat round, golden-yellow, covered with carmine, skin thick without fuzz, flesh dark yellow, flavor excellent. Absolutely the best. Tree extra hardy. Bears young and heavy. Ripens five days earlier than the Elberta. Price, each 40c; per 5, $1.85; per 10, $3.50; per 50, $15.00. Peaches cannot be shipped into Canada.

RUSSIAN APRICOTS
An apricot that is hardy enough in growth to stand the rigorous climate of a far northern section, the fruit buds killed some winters depending on conditions, but fruited in Iowa often enough to make them a desirable addition to the fruit list. The apricot is a very rapid growing beautiful tree, loading itself with large annual crops in localities where the fruit buds do not kill. I do not advise it for trial North of Yankton. 4 to 5 ft., 60c each; 5 for $2.75; 10 for $5.00.

EDWARD C. PARKER—(Minn. No. 1)
The tree is large, vigorous; the fruit is medium to large; color yellow with distinct blush; flesh tender, almost melting, juicy, sweet, pleasant quality very good; core small; seeds small. Season, late September. Blight-resistant.

COMMERCIAL PEARS
FLEMISH BEAUTY—Large, juicy, rich; one of the hardest and most popular. September and October.

KEIFFER—Its large size, handsome appearance and remarkable keeping and shipping qualities make it exceedingly profitable for market.

ANJOU—The fruit is large, handsome, yellow, blushed dull red and of a rich flavor. Tree upright, good bearer, strong grower, hardy, bears young, blooms late, remarkably free from blight. One of the best for the Middle West.

BARTLETT—One of the most popular pears. Fruit is large, buttery and melting, with a rich mucky flavor. Probably the very best pear in existence. An early and abundant bearer.

DWARF PEARS
Have proved to be just a little harder than the larger growing type of Commercial or Standard Pears. They will often bear within two years after transplanting. Plant two or three of these along with the other Pears. We offer you these in the three best varieties.

CAPP'S FAVORITE—Large, rich flavor.
DUCHESS—Heavy bearer, sweet, good variety.
FLEMISH BEAUTY—Largely juicy fruit.

Two-year old trees. Prices Dwarf Pears, Each, 60c; 5 for $2.75.

PARKER—

A JUICY FLAVOR
ALL THEIR OWN

GURNEY'S NEW HARDY APRICOT
For 16 years the mother tree has been bearing quality, large sized fruit in S. W. Minnesota. Each year, it has borne a heavy crop of juicy, well colored apricots. We have a limited number to offer this year. Not over 3 to a customer. Each, $1.00; 3 for $2.50.

GURNEY'S DAKOTA PEACH

GRAPES THIS YEAR

FOR MORE AND BETTER FRUIT

THE BEST OF VARIETIES TO SELECT FROM—2 YEAR OLD

All heavy No. 1 plants. A row of grape vines in your garden will produce more profit, enjoyment and beauty than any other known fruit.

• FREDONIA

The new, outstanding early black Grape. Fredonia is the earliest good black Grape. The vine is vigorous and productive and ripens its fruit 3 weeks earlier than Concord. The clusters are medium in size, cylindrical and very compact; berries large, round, and hang well to the bunch; the skin is thick and tough; the flesh is juicy, solid, but tender, and the quality is very good. Fredonia stands alone as an early heavy fruiting black Grape. Plant Fredonia this year and grow your own table grapes. We have never seen its equal. As soon as plants are more plentiful, Fredonia will be widely planted for market as it has 3 weeks the lead in ripening. Supply limited this season—order early. Heavy Vines—25c each, 5 for $1.15.

• WHITE NIAGARA

Large, slightly oval; pale yellow fruit, covered with a white bloom; the quality is equal to the Concord and it is the standard white grape of the country. Bunches are large and compact. Vine vigorous, hardy and very productive. Each, 20c; 5 for 85c; 10 for $1.10; 25 for $2.25; 50 for $4.50.

• MOORE EARLY

Similar to Concord, equally as hardy and at least ten days earlier. Very productive in rich soil. Each, 25c; 10 for $1.75; 50 for $6.00.

• WORDEN

Larger than Concord and ten days earlier. Hardy, healthy, vigorous and productive. Large bunches, dark purplish-black. Especially good on account of its earliness. Each, 20c; 10 for $1.50; 50 for $5.00; 100 for $9.00.

GURNEY'S "POPULAR" Grape Collection

4 Concord
2 White Niagara
2 New Fredonia
9 Heavy Vines for only $1.50

You get most fruit from the least area by planting Gurney’s Grapes
RED RASPBERRIES

Gurney’s FLAMING GIANT Raspberry

Hardy anywhere—Excellent in quality—Bright Red—Flaming Giant is THE RED RASPBERRY for the Central Northwest.

This wonderful Raspberry was produced by Prof. N. E. Hansen of Brookings, S. D., and has the hardiness of the Wild Raspberry of N. E. No. Dakota. He called it “Ohta” meaning “Much” in the Sioux Language, but that does not tell half the story. It lives through winters that kill others. It holds up under hot winds. It bears large bright red berries, firm and of excellent quality.

Prof. Hansen says “The berries run about 16 to the ounce with only fair cultivation on open exposed upland prairie. * * The plants are hardy without winter protection.”

For Profits from your land—Plant An Acre to Flaming Giant Red Raspberries
Per 10, 95c; Per 50, $2.50; Per 100, $4.25; Per 500, $15.25; Per 1000, $28.00.
An Acre—Hill System—1,742 Plants

LATHAM RASPBERRY

The great Raspberry of Minnesota. We believe, without doubt, that this is the greatest red Raspberry ever produced. We know that it has proved a leader wherever sold and customers tell us of the wonderful crops and excellent large berries that they received. Very high quality, large and hardy. Beautiful in color. We highly recommend this variety to all our customers. Strong No. 1. Price: 6 for 50c; 12 for 70c; 50 for $2.00; 100 for $3.25; 500 for $14.00.

Everybody likes Red Raspberries. You can always find room for at least 10. Many of you can use 1000 plants and show a real profit from them.

BLACK RASPBERRIES

• CUMBERLAND

The Cumberland is the leading Black Raspberry in the U. S. It is true that it is one of the older varieties, but one that produces a very good crop and one that has proved itself to be really good. The finest in flavor and shipping qualities and makes an ideal market variety. (See inside back cover for colored picture.)
Price: Per 10, 60c; 25, $1.00; 100, $3.00; 500, $13.00; 1,000, $23.00.

SMALL FRUIT SPECIAL COLLECTION

12 Latham Red Raspberries
12 Chief Red Raspberries
25 Cumberland Black Raspberries
10 Eldorado Blackberries
10 Lucretia Dewberries
A $3.65 Value—For Only $2.75

BLACKBERRIES

Plant your Blackberries about 2 feet apart in the row and the rows 5 feet apart.

• ELDORADO

One of the hardiest and most vigorous of all blackberries, enduring the winters of the Northwest without injury. The yield is enormous, berries large, jet black and borne in large clusters. Very sweet, has no core and will keep 8 to 10 days after picking. A splendid blackberry.
Price: Per 10, 65c; 25, $1.30; 100, $4.50; 500, $17.00.

DEWBERRIES

The Dewberry will have a quantity of fine roots. In planting, these must be spread out, the soil worked in carefully among them and the crown not covered over one and one-half inches.

• LUCRETIA

This is a creeping plant and will often grow as much as fifteen feet in one season. The vines should be trimmed back to about three feet for best results. The fruit is about three times the size of the Blackberry, very sweet. Prices: 5 for 40c; 10, 60c; 25, $1.00; 100, $3.00.

Gurney’s Fur Department will pay you better prices and give you a fairer grade than others. Send us a Trial Shipment.
GOOSEBERRIES AND CURRANTS

- CARRIE GOOSEBERRY
  A variety that should be included in every Gooseberry patch. At Yankton it has proved to be one of the very best varieties that we can grow. In size, quality, and productiveness it is unsurpassed.

  At Brookings the Carrie has proved a heavy bearer and has received a great welcome to the present short list of Gooseberries. Heavy plants.
  Prices: Each 25c; 5 for $1.10; 10 for $2.00; 50 for $8.00; and 100 for $15.00.

- Downing Gooseberry—Larger than the Carrie. Will not stand quite as much grief but is an excellent berry for Iowa, South Dakota, Nebraska and Minnesota or in localities where conditions are equally favorable. Very productive and profitable. 2 yr. 25c each; 10; $2.50; 100; $15.50.

- Oregon Champion Gooseberry—Berries very large brownish-red color, very sweet and fine for table use and pies. Bush a strong grower, healthy, not very thorny and a very prolific bearer. One of the best berries for the market.
  Prices: 2 yr. Each, 25c; 10, $2.25; 100, $17.00.

- Houghton Gooseberry
  The Houghton is without doubt the best variety of Gooseberries that we are growing for planting in the Northwest Section. A berry of medium size, pale red in color, sweet when thoroughly ripe. The bush a spreading grower, and excellent bearer. One of the standard Gooseberries that has proved itself worthy of its popularity. We are offering these to you this year at the following prices: Heavy 2-year Bushes, each, 25c; 5 for 90c; 10 for $1.65; 50 for $6.25; 100 for $11.00; 500 for $50.00.

SMALL FRUIT SPECIAL

Home Garden
5 Oregon Champion Gooseberry
5 Cherry Currant
1 Red Lake Currant
10 Chief Red Raspberry
10 Cumberland Black
ALL FOR ONLY $3.25

Currants and Gooseberry plants may not be shipped into the following states because of Federal Quarantine: Maine, Rhode Island, New Hampshire, Michigan, Idaho, New York, Vermont, Massachusetts, Connecticut and Arkansas.

CARRIE GOOSEBERRY

They grow and produce with almost no care, but just like any other tree or plant, will pay a hundred-fold for additional care. Just give them a little cultivation, some manure worked into the soil, a little bit of trimming after the fruit is harvested, and you will have, not only fresh fruit, but quantities to eat and make the best jelly.

CURRANTS

THE NEW SCARLET GEM

Has Everything

SIZE  Gem berries average above the ordinary in size and
don't "run small and buttony." Even during the past
unfavorable summer, Gem berries continued large
and fresh—a remarkable important characteristic for an everbear¬
ing strawberry and the berries continue to form large up to cold,
freezing weather in the fall.

FLAVOR  No one can find fault with a Gem flavor. They are as sweet and highly
flavored as berries of the mother vari¬
ety, the Progressive. They are just chock full of strawberry
sweetness. You don't need much sugar when you eat Gem berries.

FIRMNESS  Gem is the firmest everbearer grown. This is evidently due to the tough
skin of the berry, as well as its extra
firm flesh. The originator states that Gem "could be rolled to market
and back and still be sold." Even during hot summer Gem Berries
"hold up" in color and firm¬
ness. A quart or crate of Gem
berries never "leaks" no mat¬
ter how far it is hauled.

Everbearing Strawberries—Old and
New—and our experiments show—
The Big Scarlet Gem is better in quality, productiveness and runner
making than any other. You can't
 go wrong with Gurney's Big Scarlet
Gem.

PROGRESSIVEEVERBEARING
"Put on your overcoats and pick enough
strawberries for shortcake."

This is the hardiest of the everbear¬
ing Strawberries, producing large
crops of medium sized fruit from July
until heavy freezing. This is one of
the older varieties but still a good
variety and should appear in all
gardens. We grow our Strawberry
plants under irrigation, and they are
strong and healthy. We will furnish
instructions to planters with each
order.

GURN'Y'S DUNLAP

Even with the introduction of the Everbearing Strawberry there is still a place for the old standard one crop per year strawberry. The Dunlap is absolutely the best. It is a self-fertilizer, fine quality berry, yields abundantly, and is a good shipper.

We grow a great many varieties of the old standard strawberries, but we consider the Dunlap the best of any for all purposes.

The past few years has taught us all that the plants which have served us for half a century should not be pushed lightly aside by new varieties no matter how good they seem. Senator Dunlap has been a leading June-bearing variety for over 50 years. Thru drought, hardship and competition it has held up as the most reliable of them all. Set a good plantation of Dunlap's this year. You'll never regret it. It is large, solid, a good bearer, has strong stems and is a Sugar Saver.

Prices: 25c; 50, 75c; 100, $1.30; 500, $5.00; 1,000, $9.00; 5,000, $40.00. Parcel post or express charges paid in all cases by us on Strawberry plants.

THE FAIRFAX

This new variety had its origin about 1930 and has been growing in popularity ever since. It is a heavy producer of excellent quality berries. The flower stalks are strong and upstanding. It probably produces more fruit per plant than any other of the June-bearing varieties. Its bright red color and uniform shape makes it a mighty good commercial variety. It has a handsome appearance and stands long distance shipments. You should try out at least a hundred of the Fairfax and the Dorsett.

THE DORSETT

This is a new June-bearing variety introduced in 1932. It has the unusual characteristic of holding most of its fruit off the ground. The color of the fruit is a very bright red and it does not become dark when overripe. The flesh is pinkish-red and quite firm.

The Dorsett Strawberry is described as to flavor as "mildly subacid." It is in other words, of excellent quality and we recommend the Dorsett to you as one of the best of the June-bearing varieties.

RED GOLD (SUGAR SAVER) STRAWBERRIES

We are always on the lookout for something better. As new varieties appear we try them out and when we find something that is better than anything else in our gardens we offer it to our customers with our recommendation. But before putting Gurney's recommendations on a variety it must prove to us that it really is better not only in quality but in size, bearing, hardiness, ease of growing and every other point that makes it a desirable variety for you to raise.

If nothing more were said of this new strawberry, than that it requires only half as much sugar in canning as any other variety, you would be interested enough. But we are going to say more than that. It has the flavor of the wild strawberry. Berries often measure 8½ inches around with as high as 43 berries to a stem and eleven stems to the plant. The stems are sturdy and stand up well away from the ground, making picking a pleasure.

Another good feature is their long fruiting time starting early and continuing long after other varieties are gone. Setting Red Gold is almost like having your strawberry crop insured, for it's almost impossible to have the crop ruined by late freezes or wet weather. Wet weather will prevent fertilization of other varieties but the long season of Red Gold avoids this possibility.

Plant Red Gold this year. You will never regret it. It is large, solid, a good bearer, has strong stems and is a Sugar Saver.

Instrucions for Planting and Care of Strawberries

Plant Strawberries in the Spring Only

We sell millions of strawberries each year, and they go to all sections of the United States. We often ship them across the continent and have them reach their destination in perfect condition. We dig, pack and ship fresh every day, so they leave the shipper in the best possible condition. We want them to reach the customer fresh and green. In handling thousands upon thousands of growing plants there is always the possibility that some will be overheated in transit. When that happens we want you to notify us at once. However, most strawberries are killed after they are received by the planters than in any other way. They appear to be a trifle dry and they are immediately soaked. The crown of a strawberry plant should never be wet before planting, as it will rot in a few hours. Each plant has a number of fine roots, have your ground in excellent condition, force the flat hand into this mellow ground, withdraw the hand, leaving a hole an inch by about 4 inches and about 4 to 6 inches deep. Take the other hand, spread the roots of the plant out fanned-shaped, the crown to be just even with the top of the ground when the dirt is patted firmly against the plant. Plant them from 1 foot to 18 inches apart in the row and the rows 4 feet apart. During the growing season they will throw out a number of runners that set new plants. Train these to stay close to the original plant, not allowing it to become more than a foot wide. In the fall, when the ground freezes, cover the plant to a depth of about one or two inches with straw or hay. Straw is best, as you can rake it in among the plants in the spring and allow it to remain there. This keeps the fruit off the ground and clean always.

Above all, order early.

—10,890 per acre, spaced 1 foot apart, rows 4 feet apart.
PLANT A PERENNIAL VEGETABLE GARDEN

There is Always a Ready Profitable Market For

Rhubarb—Asparagus—Horse Radish

Giant Victorian
Tender—Red—Juicy

There has never been a time when good Asparagus went begging for a market. You can do a profitable business every spring by planting Asparagus this spring.

Bigger and better each year, Mary Washington is the Market Gardener's Choice. Its comparative freedom from rust is a decided advantage. You get lots of good clean stalks, tender and attractive. Grocers will buy all you can raise. Order a thousand roots.

MARY WASHINGTON

We are offering you again this year the Mary Washington Asparagus because, after several years' planting, we have found it to be the best variety obtainable. It is a very high quality of Asparagus—producing better stocks than any other kind and it is free from rust. If you are intending to plant a small garden or to grow Asparagus for the market, we believe this is the variety for you to plant. The large planters are changing to this variety as rapidly as possible. It brings a higher price on the market. Gurney's Asparagus Roots are all heavy plants.

ASPARAGUS PRICES

Prices One Year Old Plants: 50, 90c; 100, $1.60; 1000, $8.00.
Prices Two Year Old Plants: 50, $1.50; 100, $2.50; 1000, $15.00.
Prices Three Year Old Plants: 50, $2.00; 100, $3.00; 1000, $20.00.

NEW BOHEMIAN

This horseradish is perfectly hardy anywhere. It is a very desirable article as a relish. Its roots are dug in early spring, grated fine, vinegar added, and it is ready for use. For planting and care, first plant the roots about two inches deep in a desirable location where they can be left permanently. Give them good cultivation. They are much earlier, and produce better than the ordinary sort. Roots grow larger, are whiter, and quality is far superior. All who grow horseradish should use this variety; we have discarded the old standard kind, as New Bohemian will outyield and is much more satisfactory in every way. HEAVY CROWNS 5 for 60c; per 10, $1.00; 25, $2.25.

Cuttings, $1.00 per 50.

GURNEY'S BABY CHICKS

You raise poultry for profit. To show profits your chicks must live, be either good layers or bring good profits on the market. To realize these things you must have healthy chicks of good breeds. Gurney Chicks are from tested flocks for health and quality.

Perennial Vegetables Show Annual Profits
"Nothing Can Beat the Caragana for a Hedge or Low Windbreak To Protect the Garden."

If a tree salesman made the above statement, you would take it "with a grain of salt." However, it is part of a statement by Norman M. Ross, of the Government Tree Headquarters at Indian Head, Saskatchewan, Canada.

READ THE REST OF IT!

"Without doubt the Caragana Arborescens is one of the most generally useful plants for hedge purposes and low windbreaks that can be used on the prairies. So far as I know this shrub was first introduced into Western Canada by the Mennonites, who settled in Manitoba in the early eighties. It is hardy in every section of the prairie regions. There is nothing which can beat the Caragana for a hedge or low windbreak to protect vegetable gardens. It is particularly useful as a trimmed hedge and can be kept at any height from four feet up."

PROF. N. E. HANSEN SAYS—

"Caragana Arborescens, also called the Siberian Pea Tree, is the best plant for hedges, low windbreaks and snow-catchers for the entire Prairie Northwest, extending far north into Canada. It is also one of the best ornamentals for the lawn. In 1897, as Agricultural Explorer for the United States Department of Agriculture, Washington, D. C., I imported about 350 pounds of Caragana seed from Russia. This was not the first importation but perhaps the largest ever made. At any rate this seed served a good purpose in introducing the plant very extensively."

**HEDGES WITH SILVERY LEAVES**

Hedges to be satisfactory must have these qualifications
1. A compact growth.
2. Perfectly hardy winter and summer.
3. Stand cutting back without injury.

The Russian Olive Has All of These Qualities. Your home will be improved by a Russian Olive Hedge. It gives privacy to your home. It makes the entire lot into an Outdoor Living Room. Its silvery foliage makes a contrast with the lawn and other plants that is really beautiful.

**ORNAMENT**

The Russian Olive Is One of the Most Interesting Trees

Its Silvery Leaves make it a striking contrast among other trees and standing alone it commands attention. It can be trained as a huge bush or as a formal tree. For beauty of color, The Russian Olive stands among its fellows like the Colorado Blue Spruce among other Evergreens. Have at least a few specimens in your HOME GROUNDS.

One Row of Each—Russian Olive and Caragana—Garden Windbreak
Have you ever heard—

That two things are the same—and yet different? Sure you have. It’s Chinese Elm and the Siberian Elm. Exactly the same in every physical point—but—When winter comes—they’re different... and how different they are! Siberian Elm, grown from Northern Seed survives the winter in fine shape.

The Siberian Elm comes from northern Manchuria and Siberia—the land that has given us Sweet Clover, Alfalfa, the Siberian Pea Tree, and the Rugosa Rose. It is a land rich in thrifty and hardy plants. No wonder this remarkable tree is taking the country by storm. It is unusual to discover a tree that will grow in poor soil—grow rapidly in spite of neglect, and at the same time combine the graceful beauty, dignity, and rare beauty of our finest trees. No other tree is in as great a demand at the present time or has commanded more favorable comment for many years. It is one of the first trees to leaf out in the spring and the last to shed its leaves in the fall. Its resistance to drought, alkali and extremes of temperature render it especially valuable. Very favorable reports have been received from practically every section of the country. It has proved winter-hardy in the Dakotas, Minnesota, Montana, New York, and other Northern States. In the Great Plains region where desirable shade trees are few, and the semi-arid South and Southwest, and in fact, almost any portion of the continental United States, it has proved itself the most valuable introduction yet received.

Gurney’s Siberian Elm
Will Survive Where Others Fail
Order Early—For Certain Delivery

A Serviceable Windbreak

You can have an efficient Windbreak in three years’ time. In that time the Siberian Type of Chinese Elm will run from Ten to Fifteen feet high. According to Federal figures trees break the force of the wind for Thirty times their Height. Figure it out yourself... $30 \times 15 = 450$ ft. of protection in Three Years.

Only $12.85

For Windbreak—Grove or Shade

Siberian Type
Chinese Elm

Hardy
Grown from Northern Seed

A million Siberian Elm seedlings

Now they are higher than a man can reach—in one year from 18-24 inch.
# PROFITS IN SIBERIAN ELM

Plant a thousand seedlings this spring. From 2 ft. seedlings they grow in one year to 5 ft. or more and they are then transplants. If they cost you $12.85 today, the same trees after a year’s growth would cost you $250.00.

MORE IMPORTANT.—They will be giving you protection from hot and cold winds for 150 feet. In three years, it is not unusual for them to average 12 ft. and protect for 360 feet.

SIBERIAN ELM

THE GREATEST ADDITION TO THE TREE FAMILY IN YEARS

THE MOST TALKED OF TREE OF THE DAY

Let Gurney’s Baby Chicks Pay Your Living Costs This Year
**ASH**

This is one of the most valuable of all for northern and northwestern South Dakota and North Dakota. In planting that section, you should make your planting largely of the Ash. It is a upright grower, with beautiful foliage, perfectly hardy and best for the high and dry places. It will thrive in that part of the country where ninety per cent of the population will say that trees cannot be produced.

**AMERICAN BASSWOOD—Linden**

One of the most beautiful deciduous trees grown. Trunk always straight, the top almost perfect globe; green leaves during the summer changing to bright yellow with the autumn; a perfect globe; green leaves during the summer and ripens an abundant crop of fruit in August. Foliage colors beautiful. Height 40 feet. This is the one that you should plant. Give it plenty of cultivation and it will do fine for you.

**BOX ELDERS—Acer Negundo**

This is a rapid growing tree, producing firewood of good quality about as quickly as any tree will. Very hardy and long lived is not a beautiful but it is desirable in your windbreak or groves on the farm. We do not advise the planting of these for street trees in city parks, but intersperse a row of Box Elder in the planting of these for street trees or in city parks. It is not edible. The tree is very beautiful and ornamental, having an almost perfect circular crown and ripens an abundant crop of fruit in August. Foliage colors beautiful. Height 40 feet. This is the one that you should plant. Give it plenty of cultivation and it will do fine for you.

ELM, AMERICAN WHITE
_Elm Cannot Be Shipped into Canada_

The Elm from Northern seed, such as we grow here, is always hardy. It grows into a beautiful spreading tree that will live longer than several generations of people and increases in beauty each year. It is free from diseases and insects, and wind seldom if ever breaks or damages it. This is the most popular of all street trees. It is planted over a wider range of country for ornamental and shade purposes than any other tree.

• KENTUCKY COFFEE TREE

A perfectly hardy tree, medium rapid in growth, attaining a height up to 100 feet. Pods often ten inches long cling to trees throughout the winter. Leaves similar to the Black Walnut. Easily transplanted. 2-3 ft. $5.00; 5-6 ft. $10.00.

LOCUST, BLACK—LOCUST

A rapidly growing tree, bears fragrant white flowers, wood very hard. Valuable for fence posts, hardy in sheltered locations, or where planted with other trees throughout the east half of the state. Each 1-2 ft. 50c; 3-4 ft. $1.50; 5-6 ft. $2.50; 7-8 ft. $3.50.

LOCUST, HONEY

(Gleditsia triacanthos)

A very fine tree, delicate foliage, very fragrant flowers followed with bean-like pods; thorny. Size Each 10 100
6 to 12 in. seedlings $1.50
1 to 2 ft. seedlings $2.00
2 to 3 ft. seedlings $3.00

For Shade, Windbreak or Grove—Gurney’s Trees are Best
Gurney’s Silver Cedar

Evergreens have withstood the drought

The Evergreens on This Page Stood the Test of 1935-6

Colorado Spruce

“Gurney’s Shiners”—Selected

• COLORADO BLUE SPRUCE

Without doubt, the most beautiful Blue Spruce growing. The Colorado Blue Spruce has come into use with surprising rapidity in the last few years for ornamental purposes. It will adapt itself to all conditions, but the better the conditions, the more rapid the growth. The Colorado Spruce has always been one of the leading Evergreens in the country, and now we bring “Gurney’s Selected Strain” of Blues that gives you an outstanding color that is much superior to any of the other colors of any other Colorado Spruce.

If you want two or more of these trees we will select them to match as near as possible so that they will all look alike.

If you are looking for an outstanding specimen tree, for your lawn, cemetery, or park planting, Colorado Spruce.

Our prices this year are especially low, and due to this, now is the time to plant these choice Evergreens.

• BLACK HILLS SPRUCE

The Black Hills Spruce is without doubt the most popular of the Spruce Trees. This is due to its “low cost” and because it is fast and a very symmetrical grower. The Black Hills Spruce is a compact grower and may be trimmed to any shape desired. It makes an ideal hedge or windbreak Evergreen and will grow rapidly on all soils and under practically all conditions.

Farmers have found this tree to be an ideal windbreak tree and are planting it more and more each year for this purpose. It is also being planted very extensively for ornamental purposes where a low priced Spruce is desired.

FOR MUDDLED EVERGREENS

Deduct 25c per tree if not wanted “Balled in Earth.”

• GURNEY’S COLORADO GREEN SPRUCE

We accumulate, here in our large nurseries, a series of propagations, a lot of the “Green Type” of Colorado Spruce. These trees have the same formality, same symmetrical growth, and are identical to the “Colorado Blue Spruce” and “Shiner” in every way, except in color. These are a beautiful green color, but they are not worth quite as much as the Blue Type. We are offering these trees to you, this year, as long as they last, at a very low price. We feel that you should have some of these and, therefore, are putting them in at a price that will permit their being used for windbreak planting.

• GURNEY’S “SILVER” CEDAR

This is The Aristocrat of the Juniper Family. A most unusual columnar style Juniper. The foliage has a beautiful silvery cast which attracts much attention wherever planted. An upright grower, perfectly hardy and will stand any amount of shearing, if needed, and with us it is one of the leading Evergreens. We can furnish these in either clipped-narrow style, or in the natural more bushy growing style at the same price. This is truly an outstanding variety and at our low prices you should order a pair or more.

SCOTCH PINE

The Scotch Pine is a very desirable tree for groves and windbreaks. Also, has its place in landscaping as it makes a fine ornamental tree, very rapid in growth, perfectly hardy, and does exceptionally well in South Dakota and also points south and southeast. Transplants more readily than other Pines.

Not sold without "Balled in Earth" roots.
**WILLOWS**

- **GURNEY'S GOLDEN**
  Very beautiful golden branches. Does well in low locations. Grows more rapidly than the ordinary willow. Half an acre of these trees cut to the ground every few years will keep an ordinary family in fuel. Each 10 100 1000
  - 1-2 ft. 10c 50c $2.30 $18.00
  - 2-3 ft. 12c 65c 3.90 25.00

- **LAUREL LEAF**
  This is a beautiful medium height tree with glossy, leathery foliage, especially good ornamental tree. They do well on high dry ground, and will stand drought. Each 10 100 1000
  - 1-2 ft. 10c 50c $2.30 $18.00

**GURNEY'S WEEPING TREES**

- **UMBRELLA CATALPA**
  Catalpa Bungei—Makes a perfect umbrella shaped head without pruning. This is a perfectly hardy variety and is suited for any section of the country south of Sioux Falls, South Dakota. Plant a pair of them, one on either side of the steps or front walk. 5½-foot, $1.00 Each. Per pair, $1.85.

- **GLOBE OR UMBRELLA LOCUST**
  This is a thornless, rapid growing tree with dense, globular head; assumes compact form without shearing. The foliage is a dark glossy green, very healthy and vigorous. This excellent tree, hitherto little known in this country, is widely used in Europe in formal plantations and as a small street tree. Globe Locust can be used wherever Catalpa Bungei is used, and is more adaptable on account of its greater hardiness. 5/6 ft. heads. Each $1.60. Two for $2.75.

**GURNEY'S ARISTOCRATS • LAWN FLOWERING TREES**

- **THE ROSE TREE OF CHINA**
  Prunus Triloba—A hardy flowering plum of wonderful beauty. Flowers are often 1½ inches across, of delicate pink color. Resembles a rose entirely covering the bush. Grows about eight feet tall. Will produce flowers the first year after transplanting. The foliage is very attractive making this a valuable shrub for all collections. 2-3 ft., 30c Each; 3 for 85c; 5 for $1.30. 3-4 ft., each, $1.60. Two for $2.75.

- **HOPA BRIGHT RED CRAB**
  This aristocrat of the Crab family has rare beauty as an ornamental lawn tree. The wood is red, the inner bark brighter red, the new leaves red, and the flowers—which appear in immense clusters and mass over the entire tree—are a bright red, followed by the little crab apples—red from the time they start. The matured fruit is red to the core. Originated by Professor Hansen. Small crab about ¾ inch in diameter. It is recommended more as an ornamental than a fruit-growing tree although it is good for both. 2 to 4 ft. only—50c Each; 3 for $1.45; 5 for $2.30.

**FLOWERING CHERRY**

Nanking (Prunus Tomentosa)—Small, compact but wide spreading tree-like bush. Flowers white appearing with the leaves and somewhat scattered on the branches, followed by numerous small red fruits that are edible. 2-4 ft., each, 85c; 3 for $1.45; 5 for $2.30. Named Above for

**ROSES**

**LOW PRICES**

**SHADINGS—Cont'd**

**HYBRID TEA ROSES—RED**

E. G. Hill—The flower is dazzling scarlet, shading to a deeper pure red as it develops. Prunes long stems naturally and the foliage develops freely and is of fine color. Vigorous plants, producing perfectly formed fragrant flowers. Gruss an Teplitz or Virginia R. C. Coxe—Hardy in all sections; grows freely to a height of from five to six feet; vivid, dazzling, fiery crimson, sweetly fragrant, produces a mass of gorgeous blooms on long stems. (See outside back cover for colored picture.)

**Olympiad (Mrs. Raymond Gouyard)—** This handsome French variety won the 1930 Gold Medal at Bagatelle. It has a very long bud and a fully double, extremely large, bright flower of deep blood-red shaded with copper and yellow. Plants vigorous and free-flowering.

**Golden Salmon—** Bright scarlet, large, full, and very free. Erect branching habit and very perpetual. One of the finest and most fragrant Roses.

**HYBRID PERPETUAL ROSES**

This is a class of the harder perpetuals or everblooming Hybrid Roses. It is a rule the flowers running larger than the Hybrid Teas. You can not make a mistake in purchasing either the Hybrid Perpetual or the Hybrid Tea. In very early winter protection, they are hardy anywhere in South Dakota.

**Frau Karl Druschki—** This bright white type Rose has become renowned as the very highest type of its class and the best. This Rose was introduced in 1904. It is an extraordinarily strong grower, branching freely, and has the vividness of this scarlet-orange color stands out with a tinge of yellow or any other shade. Hardy Everywhere.

**General Jacqueminot—** A rich, velvety crimson, changing to a deep scarlet crimson, sometimes called the Black Rose. Best known of all Hybrid Perpetuals, and is without rival in fragrance and richness of color. An old favorite and one of the best known Roses under cultivation.

**Gurney's Pink Neyron—** One of the finest hardy Roses ever grown. It blooms unceasingly from June to November, on uniformly long, stiff stems. The color is marvelous white, without a tinge of yellow or any other shade. Hardy Everywhere.

**Rugosa foliage with the blossoms, beauty, and fragrance and richness of color. An old favorite and one of the best known Roses under cultivation.**

**BUSH ROSES**

**English Sweetbrier—** This is the true Eglantine and highly valued for the spicy fragrance of the young foliage. The pink flowers come only in June but the fragrance of the foliage is with the plant always. Used in quantity for hedge planting, and equally good for single specimens.

**Red Japanese Rose (Rugosa Rubra)—** Came from Japan; Flowers beautiful, bright rosy-crimson and single, succeeded by large berries of rich rosy-red, which last on bushes until well into winter. Noted for delightful pungent fragrance.

**Persian Yellow—** Deep, golden-yellow, semi-double; very fine, hardy.

**K. Eugenie (Native of Western China)—** This Chinese Rose gives us the only dependable yellow shrub rose. The long arching branches are clothed with large, flat flowers which bloom from June to November, on uniformly long, stiff, thornless stems, cup-shaped flowers 4 to 6 inches across. Color is a bright ruddy pink.

**BABY RAMBLER OR POLYANTHA ROSES**

The Baby Ramblers are dwarf or semi-dwarf Rose bushes producing immense quantities of very free, red flowers. In every very hardy class and require but little winter protection to bring them through in good condition. We are offering two varieties; both are rich, glossy plants, dormant.

**Ideal—** Dark velvety crimson outdoors, brilliant scarlet under glass, a prospective Christmas Rose. Early an old bushy with glossy leaves and shapely flowers. Orleanes type, sport from Edith Cavell.

**Miss Edith Cavell—** Color brilliant scarlet, overlaid with deep, velvety crimson or maroon. The blooms are single and come in great open clusters all summer. Splendid for low hedges or edgings.

**CLIMBING OR PILLAR ROSES**

**Crimson Rambler—** The famous crimson-flowered climber, so extremely effective when grown on pillars and trellises. Makes shoots 8 to 10 feet long in a season. Flowers are produced from ground to tip, in great pyramidal clusters of thirty to forty.

**Paul's Scarlet Climber—** No other rose in any class can compare with this for brilliancy of color which is maintained until the petals fall. The flowers, a vivid scarlet are of good size semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes, the plants being literally covered from top to bottom with bloom. Strong, hardy habit and hardy. One of the most popular climbing roses.

**Pink Dorothy Perkins—** Clear shell pink with flowers borne in clusters; full and double. This is without question one of the very finest of all climbing roses.

**Mme. Gregoire Staechelin—** Generally conceded to be the highest type of its class and the best snow-white Rose. This Rose has become so well known that it is generally acknowledged as the very highest type of its class and the best.
### Gurney's Flowering Shrubs

**Gurney's Large Double Flowering**

- **ALMOND**
  - Pink and white varieties. A very beautiful and graceful shrub of medium height. It is covered with very double pink or white flowers in early Spring before other shrubs have budded and is exceedingly attractive. It is hardy, and is becoming more popular each year. Either color. 
  - 2-3 ft., 40c ea.; 3 for $1.10; 5 for $1.60.

**BARBERRY**

- **THUNBERGI—GREEN LEAF**
  - A pretty dwarf species that will fit into almost any planting and will grow in most any place. Handsome foliage of bright green oval shaped leaves which turn to the most brilliant shades of coppery red and orange in autumn and which remain on until late fall. The slender, graceful little branches are lined with small scarlet berries which hang until well into winter and help give life to the shrubbery border, especially when the ground is snow-covered. The abundant scarlet berries persist throughout winter along the spiny twigs. A sunny exposure is necessary to bring out and accentuate its richness. The abundant scarlet berries are of miniature size and borne by the hundreds on a flower head which is frequently 10 inches long. A single plant will throw out as many as 50 flower spikes. 
  - 35c Each; 3 for $1.00; 5 for $1.50.

**COTONEASTER—(Peking)**

- **HARDEST HEDGE**
  - An erect growing shrub slightly spreading and makes a very beautiful appearance. The leaves are very dark, shiny, smooth, and will average about two inches in length. Flowers are white in and clusters. Produces very conspicuous black fruit. This shrub will thrive in poor and rather dry soil. Perfectly hardy. Also makes an ideal hedge, either trimmed or allowed to grow in its natural shape. 
  - 2-3 ft., 35c Each; 3 for $1.00; 5 for $1.50.

**HONEYBUCKTHORN**

- **NEW RED LEAVED BARBERRY**
  - An exact reproduction of Thunbergi in every way—habit, leaf-formation and fruiting, but—whereas the original is a deep green from spring until fall, this variety starts off in its first foliage way—habit, leaf-formation and fruiting, but—whereas the original is a deep green from spring until fall, this variety starts off in its first foliage with very double pink or white flowers in early Spring before other shrubs have budded and is exceedingly attractive. It is hardy, and is becoming more popular each year. Either color. 
  - 2-3 ft., 35c Each; 3 for $1.00; 5 for $1.50.

**THE EVERBLOOMING**

- **BUTTERFLY BUSH’ Summer Lilac’**
  - This shrub will mature to full size the first summer. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently 10 inches long. A single plant will throw out as many as 50 flower spikes. 
  - 35c Each; 3 for $1.00; 5 for $1.50.

**AMERICAN COMMON**

- **ELDER—(Sambucus)**
  - A beauty for color in summer and winter. 
  - Red Osier
  - Dark Red—6 to 10 ft. tall. Early white flowering. The best of the group, Golden Bark—Bright golden bark in fall and winter. Wonderful contrasts.

**BARBERRY**

- **BRIGHTENING**
  - Pink and white varieties. A very beautiful and graceful shrub of medium height. It is covered with very double pink or white flowers in early Spring before other shrubs have budded and is exceedingly attractive. It is hardy, and is becoming more popular each year. Either color. 
  - 2-3 ft., 40c ea.; 3 for $1.10; 5 for $1.60.

**HONEYBUCKTHORN**

- **GURNEY’S LARGE SCARLET FLOWERING JAPANESE QUINCE**
  - (C. japonica)—One of the best flowering shrubs; flowers a bright scarlet crimson, borne in great profusion in early spring; foliage retains its color of bright glossy green the entire summer; hardy; make good hedge plants. 
  - 1-2 ft., 25c ea.; 3 for 70c; 5 for $1.05.
**NEW FRENCH LILACS**

Marie LeGras—Single. Pure, creamy-white. Pinnacles very large. The individual petals and florets are very large. Blooms profusely, often as late as July of a two-year old.

President Greey—Double. Light blue. Immense pinnacles; very double and symmetrical. President Greey is one of the most desirable.

Souvenir de Ludwig Spaeth—One of the prettiest Lilacs that grows. Flowers dark purplish-red. Extra large.

Lilacs you will not make a mistake by adding this to your collection. 18-24 in., 45c ea.; 5 for $1.25.

**Congo**—Wine red, very attractive. If you like Lilacs you will not make a mistake by adding this to your collection. 18-24 in., 45c ea.; 5 for $2.00.

**Villosa Lilac**—A late lilac of compact growth, pinnate leaf, flowers in June. Loose pinnacles of light violet. Very profuse. Blooms second year after planting, which is unusual for a Lilac. 2-3 ft., 25c ea.; 5 for $1.00; 3-4 ft., 30c ea.; 5 for $1.25.

**VIRGINALIS**

(Double Flowering Mock Orange)

A magnificent new variety. Moderately tall, with good foliage and compact habit. The flowers are single, fragrant, and are borne very freely on the large shrub. They retain their beauty and fragrance to about that diameter and covered every spring with a cluster of large pure white and very fragrant flowers. Fragrance equal to that of the orange blossoms. This variety is extremely hardy. With its fragrant flowers and glossy leaves, it is beautiful throughout the summer. 12-18 in., 20c Each; 3 for 50c; 5 for 80c.

**SNOWBALLS**

Common Snowball (Viburnum Sterilis)—Hardy, attains a height of 3 to 10 feet. Is filled with white balls of bloom in the last part of May. 3-4 feet, 50c each; $4.50 per 10; 18-24 in., 40c each; $1.90 per 5; $7.50 per 50.

Highbush Cranberry (Viburnum Opulus)—8 to 10 feet. Handsome, dense, brilliant, green foliage, a rich setting of large bunches of crimson berries which enliven the late summer and remain on bare branches into the winter. 18-24 in., 30c each; 3 for 80c; 5 for $1.25.

**ARROW WOOD**

Viburnum Dentatum—Upright bushy shrub obtaining a height of 15 feet. This shrub is native in parts of Minnesota; exceptionally hardy. Similar in appearance to the Viburnum Lantanum. Flowers are borne in cymes 2 to 3 inches broad; fruit bluish black. 1-2 ft., 30c each; 3 for 85c; 5 for $1.25.

**TEXAS CHICKS**

One of Prof. Hansen’s hardy shrubs that has the bright colored leaves the entire season. They are used extensively in landscape planting and will lend color to any planting. The leaves are a bright sunset orange. Shrubs, 4-6 ft. tall. 2-4 ft., each, 35c; per 5, 1.50.
GURNEY'S BIG
SPIREA FAMILY

ASH LEAVED SPIREA (Spirea sorbifolia) — One of the earliest shrubs to come into leaf and flower in the Spring. Long spikes of white flowers in June and July. Leaves similar to the Mountain Ash. Entirely hardy. 1-2 ft., 25 c.; 3 for 70 c., 5 for $1.00.

ANTHONY WATERER SPIREA — A very hardy variety for the Northern Country. A dwarf, free-blooming shrub with canes terminated by feathery plumes 5 to 8 inches long, of dainty pink color. A very hardy and attractive Spirea, has beautiful green foliage and continues in bloom all summer. Flowering variety, producing large panicles of deep rosy blooms earlier than the Anthony. Excellent for grouping. Prices: 2-yr. field-grown plants 35c each; 3 for 50c; 5 for 90c. 18-24 in., 35c each; 3 for 90c; 5 for $1.00.

BILLARDI SPIREA (S. Billardii) — Tall, erect shrub with canes terminated by feathery plumes. 3 for $1.25. 1-2 ft., 25c each; 3 for 65c; 5 for $1.00.

DWARF — RED FLOWERING SPIREA (Spirea Collosa Rosea) — A dwarf, free-blooming variety, producing large panicles of deep rosy blooms earlier than the Anthony. It is a very attractive Spirea, has beautiful green foliage and one that should be included in your foundation or shrub collection plantations. They are rapid growers and become 2 feet high and constantly in bloom all summer. Flowering variety, producing large panicles of deep rosy blooms earlier than the Anthony. A valuable hardy plant. 1-2 ft., 25c each; 3 for 65c; 5 for $1.00. 18-24 in., 25c each; 3 for 65c; 5 for $1.00.

DWARF — WHITE FLOWERING SPIREA (Spirea col. alba) — Height, 24 inches. Covered with white blossoms from spring until fall, very vigorous and attractive. Excellent for grouping with other shrubs or for foundation plantings. They can safely be planted under windows, etc., and continue their blossoms the entire season with clusters of feather plumes 5 to 8 inches long, of dainty pink color. A very hardy variety for the Northern Country. 1-2 ft., 25c each; 3 for 65c; 5 for $1.00. 12-18 in., 25c each; 3 for 65c; 5 for $1.00.

SNOW GARNAL SPIREA (Arguta) — The earliest blooming Spirea, growing 5 ft. tall. Slender and graceful form with delicate leaves. Pure white flowers are produced in great profusion. Prices: 2-yr. field-grown plants 35c each; 3-yr. 30c each.

**NEW HARDY PERENNIALS**

**Prices:** 3 for 75c; 5 for $1.00; 10 for $1.50

*Arabis Alpina* (White Rockcress)—One of the most desirable of the very early spring flowering plants for the rock garden, but does equally well in the low border, forming a dense carpet of pure white flowers. It is useful for cutting and lasts a long time in bloom.

**Carnation Double Blood Red** —A beautiful, luscious red, large bloom, produced in June and July. Easily grown in rockery.

Toad Flax (*Linaria*)—A pretty little alpine blooming in May and June. Yellow flowers in short racemes or heads.

Evening Primrose (*Oenothera Youngii*)—A robust, sturdy plant, large-leaved, with large, bright yellow flowers, opening at night. Best blooming from June to August.

**False Dragon Head** (*Physostegia*)—Forms large clumps 3 to 4 feet high, bearing long spikes of delicate pink and white flowers, tubular in form. Full sun. July and August.

**Meadow Rue** (*Thalictrum*)—Yellow flowers. Foliage borne in feathery clusters or panicles; good for cutting. Large and striking rose-pink flowers. June-July.

**Wisteria**—This variety bears in great profusion large clusters of pea-shaped flowers, blooms in May and June. Hardy in sheltered locations. Each, 40c; 5, $1.80.

**NEW MAGNIFICA HONEYSUCKLE**

*Lonicera Sempervirens Magnifica*—We are offering you another New Honeysuckle this year—a Variety that we believe has already reached perfection.

EVERBLOOMING, starting early in the summer and continuing bearing until late fall; large flowers in long spikes.

Color, a beautiful coral-orange; a color that we believe has never been produced before in a Hardy, Everblooming Vine. Heavy 2-year old, field grown vines at only 80c Each; 2 for 95c; 5 for $2.25.

**Trumpet Vine** (*Radicans*)—A robust, woody vine, twining with numerous roots, along its stems its orange-scarlet, trumpet-shaped flowers cluster at the tips of the branches. Each, 30c; 10, $2.70.

**Wild Grape**—The best Grape for covering porches, summer houses, and arbors. Each, 20c; 10, $1.70.

**Knapweed** (*Centaura Dealbata*)—Easy culture, delightful in an open, sunny position, producing a wealth of bloom, which not only makes a fine display in the border but is excellent for cutting. Large and striking rose-pink flowers. June-July.

**Meadow Rue** (*Thalictrum*)—Yellow flowers. Foliage borne in feathery clusters or panicles; good for cutting for mixing with cut flowers. June, 4 feet.

**Coat Flower** (*Tunica Saxifraga*)—A pretty tufted plant with light pink flowers, produced all summer, about 6 inches high; for the rockery or border.

**Speedwell** (*Veronica Amethystina “Royal Blue”*)—Large spikes of rich gentian blue flowers. 10 to 15 inches. June and July flowering.

5 for only 90c; 3 for only 60c, Except as Noted
Starred varieties are those best suited for rock gardens.

GURYNEYS HARDY PERENNIAL PLANTS ARE ALL HEAVY ROOTED OUTDOOR NURSERY GROWN

These are the plants that stay with you from year to year, requiring no replanting and each year producing the most beautiful flowers with a minimum amount of care. The tops die down each year, of course, but the roots live well through the winter and will regrow the following spring, throw shoots and fill your garden with flowers. When you receive the perennial roots from us, they will be cut and ready for planting and they must be cared for much as you would the strawberry plants. Soak ground well when planting and cultivate them well in the first few months. Our perennials are all field grown plants.

Hardy Fern—From the Black Hills. Are especially valuable for the north and east sides of the house, the north sides of fences, or when they are protected from the direct rays of the sun. They do best in moist locations. Large clumps.

*Flowering Flax (Linum)—A rich blue-flowered Flax. The attractive flowers last only a day. Plants bloom continuously from July on. 15 inches tall.

Blazing Star (Liatris Pycnostachya)—Does well in all soils. Richly colored purple flowers in graceful spikes one foot long.

Maltese Cross (Lychnus Chaecodonica)—Heads of vivid scarlet flowers, blooming a long time. One of the brightest plants in the hardy border. 3 feet.

Oriental Poppy—Enormous flowers of a brilliant orange color, with black centers. These flowering plants attract the eye quick, because of the size of any other plant and are easily grown. Potted plants 25c Ea., 10 for $2.00.

Japanese Balloon Flower (Platycodon)—For its delicate Prussian blue flowers, often three to four to 2½ feet high, producing their attractive blue or white flowers from July to October, deservedly one of the most popular and popular daisies for naturalizing. When established, it may be moved with lawn mower. Foliage is very fragrant when walked upon.

Alaska Shasta Daisy—Exceeds all others of its type. They range from the fully double to the single, and in color from pure white to pink. 3 feet.

*Goldmoss (Sedum Acre)—A beautiful trailing variety with bright yellow flowers. A pretty species for rockwork, well-known and commonly used. Has thick glaucous foliage. Drought resisting.

*Sedum Anglicum—Pale flesh-pink flowers; dense carpets. Pretty roundish, grey-green foliage. Foliage is evergreen.

*Showy Stonecrop (Sedum Spectabile)—Erect growing mass of large bright red heads 18 inches high. Handsome light green foliage. Valuable for borders and edgings in dry soil where nothing else will grow and for rockeries. August and September.

Salvia—Showy, hardy plants of medium growth and of excellent habit in sunny beds. The blue flowers are borne in spikes, racemes, or panicles, and are very attractive during the summer months. 1½ feet.

Veronica Longifolia—June to September. One of the handsomest blue-flowering plants. Perfectly hardy and increases in strength and beauty each year. Spikes completely studded with flowers. Fine for cut flowers and one of the best plants for the hardy border.

*Adam’s Needle (Yucca Filamentosa)—This is a hardy evergreen plant producing long leaflike flowers. It has been used in the garden as a shrub, sometimes as a specimen, and as a container plant. 200 flowers of pure white; blooming period about June and July. The leaves remain green the entire years. Fine plant for sunny, exposed places and for the lawn.
BEARDED IRIS

GERMAN IRIS

The most wonderful combinations of color can be obtained by planting these very hardy, drought-resisting plants. We furnish large, lavender. Falls penciled purple, tips of falls shading to dish-violet; falls very brilliant deep red-violet; upright petals. The "Falls" are the petals that strong divisions. The "Standards" are the three fragrant flowers.

- MITHRAS—Standards straw-yellow; falls red-violet, tipped carmine, golden-yellow.
- NIBELUNGEN—Standards fawn-yellow, falls violet-blue.
- PERFECTION—Standards lavender shaded purple; falls rich dark violet-purple.
- PROSPER LAUGIER—A handsome brown toned variety. Showy.
- QUAKER LADY—Pale lavender; falls slightly diapered; the whole flower lighted with buff. Delicate coloring.
- QUEEN OF GYPSIES—Lilac, blended with pink and white.
- QUEEN OF MAY—Delightfully fragrant, and the best of the old "pinks." Early.
- ROSE UNIQUE—Standards and falls, violet-rose. Each 15c; 10 for $1.00; 50 for $4.00.
- VIOLECEA GRANDIFLORA—Rich blue with a violet shade. Tall.
- WALHALLA—Standards lavender-blue; falls violet-purple.

One each of the 25 German and Dwarf Iris listed for $2.00.

TRIAL GROUND MIXTURE IRIS

Mixed German Iris. Per 5, 45c; per 10, 80c; per 50, $3.50.

DWARF IRIS

- 15c Each; 10 for $1.25.

- FLORIDA—Very light yellow with purple markings on falls.
- SIBERIAN IRIS

SIBERICA—Purplish-blue flowers, 3 feet high; useful for cutting. Each, 15c; per 5, 60c.

PEONIES • THE KING OF FLOWER • AT GURNEY'S LOWER PRICES

GURNEY'S LARGE DIVISIONS—3-5 EYE . . . NUMBER AFTER NAME INDICATES THEIR RATING—10.0=Perfect

ALICE—Very good double, bright red Peony, medium late. Ea., 25c; 5 for $1.00.

BARONESS SCHROEDER—9.0. Rose type; late. White with shading of flesh. This is one of the finest Peonies. Its immense flowers of great substance with high chalice-shaped centers are freely produced, lasting a long time. Very fragrant. Ea., 40c; 3 for $1.00.

BENJAMIN FRANKLIN—8.1. Double type; medium size; midseason. Deep crimson, outer petals large and the center composed of smaller overlapping petals mixed with many stamens; faintly fragrant. Very tall; vigorous and free-flowering; blooms held high above the compact foliage on wiry stems. Ea., 40c; 3 for $1.00.

CLAIRE DUBOIS—8.7. Very large double globular flowers, petals incurred and notched. Rich satiny pink with silvery glossy tints. Late midseason. Ea., 40c; 3 for $1.00.

COURONNE D'OR—8.1. A large, late, milk-white. Water-lily fragrance. Center petals tinged carmine, surrounded by yellow stamens. Ea., 30c; 3 for 75c.

DUCHESS DE NEMOURS—8.1. Sulphur-white with a greenish redth that lights up the entire blossom, which gradually changes to a pure white. Crown type, blooms early, following Festiva Maxima by a few days. Especially beautiful when half open. Ea., 25c; 5 for $1.00.

FESTIVA MAXIMA—9.3. Undoubtedly the finest white Peony in existence. It is a flower of wondrous beauty with clear, carmine spots on center petals, of enormous size, measuring 7 or 8 inches in diameter. Ea., 36c; 3 for 75c.

GEORGIANA SHAYLOR—8.9. Late midseason, double type. Color is pale pink on back petals with vivid crimson marks on ring of short petals around the center. Ea., 50c; 3 for $1.25.

GENERAL HOOKER—Rose type. Deep rich red; large flowers; profuse bloomer. Huge, full and heavy, extra fine. Ea., 30c; 3 for 75c.

GOLDEN HARVEST—A beautiful tri-colored variety. Showy. Ea., 24c; 5 for $1.00.

HENRY AVERY—8.8. Double type; large; late. Guards and well-defined crown, bright light pink, with a collar of shorter creamy petals tinted yellow at base; mildly fragrant. Medium height; good stamens and foliage. Ea., .50c; 3 for $1.25.

MME. DE VERNEVILLE—7.9. Large, very full, pure white with bluish center fading to pure white with prominent carmine fleck. Fragrant. Ea., 30c; 3 for 75c.

MME. FOREL—Double type; very large; late midseason. Even, clear pinkish lavender through the flowering season, in height and on good strong stems. The color is a beautiful salmon-pink. Extra. Ea., 15c Each; 10 for 75c; 50 for $2.50.

MRS. THORNTON—Extra large. Almost flat flowers. Known as the peerless pink Phlox. A wonderful variety.

PHLOX SUBULATA—Light or Dark Pink

An early spring-flowering type, with pretty moss-like evergreen foliage, which, during the flowering season, is hidden under the masses of bloom. An excellent plant for the rockery, the border, and invaluable for carpeting the ground for covering graves. Each, 20c; per 12, $1.70.

HARDY MOUNTAIN PINK

HARDY PHLOX

Ten for $1.50

The gorgeous bloom of the Perennial Phlox from the first of July until November puts it in a class by itself. Easily to grow, lovely and hardy, it is good for bordering shrubbery, and indispensable in the perennial garden. We are offering large, field-grown plants.

AFRICA—Brilliant carmine-red with blood-red eyes. Well-shaped flowers headed composed of large florets. Good grower.

CHAMPS ELYSEES—Purple, dwarf growing. Early. Ea., 25c; 5 for $1.00.

ENCHANTRESS—Bright salmon-pink with dark eye. Strong growth and rich green, glossy foliage.

INDENDEPENCE—Pure white. Large clusters. Very free blooming. Long season of bloom. 24 inches high.

LA VAGUE—An improvement over older varieties of similar color with immense conical heads. Producing in great profusion. Lavender-pink. Very free blooming.

LOTHAIR—Bright crimson in color. Fragrant. Ea., 15c; 10 for $1.00.

MRS. THORNTON—Extra large. Almost flat flowers. Known as the peerless pink Phlox. A wonderful variety.

RHINELEANDER—A splendid old-time variety of good growing quality, and excellent bloom. Flower heads are large and on good strong stems. The color is a beautiful salmon-pink. Extra. Ea., 15c Each; 10 for 75c; 50 for $2.50.

ROSE UNIQUE—Standards and falls, violet-purple.

SIBERICA—Purplish-blue flowers, 3 feet high; useful for cutting. Each, 15c; per 5, 60c.

SIBERIAN IRIS

SIBERICA—Purplish-blue flowers, 3 feet high; useful for cutting. Each, 15c; per 5, 60c.
ARGENTEUILLAIAS—Well shaped scarlet-bronze flowers tipped with gold produced in great quantities. Exceptionally hardy, medium height.

DIANA—(Korean)—Rose pink, mingled with lilac, to soft salmon. The triple rays of petals give an appearance of fullness that is none the less dainty. Height 2 feet.

GLORY OF SEVEN OAKS—The earliest flowering outdoor Mum. Does not grow tall; marvelous bloomer. Flowers are a deep yellow, completely covering the plant.

INDIAN—Late flowering, medium height. Flowers shy of pleasing propor¬tions, with a mar¬velously rich fragrance.

LITTLE BOB—Bronze Button. Late, free¬flowering of medium height, large heads of tiny button-like, bronze colored flowers. Very hardy.

LILY OF THE VALLEY—The Lily of the Valley will thrive and throw up its beautiful, modest, fragrant white bells in any kind of soil. Will also adapt itself to pot culture in winter. Its delicate, permeating fragrance makes it especially desirable. Per 6, 50c; per doz., 85c; 50 for $3.90; 100 for $7.65.

LYDIA FINKS—(Pine)—Has long, narrow leaves, produces many tall spikes of fragrant waxy pure yellow flowers in June and July. Thrives in any good soil. Fine for borders. Each, 20c; 5 for 65c; 12 for $1.25.

JAPANESE GOLD BANDED LILY—Flowers very large, made up of broad white petals, thickly studded crimson and maroon with a bright golden band down the center of each petal. 50c each, 5 for $2.00.

JAMES BRYDON—Very free in bloom and one of the largest white Water Lilies. 25c each, 2 for 35c, 5 for 55c.

LILY OF THE VALLEY—Regal Lily—A novelty of rare production and wondrous beauty. Experiment prove this new Lily to be harder than most kinds. The flowers are white, slightly flushed with pink, with a useful glow of canary yellow at center, which continues part way up to the trumpet. Its perfume is not oppressively heavy like some others, but the sweet refreshment of Jasmine. In the garden it should continue blooming. One of the largest white Water Lilies. 95c ea.

MARLIAC WHITE—Snowy white petals with bright yellow stamens. The fragrant blossoms are five to six inches in diameter. Septals are lined with pink. It is a continuous bloomer. 95c ea.

NAMELESS—Flower stands well above the water. 95c ea.

PINK CUSHION—(Amelia)—The dwarfest of mums, not over 10 inches high. Completely covered with pink blossoms so that the plant resembles an Azalea.

SNOWCLAD—Pure White. 3 feet.

TIGER LILY—This well-known, old-fashioned flower has become very popular; the last several years, and is now planted extensively in all gardens. Account of its extreme hardiness, it is one of the most valuable of all Lilies. Grows three feet tall with several flowers on each stem. Flowers orange with black spots. Price: each, 20c; per 5, 90c.

DOUBLE TIGER LILY—Same as the Tiger Lily but has very attractive double flowers. 25c each; 5 for $1.00.

RED RUSSIAN—This variety gives more variation of color throughout the season than almost any soil. Is highly recommended for general planting. Each bulb produces many Lilies of medium size, gracefully cup-shaped and quite fragrant. Each, 20c; 5 for 65c; 12 for $1.25.

REGAL LILY—Very free in blooming. Opens early in the morning. One of the largest white Water Lilies. 25c each, 5 for $1.30.

HYACINTHS—Flowers very large, made up of broad white petals, thickly studded crimson and maroon with a bright golden band through the center of each petal. 50c each, 5 for $2.00.

JAPANESE GOLD BANDED LILY—Flowers very large, made up of broad white petals, thickly studded crimson and maroon with a bright golden band through the center of each petal. 50c each, 5 for $2.00.

GLADSTONE—Large dazzling white flowers with broad, waxy petals, sulphur yellow heart. Very free in blooming. Opens early in the morning. One of the largest white Water Lilies. 95c ea.

MARLIAC WHITE—Snowy white petals with bright yellow stamens. The fragrant blossoms are five to six inches in diameter. Septals are lined with pink. It is a continuous bloomer. 95c ea.

JAPANESE GOLD BANDED LILY—Flowers very large, made up of broad white petals, thickly studded crimson and maroon with a bright golden band through the center of each petal. 50c each, 5 for $2.00.

TUBEROSES—EXCELSIOR PEARL—This variety is characterized by its short, robust stem and long spikes of flowers, perfectly double and twice the size of the common Tuberose. Spikes frequently bear 30 to 50 flowers. Always wax-like and pure white. Large bulbs, 5 for 25c; 12 for 50c, 50 for $1.90.

WATER LILIES

A Selected List of Hardy Varieties

YOU will love a pool of Water Lilies more than any other spot in your garden. Any home can have one. They are inexpensive to construct and once constructed require very little care. Water Lilies are easy to grow spring until frost. We will be glad to give you detailed instructions on the general planting. Each bulb produces many Lilies in form and above the average in size. Don't fail to include this one in your pool. $1.65 ea.

SUMPTUOSA—One of the most delicate and beautiful of all Lilies. The satiny texture of its petals give one all the color to be desired in a pink Water Lily. Rather tall, and double. Flowers are a vivid rosy crimson, deepen¬ing with age. Has small bronze red leaves. 1.95 ea.

WHITE CUP—White Water Lily. The bloom is a double one, large, a foot across, and grows from a large bulb. Each, 20c; 5 for 65c; 12 for $1.25.

RED CUSHION—(Amelia)—The dwarfest of mums, not over 10 inches high. Completely covered with pink blossoms so that the plant resembles an Azalea.

SNOWCLAD—Pure White. 3 feet.

WATER POPPY—The blossoms resemble the California Poppy. Each plant throws out many floating runners bearing large blossoms all summer long. Plant as you would a Water Lily. 25c ea., 2 for 35c, 5 for 55c.

WATER HYACINTH—Shiny dark green leaves, orchid-like flowers. The plants float on the water but will produce more flowers when not allowed to drift about. 15c ea., 5 for 50c.

WATER IRIS—We have both the yellow and the light blue varieties. They bloom the entire season. Thrive in water up to twelve inches and also in a moist border. Blos¬soms resemble the Siberian Iris in type and they produce abundantly. 25c each, 5 for $1.00.

LAURA MORRIS—The perfect yellow Dahlia. Has massive blooms on long, strong stems. Color is a very deep yellow with amber back petals. It is a profuse bloomer and a remarkably good keeper. 35c Ea.; 3 for $1.00.

BASHFUL GIANT—One of the largest flowering Decorative Dahlias in existence. Its gigantic blooms are excellent for exhibition, growing under ordinary conditions 6 to 9 inches in diameter and 3 to 5 inches thick. An exquisite apricot with buff or gold tint. Sure to give satisfaction. 30c each; 3 for 85c.

BONNIE BRAE—This California creation is named after Miss Bonita Parker as the namesake for this rare creation. It is of the tangerine-orange shades with deeper shading at the center. A mammoth flower, seven to nine inches across, and one that always creates a sensation, blending particularly well with the autumn tints so much in vogue today. 25c each; 3 for 75c.

JERSEY’S BEACON—A universal favorite as an exhibition and garden flower; color, rich butterscotch, of Decorative type. It is an exceptional exhibition variety. 30c each; 3 for 85c.

JUDGE ALTON B. PARKER—Orange Dahlias are always scarce and Judge Marean realized this when he selected his friend Judge Parker as the namesake for this rare creation. It is of the tangerine-orange shades with deeper shading at the center. A mammoth flower, seven to nine inches across, and one that always creates a sensation, blending particularly well with the autumn tints so much in vogue today. 25c each; 3 for 75c.

THE MILLIONAIRE—One of the best known Decorative Dahlias in existence as well as one of the largest, producing flowers from 6 to 8 inches under ordinary conditions and from 10 to 12 inches across under extraordinary conditions, Lavender shading to white at center. 30c each; 3 for 85c.

TWO OF THE BEST

* JANE COWL—Fairly tall with vigorous dark green leafy foliage; straight, strong stems holding monstrous blooms of glistening bronzy buff and salmon shades proudly aloft with a beauty that stops you and makes you look again. 35c each; 3 for $1.00.

* JERSEY’S BEAUTY—Undoubtedly the finest pink Dahlia in existence. Hubbard wrote: “When a man builds a better house or makes a better mouse-trap than his neighbor the world will make a beaten path to his door.” Jersey Beauty has its beaten path to its door. It needs no further introduction. Ea. 35c, 3 for 75c.

CALIFORNIA ENCHANTRESS—Delicate blush. Cactus. 20c Ea.; 3 for 55c.

PRIDE OF CALIFORNIA (Decorative)—Mammoth rich American beauty red. Very tall, vigorous grower, flowering continuously from early summer until late fall. Its perfectly formed flowers are produced on strong stems well above the foliage. An exceptionally large decorative flower. 20c each; 3 for 55c.

SNOWDRIFT—A pure yellow 30c each; 3 for 70c.

AMONG THE BEST

DARLENE—An exquisite shade of live shell-pink with a dainty blending of white at center. It is an early and continuous bloomer, excellent for florists’ use. Flowers very uniform and perfect are produced on long stiff stems well above the foliage. We can recommend this Decorative Dahlia highly for cut-flowers and garden purposes. 15c each; 3 for 40c.

MRS. CARL SALBACH—A beautiful lavender-pink Decorative Dahlia which has blends of deeper lavender toward the center. This sensational Dahlia has remarkable length of stem, and is a perfect cut-flower and exhibition type, as it lasts so long after cutting. 30c each; 3 for 75c.

NOW TRY THE

POMPON OR BUTTON DAHLIAS

The Midget of the Dahlia Family. Has small compact, brick bowl-shaped flowers about 1 1/2 inches in diameter. Free to bloom and very attractive. Ideal for cut flowers, also suitable for planting in Rock Gardens. We have you only—The four choice varieties. 25c ea.; 4 for 85c.

LITTLE JEWEL—A clear peach blossom pink. Probably the best and prettiest Pompon Decorative.

PINK DANDY—A clear peach blossom pink. Probably the best and prettiest Pompon Decorative.

ROTHAULT—A fine red.

ZOE—A combination of orange, yellow and red intermingled. Very attractive.
Gladiolus have their place in every garden. The bulbs should be set so that the top is about 4 inches below the surface and spaced from six to eight inches apart. It makes the most stately of cut flowers and if picked when the first flowers open, it will continue to flower clear to the tip and last a long time.

**GLADIOLE**

We are offering the finest varieties chosen by The Gladiolus Society of America. You will find none finer and they are priced to sell to every lover of flowers.

**PRICES—**10 for 75c; 25 for 95c; 50 for $1.75; 100, $3.45. Unless otherwise priced.

**ALICE TIPADY**—The Queen of the Primulaceous type. Large, open flowers gracefully placed on very long stems. A soft coppery bronze shaded buff. In color, texture, and beauty it is unsurpassed. Plant medium tall with long slender flower spike.

**APPLE BLOSSOM**—A most brilliant apple-blossom pink. Large in size—5 to 6 feet tall, straight. One of our best varieties.

**AVE MARIA**—Large flowering. Light blue with small purple blotches. Seven or eight blooms open at one time. Excellent facing and remarkably good spike. Ea. 10c; 6 for 40c; 20 for $1.00.

**BAGAD**—Very vigorous plant. Tall spike with 6 or 7 very large blooms open. We believe this is the best smoky variety ever originated. Ea. 15c; 6 for 45c; 20 for $1.25.

**BERTY SNOW**—Pinkish lavender often flecked darker; 7 to 10 large well placed flowers on a long spike. Considered one of the finest lavender types. Ea. 10c; 6 for 40c; 20 for $1.00.

**BILL SOWDEN**—Immense massive deep blood red often flecked darker; 5 to 6 flowers open. I personally think Bill Sowden is the most beautiful dark red variety in existence. Beautiful in baskets and in floral work also. Ea. 10c; 6 for 40c; 20 for $1.00.

**BREAK OF DAY**—Large flowers of a very fine shape and color. A most brilliant La France pink. Ea. 5c; 5 for 25c; 20 for $1.00.

**CARNE SYLVA**—Excellent tall snow white. Withstands hot weather exceptionally well. Ea. 10c; 6 for 40c; 20 for $1.00.

**GLORIANA**—Well named indeed. Rich salmon, bright and clean color, good spike, good in every way.

**GLORA**—This is one of our tallest varieties and one that attracts attention whenever seen in full bloom. The color is a gleaming golden-yellow, very fine, indeed, and one that should be included in all collections. (See back Cover for colored picture.)

**JOE COLEMAN**—A sturdy standard red, strongly ruffled. Cherry crimson with rosy white throat and midribs, lower petals blotted orange with a mahogany center and overbloom.

**OUR "BANNER RAINBOW" COLLECTION**

50 Large Blooming Size Gladiol Bulbs Assorted colors, selected from varieties offered on this page, and other varieties that we are growing. FOR ONLY..............$1.39

---

**LARGE-FLOWERING CANNAS**—Strong Divisions

**Gladiator**—Yellow spotted red. Excellent growth. Light green, silver edged foliage, of robust habit. Heavy bloomer. 4½ feet.

**Golden Gate**—Large flowers of pure gold richly rayed with orange-crimson. Of sturdy growth, with bright green leaves. 4 feet.

**King Humbert**—Large heart-shaped leaves of bronze. Color, velvety orange-scarlet flecked carmine, rose tinted. 4 to 4½ feet.

**Golden Dream**—This is one of our tallest varieties and one that attracts attention whenever seen in full bloom. The color is a gleaming golden-yellow, very fine, indeed, and one that should be included in all collections. (See back Cover for colored picture.)

**Yellow King Humbert**—Sturdy grower; flowers numerous rich golden yellow spotted heavily with vermilion. Bronze leaves. 3 to 5 feet.

**Statue of Liberty**—Bronze foliage. Flowers blazing flame red. Height 6 to 7 feet. For expert repair send your watch to Gurneys—Maximum charge $2.50

**Wyoming**—Purple foliage. Blossoms orange colored, true-orchid-shape, with large rounded petals. 7 feet.

---

**DWARF CANNAS**

**City of Portland**—Green foliage. Very good growth; beautiful bloom. Color light salmon or rose-pink. Profuse bloomer. 3½ feet.

**David Harum**—Wine-red dappled crimson. Bronze foliage. 3½ feet.

**Dwarf Hungaria**—Extra fine pink. Green foliage. 3½ feet.

---

Los Angeles—The "cut and come again" glad. Large, perfectly formed, beautiful shrimp pink flowers with a glowing orange-carmine blotch in the throat. It is remarkable for its ability to withstand cutting and constantly throw forth new blooms.

Maiden's Blush—Delicate shell-pink. An extra good cut flower.

**“GLAD” SPECIAL**

The Finest Varieties

$100—30 BULBS—$1.00

SIX OF EACH

Ave Maria, Break of Day, Golden Dream, Star of the Sea

Gloriana

MRS. C. F. PETERS—Late. Beautiful rose-lilac, with purplish blotch in throat. Resembles an orchid in color. Many large flowers are open at once on a long, erect stem. A grand variety.

MRS. FRANK PENDLETON—All experts agree that this is one of the finest varieties yet introduced. Large size flowers borne on straight spikes, a lovely salmon-pink with brilliant deep red blotches in the throat. A color combination rivaling any of the finest orchids.

**PELEGRINA**—Early. Large deep blue. Six or more well placed blooms open with all the rest of the buds on the spike, showing color which gives the appearance of a very large spike of bloom. Ea. 15c; 5 for 55c; 10 for $1.00.

**PICARY**—First Prize Winner, 1933 Century of Progress! A ravishing apricot pink overlaid with a silvery mist, feathering of slightly deeper color in the throat. The florets are extremely large, slightly ruffled and of a heavy waxlike substance. There are 6 to 10 of these magnificent blooms open at one time, which are well placed on a graceful spike. Ea. 15c; 5 for 50c; 12 for $1.00.

**PRINCE OF WALES**—Strawberry pink shading to a very pale pink throat. Painted scarlet blotch on lower petals. Strong spikes. Flowers large and well arranged. In a class by itself. Very early. Ea. 12c; 6 for 50c; 15 for $1.00.

**RED GLORY**—Color, velvety cardinal red. Beautiully ruffled. Excellent. Ea. 10c; 6 for 40c; 20 for $1.00.

**SPIRIT OF ST. LOUIS**—Good early orange buff, six to eight medium size blooms open on a long spike. Ea. 10c; 6 for 40c; 20 for $1.00.

**STAR OF THE SEA**—Peach-red, with a beautiful, smooth, brownish tinted throat. Medium to tall, compact, and one of our best varieties.

W. H. PHIPPS—Late. LaFrance pink, overlaid with light rose-salmon. Lighter towards the center and with lightly speckled ruby throat markings. From twelve to twenty florets open at a time. A novelty which will cause you to exclaim with wonder.

“We’re Looking Ahead”
We Did Business With Your Great Granddad—
We Aim to Do Business With Your Great Grandson—That’s Why We Will Continue to Demand

Highest Prices for Your

FURS

For almost three-quarters of a century Gurney’s has operated in the Northwest—First, with your Great Granddad—Your Granddad and now with you—our present day customers—We’re looking ahead now as we did then—

During the next seventy-one years we hope to do business with your Grandsons and your Great Grandsons.
As with your forefathers, we will “Trade Fair” with you— the forefathers of our customers of tomorrow.

We Need Badger—Mink—Coon—Skunk—Wolf
and All Other FURS at Highest Prices

Last year was by all odds the biggest year we have ever had in our Fur Department. We received practically three times as many shipments as were received the year previous. This was done despite the fact that the catch was reported authentically as only being about 50% normal. We have been in the fur business now for many years—no fur house in the country can show a record comparable to ours, namely, that of increased business in spite of the known shortage in the fur catch. There is only one answer—the higher prices that we have consistently paid. Your fine Mink, Badger, Skunk, Coyote, your Weasel, in fact, all good furs, are appreciated by our manufacturing customers and are paid for accordingly. You who handle and catch fine furs are doing yourself a great injustice if you do not use our fur marketing service. Ship all of your furs to Gurney’s Fur Marketing Service, the Capitol for Northwestern Furs.

Ship Your FURS to GURNEY’S—Where the PRICE Is ALWAYS RIGHT
